Office of Children and Family Services

Child Fatality Report

Report Identification Number: RO-25-013

Prepared by: New York State Office of Children & Family Services

Issue Date: Aug 19, 2025

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- ☒ A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- ☐ The death of a child for whom child protective services had an open investigation or a CPS monitored services case.
- ☐ The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- ☐ The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child's family; any extraordinary or pertinent information concerning the circumstances of the child's death; whether the child or the child's family received assistance, care or services from the social services district prior to the child's death; any action or further investigation undertaken by OCFS or the social services district since the child's death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child's household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child's siblings or other children in the household.**

OCFS' review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS' assessment and the performance of these agencies.

Presenting Information

An SCR report was received on 5/4/25, which stated at approximately 12:00am, the subject father fed the 5-week-old subject child a bottle while the subject mother went to sleep. At an unknown time, the mother found the child unresponsive, in-between the couch and the wall. The mother attempted to perform cardiopulmonary resuscitation (CPR). The father was present, but it was unknown what actions he took. 911 was called to the home. Emergency medical services (EMS) arrived and transported the child to the hospital. Blood and bruising were observed on the child's body. Life saving measures were continued including intubation, however, he was pronounced deceased at 6:04am. The child was an otherwise healthy child, and the parents did not have an explanation for the blood and bruising on his body or for his death.

Executive Summary

This report concerns the death of a 5-week-old male child. On 5/4/25, Chemung County Department of Social Services (CCDSS) received an initial SCR report and two duplicate reports, regarding the child's death. At the time of the child's death, he resided with his mother, father and two siblings, ages 8 and 5.

According to the family, the subject father fell asleep on the couch while feeding the child. When the father awoke, he realized the child had fallen from his arm and was wedged between the father's body and the pillows on the couch. The child was unresponsive and not breathing so the subject mother began CPR while the subject father called 911. Lifesaving measures were performed by first responders and hospital staff but were unsuccessful. The child was pronounced deceased at 6:04am.

The medical examiner was notified and performed an autopsy of the subject child. His cause of death was listed as suffocation. The medical examiner stated the bruising on the child's body was due to his positioning at his time of death. Law enforcement investigated the fatal incident but did not pursue criminal charges, due to the fatality appearing to be accidental.

The allegation of DOA/Fatality against the subject father was substantiated. During the investigation the subject father acknowledged placing the child in an unsafe sleep environment on a continuous basis. During the fatal incident, the subject child was found wedged between the subject father's body and pillows on the couch.

The allegation of DOA/Fatality against the subject mother was unsubstantiated. The subject mother was asleep in another room during the fatal incident and was not a contributing factor to the fatality.

The allegations of inadequate guardianship against both parents were substantiated. Both parents reported that they continuously engaged in unsafe sleep with the subject child, placing him in immediate or impending danger.

LDSS Response

On 5/4/25, an SCR report was received regarding the death of a 5-week-old male subject child. CCDSS initiated their investigation within 24 hours, spoke with the source of the report, coordinated with law enforcement, completed a CPS history review and conducted a thorough home visit.

The subject father reported that at approximately 11:00pm on 5/3/25, he sat on the couch in the living room to feed the subject child a bottle and to go to sleep with him. He stated he stacked pillows on his left side to elevate his arm and then fell asleep with the child in his left arm with the pillows below. The following morning, at approximately 05:30am, he awoke and was unable to locate the child. He then realized that the child had fallen in between the father's body and the pillows that were stacked on his left side. He began to scream and moved the child to a nearby ottoman. He stated the child was not breathing and was cold to the touch. The subject mother then entered the room and began CPR while the father called 911. Life saving measures were continued by EMS and he was transported to the hospital where he was pronounced deceased at 6:04am.

Both parents stated that the subject child did not sleep well in his bassinet so they took turns holding the child while they slept. The father stated he regularly slept on the couch with the child and the subject mother acknowledged regularly sleeping with him in a recliner chair. Both parents admitted they were familiar with safe sleep practices but wanted to make the child more comfortable by holding him.

The surviving siblings were observed to be safe throughout the investigation. CCDSS received medical and school records

for the family. All the children were up to date medically. CCDSS provided the family with burial assistance and grief counseling referrals. CCDSS also assisted the subject mother with donating her frozen breast milk and canceling the subject child's upcoming appointments.
