Describe in detail what has happened to the child. What is the abuse or neglect?:
This is a 9-1/2-month-old female that presents to the emergency room with concerns for seizure.

Tennessee Department of Children's Services
Tennessee Child Abuse Hotline Summary

Mom states that the patient had been acting normally all day today. She states she was sleeping and she noticed a weak cry that sounded abnormal. She went in the room the patient was stiff all over. Her eyes were closed. She was drooling. Mom does not know how long the seizure lasted prior to her arrival. Mom tried to arouse the patient was unsuccessful. EMS was contacted. Patient received Versed from EMS. By report the seizure lasted 10 to 15 minutes. This was from EMS. Mom is unsure how long the seizure episode lasted for. On arrival here in emergency room patient has fever. T-max was 101.5ÃÂ°. Mom stated that she had 2 episodes of nonbloody nonbilious emesis associated with the seizure episode. She had some congestion that started last night. She has been eating and drinking well. She has been urinating normally. She has had no rash. Mom did note that she fell from a standing position wall cruising 2 days ago. She states that she fell on the left side of her head and hit her 2-1/2-year-old brothers a bus. She states she had 3 bruises present where the seats of the bus were present. She states the patient had no loss of consciousness. She was acting normally throughout the day. She had no associated episodes of vomiting. I did ask mom about some bruising to the mid forehead. She states the patient was crawling and hit her head on the floor. She denies any other trauma. She states that the patient is with her week days and with dad on the weekends.
Patient lives in the home with her twin sister and her 2-1/2-year-old brother. Mom and dad also reside in the same residence.
Mom states the patient was at her primary care doctor's office 2 days ago and had a normal exam.
Mom states she finished her last dose of prednisone this morning for eczema.
This patient presented with active seizure activity. Is unclear how long patient was seizing prior to my arrival in the room or if her initial seizure stopped. She was moved to an advanced care trauma room. Patient was placed on the monitor. Her oxygen saturation was normal. Her blood pressure was normal. She was tachycardic and tachypneic. Patient already had IV in place. She received 0.8 mg of Ativan. Patient continue with seizure in received an additional 0.8 mg of Ativan. Patient continued with generalized body stiffening. Pupils were deviated to the right. Pupils were intermittently 2 mm and unresponsive to the left pupil dilating intermittently. Patient received Keppra 50 milligram/kilos bolus with continued seizure. She then received fosphenytoin 20 units/kilogram. Fosphenytoin was infusing while the patient was intubated. Patient's initial blood gas had a pCO2 of 32 however given her ongoing seizure activity the decision was made to proceed with intubation. She received succinylcholine and Versed. She was intubated with a 3.5 cuffed tube.

When did the abuse or neglect occur?:
Placement was checked with end-tidal CO2 monitor and good chest rise. Patient had dislodgement of her tube with a gagging episode. Patient's oxygen saturation remained normal. She was bagged with FiO2 in her oxygen saturation was 100%. She received an additional dose of succinylcholine and was intubated with 4.0 ET tube. The cuff was inflated appropriately. She had good color change with end-tidal CO2 monitor. Chest x-ray was performed demonstrating right mainstem bronchus intubation. ET tube was pulled back 1 cm in follow-up x-ray demonstrated the tube above the carina with better aeration of the left lung however she continued to have unequal breath sounds. ET tube was then pulled back in additional cm. Patient was taken to CT scan as soon as she was stabilized. CT scan was concerning for subdural and subarachnoid bleeding. There is no fracture. I am concerned for possible non accidental trauma given this patient's bruising and CT scan findings. Family was updated as to the patient's care into the bleeding found in the subdural subarachnoid space. Add described where this blood was surrounding the brain. Mom states the children have not been anyone oz care. She states that she works on the weekends and dad during the week. Apparent is with them at all times by report. She reiterates the story presented in the HPI. Neuro surgery was contacted. Pediatric ICU was contacted. Patient did drop her blood pressure to 60s over 40s. At that time she received 20 mL/kilos NS bolus with slight improvement blood pressure. She received an additional 20 mL/kg bolus of NS. Blood pressure was 80s over 40s following this. She then received an additional 20 mL/kilos NS bolus over 1 hour. Just prior to admission to the PICU patient was noted to have movement of bilateral toes. This was normal movement and not seizure. She received a dose of fentanyl and was transported to the ICU. Patient was maintained on the ventilator here in emergency room. Her pCO2 to remained in the 30s. Head of the bed was elevated.

This patient had high probability of imminent or life-threatening deterioration due to prolonged seizure and respiratory failure which required my direct attention, intervention and personal management. I personally provided 120 minutes of critical care time exclusive of time spent on separately billable

Tennessee Department of Children's Services
Tennessee Child Abuse Hotline Summary

procedures. Time includes review of laboratory data, radiology results, discussion with consultants, and monitoring for potential decompensation.

Does the child have any injuries from the abuse or neglect? If yes, please describe the injuries to the child.:
see above note

Does the child need medical care? Has the child received medical care? If so, where?:
yes pt is in the PICU

Describe in detail how the child has been affected or harmed by the abuse or neglect.:
see above note

Are there any concerns for Domestic Violence in the home that pose a danger to the child¿s safety? If yes, please describe your concerns.:
*

Has the child made a disclosure of the abuse or neglect? If yes, what did the child disclose? Who did the child tell?:
*

What do the child¿s parents/caregivers say about the abuse/neglect?:
see above note

Is anyone in the home protective of this child? If yes, who?:
*

When will the alleged perpetrator have access to the child again? Is the child currently safe for the next 24 hours to 3 business days?:
*

Does the child have any special needs or disabilities? Please describe.:
*

Are there any concerns for the safety of a Department of Children¿s Services Case Manager responding to the child¿s home?:
*

Narrative Details

Narrative Type: Original Entry Date/Time: 08/10/2023 12:58 PM Entered By: [redacted]

The Department of Childrens Services received a referral on December 21, 2021, for an allegation of Physical Abuse regarding Alleged Child Victim (ACV) [redacted] The Alleged Perpetrator (AP) was unknown at the time of the referral but was later identified as birth father, [redacted] passed away due to the injuries she received from the initial referral and the Abuse Death allegation was added with [redacted] as the alleged perpetrator. This investigation was assigned to Child Protective Services Case Manager (CM) [redacted] by Team Leader (TL) [redacted] This case was worked in conjunction with Detective [redacted] with [redacted] County Sheriffs Office.
[redacted] (9 months) lived at home with her birth parents [redacted] and [redacted] Also in the home are siblings; twin sister [redacted] (9 months) and half-brother [redacted] (2). A roommate also resided in the home, [redacted] Mrs. [redacted] is married to [redacted] but he is not involved in this matter.
On December 20, 2021, Emergency Medical Services (EMS) responded to the home to a seizing child. It was reported that the nine-and-a-half-month female was heard by the mother with a weak cry that sounded abnormal. The mother reported that the child was stiff all over, her eyes were closed, and she was drooling. The mother tried to arouse the child but was unsuccessful. EMS transported the child to [redacted] Childrens Hospital ([redacted]). [redacted] administered life saving measures to stabilize the child. The mother reported that the child fell from a standing position while wall cruising two days prior. The mother reported that she fell on the left side of her head and hit a toy bus that was on the floor. The mother reported that there were three bruises where the seats of the bus were present. The mother reported that the child did not have a loss of consciousness or vomiting from this. The child was transported from the Emergency Room (ER) to the Pediatric Intensive Care Unit (PICU).
CM [redacted] and Det. [redacted] interviewed Mrs. [redacted] at [redacted] about the events that lead to the investigation. She and Mr. [redacted] have been on and off, due to him not wanting to grow up and recently they have been together for the last 5 months. Due to Mr. [redacted] having a bad tooth, he is currently getting a root canal at the dentist.
Mrs. [redacted] provided a consistent story regarding the family activities and the focus of the evening was significant

Tennessee Department of Children's Services

Case Recording Summary

Case Id: [redacted] Case Name: [redacted]

Case Status: Close Organization: [redacted] Region

due to the time of the child needing medical treatment. Mrs. [redacted] stated that Mr. [redacted] wasnt feeling well, so he stayed home with the children, while she and her roommate, Ms. [redacted] went to Walmart and Dollar General from 6:20p-8:30p. Mrs. [redacted] stated that Mr. [redacted] already changed, fed, and got the girls to sleep, before she returned home, but [redacted] waited up. She put [redacted] down around 9:30pm. Mrs. [redacted] stated that she cuddled [redacted] in bed around 10pm, and the child peed, so she walked by [redacted] to get a diaper. [redacted] was on her back on the right side of the play yard and was laying on her left side. She got wipes, changed [redacted] and threw the diaper away. She heard [redacted] waking up but then she got quiet, so she assumed [redacted] went back to sleep. About five minutes later, she heard short, fast, breaths from [redacted] so she ran to her. Mrs. [redacted] stated that she observed [redacted] left eye was half open and the right eye was open. [redacted] looked lethargic. She picked her up and she was stiff, so she called 911 at 10:28pm. She put [redacted] on the couch in the main living room. Mr. [redacted] was holding [redacted] [redacted] slept through it all and Ms. [redacted] was in her room, but she asked Mr. [redacted] to go get Ms. [redacted] so she could watch the children. With regards to any incident that could have caused an injury, she recalled a couple days ago, [redacted] was using the couch to walk, and she fell and hit a Cocomelon bus, which lead to bruising that night.
On December 21, 2021, CM [redacted] and Detective [redacted] met with [redacted] [redacted] at [redacted] County Sheriffs Office. Mr. [redacted] began to describe that he had severe tooth pain from a tooth that needed to have a root canal done on which he completed today. Mr. [redacted] stated that [redacted] woke up just before Mrs. [redacted] and Ms. [redacted] went to Walmart and Dollar Tree, which was around 5:30pm 6:00pm. Mr. [redacted] stated that [redacted] was asleep from about 12:00pm to 5:30pm. He changed [redacted] and laid her back down; she was flat on her back in the play yard. [redacted] slept until a few minutes before Ms. [redacted] and Mrs. [redacted] got home which was maybe around 7:50pm. [redacted] and [redacted] were awake. He was trying to get [redacted] to bed and then Mrs. [redacted] had to put him down. Mr. [redacted] stated that he sat in the living room and watched television. [redacted] was laid down next to [redacted] He and Mrs. [redacted] checked on the girls around 9:00pm. He stated that he fell asleep in about 10-15 minutes. Mr. [redacted] stated that Mrs. [redacted] came in freaking out and 911 was called, an officer arrived and he woke Ms. [redacted] to watch the children so they could go to the hospital.

CM [redacted] and Detective [redacted] explained that his story is not consistent with the others who have been interviewed, or the injuries the child was experiencing. Mr. [redacted] was shown photos of [redacted] in the hospital. CM [redacted] received a message from the hospital during the interview that [redacted] had bleeding in all four quadrants which was indicative of being shaken. Mr. [redacted] broke down crying and stated that he did it. Mr. [redacted] stated that when Ms. [redacted] and Mrs. [redacted] were at the store, the girls were asleep in the play yard. He stated that [redacted] was running through the house, screaming, which woke up the girls. Mr. [redacted] stated that he was still hurting because of the tooth. Mr. [redacted] stated that the girls were stepping all over each other in the play yard and were crying. Mr. [redacted] stated that he picked up [redacted] Mr. [redacted] stated that when he did, she dug her foot into his side and slung her head back. Mr. [redacted] described getting frustrated and shaking her. Mr. [redacted] stated that he laid her back down in the play yard. Mr. [redacted] denied telling Mrs. [redacted] and denied her or Ms. [redacted] being involved. Detective [redacted] arrested Mr. [redacted] with charges of aggravated child abuse.

[redacted] was sent home with hospice through [redacted] On January 11, 2022, [redacted] passed away in her home.

On May 12, 2022, the final autopsy was received for [redacted] The autopsy was completed by [redacted], DO, Board Certified Forensic Pathologist and Assistant Medical Examiner for [redacted] and [redacted] Counties. The autopsy documented evidence of blunt force injuries of the head and their sequelae including residual subdural and subarachnoid hemorrhage, hypoxic ischemic injury of the brain, retinal hemorrhages, focal subdural hemorrhage of the right optic nerve, acute bronchopneumonia, and stress involution of the thymus. Based on the autopsy findings and circumstances surrounding the death, as currently understood, the

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

cause of death is complications of blunt force injuries of the head. The manner of death is classified as homicide.

On June 8, 2022, CM [redacted] presented this case to the [redacted] County Child Protective Investigative Team (CPIT).
Present for CPIT:
[redacted] DCS Team Leader
Detective [redacted] County Sheriffs Office
[redacted] District Attorneys Office Assistant District Attorney
[redacted] County Juveniles Office
Director [redacted] District Child Advocacy Center
[redacted] District Child Advocacy Center
[redacted] District Child Advocacy Center

The team agreed to classify the case for the allegations of physical abuse and abuse death as allegation substantiated/perpetrator substantiated.
Physical Abuse:

Any non-accidental physical injury or trauma that could cause injury inflicted by a parent, legal custodian, relative or any other person who is responsible for the care, supervision or treatment of the child. Physical abuse also includes, but is not limited to:

a) A parent or legal custodian/caretakers failure to protect a child from another person who perpetrated physical abuse on a child;

b) Injuries, marks and/or bruising that go beyond temporary redness or are in excess of age-appropriate corporal punishment. (e.g., a bruise, broken bone, cut, burn);

c) Violent behavior by the parent or legal custodian/caretaker that demonstrates a disregard for the presence of a child and could reasonably result in serious injury. Striking (hitting, kicking, punching, slapping, etc.) a child in such a way that would result in internal injury. Factitious Disorder Imposed on Another (FDIA), formerly known as Munchausen by Proxy Syndrome could be considered physical abuse, medical neglect or psychological abuse.

NOTE: Physical abuse should not be confused with developmentally appropriate, discipline-related marks and bruises on the buttocks or legs of children six (6) years of age and older when there are no developmental or physical delays, past history of abuse or recent (within the past year) screened-out reports.
NOTE: In its most severe form, physical abuse is likely to cause serious bodily injury or death.

Child Death:

Child death is defined as:

a) Any child death caused by abuse or neglect.

b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.

c) Any child death caused by abuse or neglect resulting from the parent or legal custodian/caretaker failure to stop another persons direct action that resulted in the death of the child. Child deaths are always treated as severe abuse.

A near death, per Tennessee Code Annotated (TCA) 37-5-107(c)(4) is defined as a serious or critical medical condition resulting from abuse, neglect or child sexual abuse, as reported by a physician who has examined the child subsequent to the abuse or neglect. When an initial referral or a referral on an open case

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

contains information that suggests the child is in a serious or critical medical condition as a result of the allegation(s) or has been determined to meet the criteria for an allegation of near death as defined above, the Child Abuse Hotline selects Preliminary Near Death (PND) Indicator in TFACTS on the participants tab on a new intake or the investigative persons tab on an active case. The information does not have to come from a physician. Preliminary near deaths are always treated as severe child abuse.

Due to the injuries, death of the child and confession, there is a preponderance of evidence that supports the being classified as Allegation Substantiated/Perpetrator Substantiated for Physical Abuse (severe) and Abuse Death (severe) against [redacted]

An adjudication hearing was set for this date. Mr. [redacted] waived his right to an adjudication hearing. A dependency and neglect finding was found and based on the facts in the petition, the court would likely find severe abuse. A severe abuse finding was made. A no contact order remains in place between Mr. [redacted] and the children. The juvenile court case has been closed at this time.

CPSI [redacted] received a message from Mrs. [redacted] She sent screenshots of a court order she received in the mail. CPSI [redacted] clarified that it was just giving her notice of the next hearing in December. Mrs. [redacted] asked what to do if she is moving to North Carolina. CPSI [redacted] noted that she just needed to give CPSI [redacted] the address so she can provide it to the court. Mrs. [redacted] stated that she didn't know the address yet due to being on a wait list for housing but when she gets it, she will send it.

CPIT Presentation:

This case was presented to [redacted] County CPIT on 06/08/2022.

Participating Members:
Det. [redacted] County Sheriffs Office
[redacted] Juvenile Court
[redacted] CAC
[redacted] CAC
[redacted] CAC
[redacted] TL
[redacted] Police Department
[redacted] Judicial District Attorneys Office

CPSI [redacted] and LI [redacted] discussed this case, and based on the evidence gathered during the course of the investigation, it was determined that the classification should be allegation substantiated/perpetrator substantiated. This classification decision was presented to CPIT, and the majority agreed with the classification decision.

The team made the following recommendations: None.

CPSI [redacted] went to the family home on an announced visit. [redacted] and [redacted] were at the kitchen table eating. The family had friends over that were helping out with the family. They were holding [redacted] during the visit. [redacted] the paternal grandmother, took CPSI downstairs to where [redacted] was. [redacted] was in a pack and play and had a tube hooked up to her. [redacted] stated that it was for her medication. Jennifer explained that they stopped the feedings on Wednesday of last week like they do with dying cancer patients. [redacted] stated that the feedings don't help her at all. During the visit, [redacted] stopped breathing four times. Each time, [redacted] and [redacted] put their hand on her to see if she would start breathing again, which she did. Also during the visit, [redacted] breathing was raspy when she was breathing. She also suffered a seizure which [redacted] then administered medication. [redacted] got [redacted] hands and feet out of the onside to stimulate them. [redacted] hands and feet were purple. CPSI concluded the visit.

CPSI [redacted] contacted [redacted] to let her know about court next Thursday. CPSI informed her that we will check in with [redacted] status to determine if she needs to be at court in person or by phone. [redacted] gave CPSI an update. [redacted] stated that the meeting didn't go as well as she hoped. [redacted] stated that the neurologists looked at the MRI's and saw the lack of improvement. [redacted] stated that her center of her brain is bright white which shows the swelling and the bleeding. [redacted] stated that normally its black and gray. [redacted] stated that the right side of her brain has severe damage and the left side is moderately damaged. [redacted] stated that she is completely blind. [redacted] stated that she keeps having neurostorms. [redacted] described that as her body locking up because the part of her brain that would react to that is dead. [redacted] stated that they give Valium to her as needed. [redacted] stated that with best case scenario, she will not walk, talk, eat and have very minimal movement. [redacted] stated that they decided to bring her home on hospice but she is unsure of when they are going to do that. [redacted] stated that because she has a "floppy airway", that could give out at any time which would result in death. [redacted] stated that they indicated that she could last a couple of days or a week at home. CPSI thanked [redacted] for her time.

CPSI [redacted] spoke with [redacted] the social worker covering for [redacted] today. [redacted] stated that over the weekend, [redacted] expressed wanting comfort care for [redacted] stated that [redacted] doesn't want [redacted] to have a g-tube. [redacted] stated that [redacted] had spoke with family members and they all made this decision. [redacted] stated that [redacted] was also inquiring about a DNR for [redacted] but they legally need both parents to sign it. CPSI [redacted] explained the situation about [redacted] still being legally married to [redacted] who doesn't reside in the state. CPSI [redacted] also explained that no paternity has been established as to [redacted] being the biological father of the twins. [redacted] acknowledged. [redacted] invited CPSI [redacted] to the meeting with Palliative Care tomorrow. CPSI stated that she would be present. [redacted] stated that [redacted] has been stable on room air but [redacted] thinks she is in pain and doesn't want her to be in pain. CPSI thanked her for her time.

10:43am - CPSI [redacted] spoke with [redacted] who requested a phone call. [redacted] asked for clarification about the hospital needing [redacted] signature. CPSI explained that because [redacted] is the legal father and [redacted] hasn't had paternity established, they have to have [redacted] signatures. [redacted] acknowledged. [redacted] indicated that they have been staying with [redacted] and [redacted] in [redacted] stated that she was upset with the hospital's lack of communication with her. [redacted] stated that she had gone to the hospital to see [redacted] and when she walked into her room, she observed another set of parents with another child. [redacted] stated that they apparently moved [redacted] down two rooms and didn't tell her. [redacted] asked about the court dates. CPSI explained that she will have court for the criminal portion and the juvenile portion. CPSI explained the difference. [redacted] acknowledged. [redacted] stated that she did reach out to [redacted] and was finally able to get in touch with him. CPSI thanked her for her time.

11:23am - CPSI [redacted] received the Palliative Care note from DCS nurse [redacted]. The note indicated that [redacted] understood [redacted] back of her brain was dead and that her current condition was her baseline. The notes will be uploaded to TFACTS.

12:00pm - CPSI [redacted] spoke with Det. [redacted] He indicated that nothing was found on [redacted] or [redacted]

phone dump that indicated that [redacted] did it or had any knowledge of the incident. CPSI thanked him for his time.

1:18pm - CPSI [redacted] received a call from [redacted] stated that she was informed that the meeting for tomorrow is for family only and DCS is not invited. CPSI [redacted] stated that was fine. [redacted] stated that her supervisor, [redacted], has contacted legal and is awaiting a response as to what information they can and cannot give CPSI. CPSI asked for [redacted] to let her know.

2:20pm - CPSI [redacted] heard from [redacted] [redacted] CPSI asked [redacted] to tell CPSI what information he knew. [redacted] indicated that he heard from [redacted] a couple of days after the incident happened. [redacted] stated that even though the twins aren't his, he is still the legal dad so [redacted] felt obligated to tell him. [redacted] stated that he was told that their biological dad had shook or threw one of the girls and he admitted to it. CPSI explained that she will be filing a no contact order but because he is the legal dad, he has to be served with the petition even though there are no allegations against him. [redacted] stated that he understood and provided information needed. [redacted] stated that he could possibly be available by phone as he resides in South Carolina now and works at [redacted]. CPSI thanked him for his time.

5:23pm - CPSI [redacted] spoke with [redacted] stated that she was told she is not allowed to give CPSI any information that doesn't impact the case, which includes the decisions that [redacted] makes regarding [redacted] comfort care. CPSI explained that she understands but also explained that CPSI will need to know if [redacted] condition changes. [redacted] acknowledged. CPSI thanked her for her time.

CPSI [redacted] received a call from [redacted] the social worker at [redacted] Children's Hospital. [redacted] stated that they were going to try and extubate [redacted] today but she had some swelling in her throat. [redacted] stated that they gave her a round of steroids and they will try to extubate tomorrow. CPSI explained to [redacted] that the mother has a polygraph tomorrow at 1:30pm and asked if they would do it before then. [redacted] stated that the doctors that are there today are not the same ones for tomorrow but she will pass that along to ensure mom can make it to the polygraph. CPSI asked how the exams went with [redacted] and [redacted] She stated that [redacted] had a double ear infection but that was the extent of it. [redacted] did end up sending CPSI the notes from the exam. CPSI thanked her for her time.

CPSI [redacted] contacted the hospital to see how [redacted] was doing. CPSI spoke with her nurse, [redacted] stated that [redacted] did well with her CPAP trials and they were looking at extubating her today to see how well she does. [redacted] stated that if she doesn't do well, then they would look at re-intubating her or putting a G-tube and feeding tube in with a trach. [redacted] followed up to ensure that the mother can still make medical decisions. CPSI stated yes and it was just the father's visitation that has been restricted at this time. CPSI thanked him for his time.

CPSI [redacted] and Det. [redacted] met with [redacted] at [redacted] County Sheriffs Office. CPSI [redacted] and Det. [redacted] introduced themselves. [redacted] was aware of why he was there. [redacted] stated that he woke up around 5:00am because he was in pain. [redacted] began to describe that he had severe tooth pain from a tooth that needed to have a root canal done on which he completed today. [redacted] stated that he went to watch television in the living room. [redacted] stated that the kids got up in between 8:30am and 9:00am. [redacted] stated that [redacted] didnt get up until 10:00am and [redacted] got up in between 10:30am and 11:00am. [redacted] stated that he made the girls, [redacted] and [redacted] bottles and gave it to them in their rocker chairs. [redacted] stated that he changed their diapers and they played in the walker and ate puffs. [redacted] stated that he put them in the floor. [redacted] stated that he didnt eat because he was in a lot of pain. [redacted] stated that [redacted] had sausage and yogurt before [redacted] woke up. [redacted] stated that he went to Walmart for baby wipes around noon. [redacted] stated that he also got two rattles for the girls. [redacted] stated that he was hurting so bad at Walmart, he ended up leaving soon. [redacted] stated that he was gone about 30-35 minutes. [redacted] stated that when he got back, the girls were napping. [redacted] stated that he had been home for about ten minutes when [redacted] went to leave to go to Walmart for scissors. [redacted] stated that [redacted] was gone from about 45 minutes to an hour. [redacted] stated that [redacted] was still asleep when [redacted] got back. [redacted] stated that [redacted] and [redacted] were awake. [redacted] stated that [redacted] was in the floor playing and he was just hanging out in the living room. [redacted] stated that [redacted] woke up just before [redacted] and [redacted] went back to the store which was around 5:30pm 6:00pm. [redacted] stated that they went to Walmart and the Dollar Tree. [redacted] stated that [redacted] was asleep from about 12:00pm to 5:30pm. [redacted] stated that he changed [redacted] and laid her back down. [redacted] stated that she was flat on her back in the play yard. [redacted] stated that [redacted] slept until a few minutes before [redacted] and [redacted] got home which was maybe around 7:50pm. [redacted] stated that [redacted] and [redacted] were awake. [redacted] stated that he was trying to get [redacted] to bed and then [redacted] had to put him down. [redacted] stated that he sat in the living room and watched television. [redacted] stated that [redacted] was laid down next to [redacted] [redacted] stated that he and [redacted] checked on the girls around 9:00pm. He stated that he fell asleep in about 10-15 minutes. [redacted] stated that [redacted] came in freaking out. [redacted] stated that 911 was called. [redacted] stated that one cop showed up and then EMS. [redacted] stated that he started packing up stuff to take to the hospital. [redacted] stated

changed [redacted] stated that she threw the diaper away. [redacted] stated that she heard [redacted] waking up but then she got quiet so she assumed [redacted] went back to sleep. [redacted] stated that about five minutes later, she heard short, fast, breaths from [redacted] so she ran to her. [redacted] stated that she pulled the blanket back. [redacted] stated that [redacted] usually wakes up to touch but not noise. [redacted] stated that her left eye was half open and the right eye was open. [redacted] stated that [redacted] looked lethargic. [redacted] stated that she picked her up and she was stiff. [redacted] stated that her arms and legs were inward. [redacted] stated that she called 911 at 10:28pm. [redacted] stated that she put [redacted] on the couch in the main living room. [redacted] stated that [redacted] was holding Iris. [redacted] stated that [redacted] slept through it all and [redacted] was in her room. [redacted] stated that she told [redacted] to wake up [redacted] to watch the kids. [redacted] stated that a couple days ago, [redacted] was using the couch to walk and she fell and hit a Cocomelon bus. [redacted] stated that she saw bruising that night. [redacted] stated that [redacted] and [redacted] are [redacted] mom and stepdad. [redacted] stated that they only live about 15 minutes from here so she will be going there off and on to shower. CPSI thanked her for her time.

The following strengths were identified: The family has stable housing.

The following needs/concerns were identified: The medical evidence supports an allegation of physical abuse on [redacted]

The plan to address the concerns identified above includes the following: CPSI [redacted] will continue the investigation.

In order to assist the family in addressing the concerns/harm factors, the family listed the following people as informal supports: The family utilizes extended family as supports.

Worker observations: CPSI [redacted] observed [redacted] to be appropriate at this time.

CPSI thoroughly explained and reviewed the information contained in CS-0050, Case Intake Packet Documents Verification, and obtained the appropriate initials and signatures.
The information within the packet and reviewed with the parent/caregiver is as follows:
Clients Rights Handbook
Notification of Equal Access to Programs and Services and Grievance Procedures
Notice of Privacy Practices
In addition to the forms provided, CPSI inquired as to if the child(ren) were affiliated with a Native American Tribe.

Narrative Details

Narrative Type: Original Entry Date/Time: 03/23/2022 09:28 AM Entered By: [redacted]

The case was assigned to the Investigation track. This case was assigned to Child Protective Service Investigator (CPSI) [redacted] by Lead Investigator (LI) [redacted] The District Attorneys office is notified of all severe abuse cases per local protocol. Upon classification the District Attorney is notified at the Child Protective Investigative Team (CPIT) monthly meeting. Juvenile Court judges are notified of all referrals per local protocol. Notice of classification is submitted to the Juvenile Court Judge per local protocol via the 740. The allegations reported are: (click to add allegations). The alleged perpetrators are listed as Unknown. The response is due on 12/21/2021 at 10:00 am. The referral states the following: This is a 9-1/2-month-old female that presents to the emergency room with concerns for seizure.
Mom states that the patient had been acting normal all day today. She states she was sleeping, and she noticed a weak cry that sounded abnormal. She went in the room the patient was stiff all over. Her eyes were closed. She was drooling. Mom does not know how long the seizure lasted prior to her arrival. Mom tried to arouse the patient was unsuccessful. EMS was contacted. Patient received Versed from EMS. By report the seizure lasted 10 to 15 minutes. This was from EMS. Mom is unsure how long the seizure episode lasted for. On arrival here in emergency room patient has fever. T-max was 101.5ÃÂ°. Mom stated that she had 2 episodes of non-bloody nonbilious emesis associated with the seizure episode. She had some congestion that started last night. She has been eating and drinking well. She has been urinating normally. She has had no rash. Mom did note that she fell from a standing position wall cruising 2 days ago. She states that she fell on the left side of her head and hit her 2-1/2-year-old brothers a bus. She states she had 3 bruises present where the seats of the bus were present. She states the patient had no loss of consciousness. She was acting normally throughout the day. She had no associated episodes of vomiting. I did ask mom about some bruising to the mid forehead. She states the patient was crawling and hit her head on the floor. She denies any other trauma. She states that the patient is with her weekdays and with dad on the weekends.
Patient lives in the home with her twin sister and her 2-1/2-year-old brother. Mom and dad also reside in the same

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]

residence.
Mom states the patient was at her primary care doctor's office 2 days ago and had a normal exam.
Mom states she finished her last dose of prednisone this morning for eczema.
This patient presented with active seizure activity. Is unclear how long patient was seizing prior to my arrival in the room or if her initial seizure stopped. She was moved to an advanced care trauma room. Patient was placed on the monitor. Her oxygen saturation was normal. Her blood pressure was normal. She was tachycardic and tachypneic. Patient already had IV in place. She received 0.8 mg of Ativan. Patient continues with seizure in received an additional 0.8 mg of Ativan. Patient continued with generalized body stiffening. Pupils were deviated to the right. Pupils were intermittently 2 mm and unresponsive to the left pupil dilating intermittently. Patient received Keppra 50 milligram/kilos bolus with continued seizure. She then received fosphenytoin 20 units/kilogram. Fosphenytoin was infusing while the patient was intubated. Patient's initial blood gas had a pCO2 of 32 however given her ongoing seizure activity the decision was made to proceed with intubation. She received succinylcholine and versed. She was intubated with a 3.5 cuffed tube.
Placement was checked with end-tidal CO2 monitor and good chest rise. Patient had dislodgement of her tube with a gagging episode. Patient's oxygen saturation remained normal. She was bagged with FiO2 in her oxygen saturation was 100%. She received an additional dose of succinylcholine and was intubated with 4.0 ET tube. The cuff was inflated appropriately. She had good color change with end-tidal CO2 monitor. Chest x-ray was performed demonstrating right mainstem bronchus intubation. ET tube was pulled back 1 cm in follow-up x-ray demonstrated the tube above the carina with better aeration of the left lung however she continued to have unequal breath sounds. ET tube was then pulled back in additional cm. Patient was taken to CT scan as soon as she was stabilized. CT scan was concerning for subdural and subarachnoid bleeding. There is no fracture. I am concerned for possible non accidental trauma given this patient's bruising and CT scan findings. Family was updated as to the patient's care into the bleeding found in the subdural subarachnoid space. Add described where this blood was surrounding the brain. Mom states the children have not been anyone oz care. She states that she works on the weekends and dad during the week. Apparent is with them at all times by report. She reiterates the story presented in the HPI. Neuro surgery was contacted. Pediatric ICU was contacted. Patient did drop her blood pressure to 60s over 40s. At that time she received 20 mL/kilos NS bolus with slight improvement blood pressure. She received an additional 20 mL/kg bolus of NS. Blood pressure was 80s over 40s following this. She then received an additional 20 mL/kilos NS bolus over 1 hour. Just prior to admission to the PICU patient was noted to have movement of bilateral toes. This was normal movement and not seizure. She received a dose of fentanyl and was transported to the ICU. Patient was maintained on the ventilator here in emergency room. Her pCO2 to remained in the 30s. Head of the bed was elevated.
This patient had high probability of imminent or life-threatening deterioration due to prolonged seizure and respiratory failure which required my direct attention, intervention, and personal management.

DCS policy Work Aid 1 (E) defines the following criteria for Child Neglect Death:

1. Child Death

Child death is defined as:
Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.

Any child death caused by abuse or neglect resulting from the parent or caretakers failure to stop another

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

persons direct action that resulted in the death of the child. Child deaths are always treated as severe child abuse.

Any child death caused by abuse or neglect resulting from the parent or caretakers to stop another persons direct action that resulted in the death of the child.

DCS policy Work Aid 1 (E) defines the following criteria for Child Near Death:
2. Near Death

A near death, per Tennessee Code Annotated (TCA) 35-5-107(c)(4) is defined as a serious or critical medical condition resulting from abuse, neglect or child sexual abuse, as reported by a physician who has examined the child subsequent to the abuse or neglect.

NOTE: When an initial referral or a referral on an open case contains information that suggests the child is in a serious or critical medical condition as a result of the allegation(s) or has been determined to meet the criteria for an allegation of near death as defined above, the Child Abuse Hotline will select Preliminary Near Death (PND) Indicator in TFACTS on the participants tab on a new intake or the investigative persons tab on an active case. The information does not have to come from a physician.

NOTE: Preliminary near deaths are always treated as severe child abuse.

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

A. Investigation

Case Name: [redacted]

Investigation ID: [redacted]

Referral Date: 12/21/2021

Assignment Date: 12/21/2021

Street Adress: [redacted]

City/State/Zip: [redacted], North Carolina [redacted]

B. Allegation

#	Children's Name	DOB	Specific Allegation for Each Child	Alleged Perpetrator's Name	DOB	Classification	Severe Abuse / CSEM	Classified By / Classified Date
1	[redacted]	[redacted]	Physical Abuse	[redacted]	[redacted] 12:00 AM	Allegation Substantiated / Perpetrator Substantiated	Yes	[redacted] / 06/08/2022
2	[redacted]	[redacted]	Abuse Death	[redacted]	[redacted] 12:00 AM	Allegation Substantiated / Perpetrator Substantiated	Yes	Fixes, Data / 07/22/2022

C. Disposition Decision

Disposition Decision: Assessed and Closed

Comments: CPSI [redacted] classifies the allegations of physical abuse and abuse death as allegation substantiated/perpetrator substantiated. [redacted] was unable to be interviewed due to her age. [redacted] was taken to the hospital after being found having an active seizure. Once admitted to the hospital, it was learned that [redacted] had severe injuries that supported that she had been shaken. [redacted] and [redacted] were all interviewed. [redacted] admitted to shaking [redacted] after [redacted] woke the twins up. [redacted] explained that he was in a lot of pain from his tooth that needed a root canal. [redacted] was arrested and charged with aggravated child abuse. [redacted] died in January and that was when the abuse death allegation was added. CPSI [redacted] filed in court for a no contact order between [redacted] and the children. The autopsy was received in May and [redacted] cause of death was homicide. [redacted] was charged with felony murder after this through a grand jury indictment.

Date: 12/21/2021
Time: 12:30pm

Department of Children's Services

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

Case Name : [redacted] **Investigation ID:** [redacted]

Location: [redacted] Children's Hospital

CM [redacted] observed Alleged Child Victim (ACV) [redacted] The child could not be interviewed due to her age. The child was in the care of the hospital and her mother.

CM observed [redacted] to be unconscious. She was hooked up to several machines. She had bruising on her face that extended from the middle of her forehead and went down the left side of her face.

Summarize professional, medical or psychological findings or opinions: What is the collateral's oral or written finding/opinion of the incident(s)/allegation(s)?

[redacted] the roommate, was interviewed at [redacted] County Sheriff's Office by Det. [redacted] and CPSI [redacted] stated that she got home from work in between 4-4:30pm. [redacted] stated that she went to [redacted] and [redacted] room to say hello. [redacted] stated that [redacted] was in the living room while [redacted] and [redacted] were on the bed. [redacted] stated that [redacted] was pacing the bedroom while they were all talking. [redacted] stated that [redacted] asked [redacted] to watch the kids. [redacted] stated that she told [redacted] yes but she wanted to shower and eat first. [redacted] stated that after the shower and eating, [redacted] mouth was hurting so he ended up staying behind with the kids. [redacted] stated that she and [redacted] left the house around 6pm and went to Walmart, then the Dollar Tree then back home. [redacted] stated that they were home in between 8-8:30pm. [redacted] stated that [redacted] was asleep but [redacted] and [redacted] were awake. [redacted] stated that [redacted] was in the play yard. [redacted] stated that [redacted] was in bed with [redacted] stated that [redacted] was still watching television. [redacted] stated that she went to bed around 9pm. [redacted] stated that she plugged up her phone at 10:10pm. [redacted] stated that the next thing was when [redacted] rushed into her room around 12:30am. [redacted] stated that she stayed with [redacted] and [redacted] while they went to the hospital. [redacted] stated that she got [redacted] to sleep around 2am but that [redacted] was already asleep. [redacted] stated that she does know about the eczema all over [redacted] face. [redacted] stated that [redacted] noticed bruises a couple days ago. [redacted] stated that she knows that there are two separate brain bleeds and that they can be caused by being shaken. [redacted] stated that [redacted] stated that the doctor told her that. [redacted] stated that she is only 60% sure that [redacted] was in the play yard asleep and [redacted] with [redacted] when they left. CPSI [redacted] thanked her for her time.

Summarize alleged perpetrator's statement or admission: What is the perpetrator's explanation of the incident(s)/allegation(s)?

CPSI [redacted] and Det. [redacted] explained that the stories fall apart after 4:00pm and then everyone gives a little different of a version. [redacted] was shown photos of [redacted] in the hospital. CPSI [redacted] received a message from the hospital during the interview that [redacted] had bleeding in all four quadrants which was indicative of being shaken. CPSI [redacted] informed Det. [redacted] of this. [redacted] broke down crying and stated that he did it. [redacted] stated that when [redacted] and [redacted] were at the store, the girls were asleep in the play yard. He stated that [redacted] was running through the house, screaming, which woke up the girls. [redacted] stated that he was still hurting because of the tooth. [redacted] stated that the girls were stepping all over each other in the play yard and were crying. [redacted] stated that he picked up [redacted] [redacted] stated that when he did, she dug her foot into his side and slung her head back. [redacted] described getting frustrated and shaking her. [redacted] stated that he laid her back down in the play yard. [redacted] denied telling [redacted] and denied her or [redacted] being involved.

Summarize witnesses' descriptions of what they saw and what they believe indicates child abuse/neglect:

Describe in detail what has happened to the child. What is the abuse or neglect?:
This is a 9-1/2-month-old female that presents to the emergency room with concerns for seizure. Mom states that the patient had been acting normally all day today. She states she was sleeping and she noticed a weak cry that sounded abnormal. She went in the room the patient was stiff all over. Her eyes were closed. She was drooling. Mom does not know how long the seizure lasted prior to her arrival. Mom tried to arouse the patient was unsuccessful. EMS was contacted. Patient received Versed from EMS. By report the seizure lasted 10 to 15 minutes. This was from EMS. Mom is unsure how long the seizure episode lasted for. On arrival here in emergency room patient has fever. T-max was 101.5ÃÂ°. Mom stated that she had 2 episodes of nonbloody nonbilious emesis associated with the seizure episode. She had some congestion that started last night. She has been eating and drinking well. She has been urinating normally. She has had no rash. Mom did note that she fell from a standing position wall cruising 2 days ago. She states that she fell on

Case Name : [redacted] **Investigation ID:** [redacted]

the left side of her head and hit her 2-1/2-year-old brothers a bus. She states she had 3 bruises present where the seats of the bus were present. She states the patient had no loss of consciousness. She was acting normally throughout the day. She had no associated episodes of vomiting. I did ask mom about some bruising to the mid forehead. She states the patient was crawling and hit her head on the floor. She denies any other trauma. She states that the patient is with her week days and with dad on the weekends.
Patient lives in the home with her twin sister and her 2-1/2-year-old brother. Mom and dad also reside in the same residence.
Mom states the patient was at her primary care doctor's office 2 days ago and had a normal exam.
Mom states she finished her last dose of prednisone this morning for eczema.
This patient presented with active seizure activity. Is unclear how long patient was seizing prior to my arrival in the room or if her initial seizure stopped. She was moved to an advanced care trauma room. Patient was placed on the monitor. Her oxygen saturation was normal. Her blood pressure was normal. She was tachycardic and tachypneic. Patient already had IV in place. She received 0.8 mg of Ativan. Patient continue with seizure in received an additional 0.8 mg of Ativan. Patient continued with generalized body stiffening. Pupils were deviated to the right. Pupils were intermittently 2 mm and unresponsive to the left pupil dilating intermittently. Patient received Keppra 50 milligram/kilos bolus with continued seizure. She then received fosphenytoin 20 units/kilogram. Fosphenytoin was infusing while the patient was intubated. Patient's initial blood gas had a pCO2 of 32 however given her ongoing seizure activity the decision was made to proceed with intubation. She received succinylcholine and Versed. She was intubated with a 3.5 cuffed tube.

When did the abuse or neglect occur?:
Placement was checked with end-tidal CO2 monitor and good chest rise. Patient had dislodgement of her tube with a gagging episode. Patient's oxygen saturation remained normal. She was bagged with FiO2 in her oxygen saturation was 100%. She received an additional dose of succinylcholine and was intubated with 4.0 ET tube. The cuff was inflated appropriately. She had good color change with end-tidal CO2 monitor. Chest x-ray was performed demonstrating right mainstem bronchus intubation. ET tube was pulled back 1 cm in follow-up x-ray demonstrated the tube above the carina with better aeration of the left lung however she continued to have unequal breath sounds. ET tube was then pulled back in additional cm. Patient was taken to CT scan as soon as she was stabilized. CT scan was concerning for subdural and subarachnoid bleeding.

Summarize any other evidence or factors that support the investigative finding(s) for the allegation(s) of abuse/neglect:

On January 6, 2022, a petition for a restraining order was filed against [redacted] and a preliminary hearing was set for January 13, 2022 in [redacted] County Juvenile Court. On January 13, 2022, the preliminary hearing was reset for February 3, 2022 to get all parties served and allow the attorneys to speak with their clients. Judge [redacted] did however order that the mother, [redacted] retain legal and physical custody of her children and that [redacted] have no contact with any of the children. Detective [redacted] did complete a search of [redacted] cell phone and there was nothing found to indicate [redacted] had knowledge of this abuse. [redacted] did agree to a polygraph examination however this could not be completed due to her being pregnant.
CPSI [redacted] completed a home visit on January 10, 2022 observing [redacted] to be having breathing issues. On January 11, 2022, CPSI [redacted] received a text message from [redacted] reporting that [redacted] had passed away. CPSI [redacted] notified the appropriate DCS Staff and the Child Abuse hotline that the ACV has passed away.
The case was initially presented to [redacted] County Child Protective Investigation Team (CPIT) on June 8, 2022. The team was in agreement with classifying as allegation substantiated/perpetrator substantiated.
Based upon the information and evidence gathered during the course of the investigation, there is a preponderance of evidence to substantiate the allegations of physical abuse and abuse death.
The case will be closed and classified as allegation substantiated/perpetrator substantiated for the allegations of Child Abuse Death and Physical Abuse.
