The Abuse Death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with Case Managers (CM) [redacted] and [redacted] and Team Leader (TL) [redacted] Also present was Team Coordinator (TC) [redacted], CPS Director (CPSD) [redacted], and Director of Critical Incident Support (DCIS) [redacted]ley.

The CPS investigation was assigned on 10/10/22 concerning the death of ACV [redacted] (8mo). It was reported [redacted] resided with his birth mother [redacted] and sibling [redacted] 3yo] in [redacted] County. [redacted] birth father [redacted] was identified by the mother, but he is reportedly not involved and his whereabouts are unknown at this time. The birth father [redacted] of the sibling is involved and resides in a separate residence.

On 10/9/22 the mother was home alone caring for the children. At approximately 1:09pm the mother contacted 911 and reported [redacted] was found by her unresponsive in the bathtub. LE, FD, and EMS responded to the scene with CPR initiated. [redacted] was transported to [redacted] Hospital where pronounced deceased. No observable injuries were noted on the body. An autopsy was ordered with report pending.

The mother was interviewed by LE and stated she works nights at the local Walmart, going in at 10pm and getting off at 7am, with it sometimes being 8am when she leaves to go home. On the evenings she works, the mother drops off both children at the home of the siblings birth father, leaving them in his care, and picks them up on her way home from work. On 10/9/22 the mother said she got off work, went to the siblings fathers home, spent a little time there, and then returned to her home with the children around 10am. The mother reported she fed the children a snack and changed their diapers. At approximately 11am the mother stated she placed both children in the bathtub, with [redacted] placed on a mesh bouncy seat without a harness and sibling placed directly in the tub. The mother initially reported she went to do other tasks such as laundry and other tasks while the children remained in the bathtub, and she would stick her head into the bathroom to check on them occasionally during this time. At approximately 1pm the mother stated she checked on the children and noted [redacted] legs were not moving. She took him out of the tub and began hitting his back and blowing in his

mouth called 911. When summarizing the timeline with LE a second time, the mothers stated it was around 12pm when she found [redacted] unresponsive; however, it was noted the 911 call occurred around the 1pm timeframe. The mother also admitted to going into her room and falling asleep for approximately 20-30 mins while the children remained in the bathtub. The mother was unable to provide detail as to how she found [redacted] in the water, whether he was floating on his back or face down. The mother reported 2-3 past incidents where [redacted] had rolled off the bed [frame, mattress, box springs] onto the floor [tile over concrete], but stated he did not appear injured other than once when she observed a small knot come up over his left ear.

LE found two marijuana blunts and one baggie in the home and reported the home smelled heavily of marijuana upon arrival to the scene. The mother admitted to smoking marijuana but stated she was unsure of the last time she used and that it had nothing to do with this incident as she had been sick the previous day and had no rest. The mother was drug screened and positive for THC only. The mother reported the 3yo sibling is very active but also very delayed and mostly non-verbal, and wearing pullups. The mother stated she gives the sibling 10mg of melatonin daily to help her calm down and sleep so the mother can sleep as well after getting off work. The siblings father reported that both children sleep for him during the night while at his home and he had no trouble caring for either of them. He reported the 3yo is active, but he plays with her and she goes to sleep naturally, without melatonin. PCP records indicate the 3yo was recommended for occupational therapy last year, but there has not been an appointment since that visit and no therapy was every initiated. An IPA was completed for the sibling to remain in her fathers care with supervised visits for the mother as the investigation continues. CM continues to monitor situation around childcare for sibling while the father is working, but a plan has been developed.

Hx with the family was discussed. There was one previous CPS case for DEC at the time of the siblings birth when the mother was positive for THC. The mother also stated she lost a child in 2013 that was stillborn following placental abruption. Following this most recent incident the mother has expressed she no longer wants to live and has been evaluated by her OBGYN with a recommendation for further evaluation by [redacted] that has occurred.

The death investigation was initiated with many tasks [interviews, scene observation] completed by LE prior to DCS involvement and therefore further clarification is being sought around some information as to the location of the ACV upon first responders arrival and the specifics of the scene and bathtub.

Next Steps:
-- CM will continue requesting relevant medical records to include ACV and sibling birth, prenatal, and PCP records. Records will be reviewed and uploaded to TFACTS.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will complete timeline with referent/first responders and request LE body cam footage/summary to assist in detailed timeline/observation of scene at time of incident.
-- CM will request current evaluation for sibling by PCP to address any needs and past recommendation for occupational therapy.
-- CM will complete home visit with mother and follow-up regarding grief counseling, mental health services.
-- CM has completed clear search and will continue efforts to locate and engage birth father of ACV.
-- CM will continue to follow-up with father of sibling around care and any needs identified.
-- CM will document and upload autopsy into TFACTS once received.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.
