History (not listed above): No

County of Jurisdiction: [redacted]
School/ Daycare: None
Active Military Status: No

Reporter's name/relationship: [redacted]

-Child/Family Identification and Relationship Introduction Paragraph:
[redacted] (2) and [redacted] (3 months) live with their mother, [redacted] (23), and their father, [redacted] (33), in [redacted] County.

-Are you requesting immediate assistance from DCS to your location, or only an immediate phone call?
Yes, Immediate assistance is requested to the residence. The local county DCS office is aware; Case Manager [redacted] is in route.

-Please provide a brief summary of the concerns and why DCS is needed to respond immediately.
At 9:48 AM on 1/11/2022, Law Enforcement was dispatched to the residence regarding [redacted] being unresponsive. Upon arrival, officers observed [redacted] on the floor of the living room receiving CPR from [redacted] is deceased. There were bruises observed on [redacted] head; pictures were taken of these injuries.

[redacted] reported that she had checked on [redacted] at around 9:00 AM at which time she found [redacted] unresponsive while in her electric swing in the living room. Both [redacted] and [redacted] were present; however, neither has been interviewed. Law Enforcement will be providing more details regarding [redacted] death to the DCS Case Manager who is responding to the scene.

At this time, [redacted] and [redacted] are at the residence. Law Enforcement is on scene. There are concerns for environmental neglect but there are no further details.

-Are there any concerns for the safety of a Department of Children's Services Case Manager responding to the child's home?
No

-Anything additional to add to this initial report for the responding worker to know prior to response?
No

CM Notation: No
Screener Notation: No

Team Leader (TL) [redacted] has reviewed and approved this case for closure. All documentation has been completed and all information and decisions have been reviewed. When applicable, all collaborative service providers have been notified. All notifications will be made to Juvenile Court Judge and District Attorney per local protocol. The case was assigned to CPS CM /TL [redacted] This case came to the Departments attention on1/11/2022 with allegations of Abuse Death and Physical Abuse. The alleged child victim is [redacted] deceased, and the alleged perpetrators are [redacted] and [redacted] and Unknown for Abuse Death.

The autopsy was received May 12th, 2022, and the cause of death was classified as Undetermined. The Death team reviewed the autopsy in September 2022, and medical experts stated that the injuries the child had (fractures and bruising) could not have been caused by the CPR that was performed on the infant.

This case was reviewed by [redacted] | Executive Director

Narrative Details

Narrative Type: Original Entry Date/Time: 02/27/2023 07:59 AM Entered By: [redacted]

On January 11th, 2022, the Department of Childrens Services (DCS) received a referral for an allegation of Abuse Death regarding Alleged Child Victim (ACV) [redacted] The alleged perpetrator was reported as unknown. There was not ever an alleged perpetrator identified. This investigation was assigned to Child Protective Service Investigator (CPSI) [redacted] by Lead Investigator (LI) [redacted] This case was worked in conjunction with [redacted] Police Department (PD) Investigator, [redacted] resided in her home with her birth mother, [redacted] birth father, [redacted] and sibling, [redacted] at [redacted] TN [redacted]

On January 11, 2022, Child Protective Services Investigator (CPSI) [redacted] arrived at the residence and first met with Detective [redacted] Police Department PD), who was outside of the home with the mother, [redacted] and the grandmother, [redacted] Ms. [redacted] was not present at the home when the death occurred and stated that she just came over this morning to be a support. Ms. [redacted] stated that [redacted] is with family friends, [redacted] and [redacted]
CPSI [redacted] observed the medical examiners placing the infant in the body bag after the reenactment with the parents. Mr. [redacted] and Ms. [redacted] were both very tearful. CPSI [redacted] met first with the Ms. [redacted] along with Detective [redacted] who did an audio recording of the interview. The Ms. [redacted] stated that last night, the family cooked dinner later, around 8-9 PM and then the whole family went upstairs to the parent's bedroom to eat dinner. She stated that they often eat in their room and it's a large room so they hang out in there a lot. She said that she [redacted] a bottle and that between 10-11PM, after the father placed the baby to sleep in the rock and play downstairs, that she fell asleep. She stated that they checked on [redacted] about 2:00 AM and then they didn't get up until about 9:00 AM and they found [redacted] unresponsive, at which time they called 911. She stated that they didn't have a baby monitor downstairs, but they left their room door open and can easily hear the baby if she cries because it is a small apartment. Ms. [redacted] Stated that [redacted] was born at 5 pounds and currently only weighed 8 pounds at 3 months old. She talked about having lost a baby in 2018, [redacted] who only lived 30 minutes after birth. The hospital told her during that pregnancy that her baby would die because she had heart problems, so they delivered her early.
Ms. [redacted] stated that in October 2021, there was another incident where [redacted] had stopped breathing and

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

they took her to [redacted] ER. The doctor had said to make sure that [redacted] sleeps on her back with no pillows or blankets and they discussed safe sleep. The mother stated that the doctor said it was okay to use the swing (rock and play) occasionally for sleeping but to transition the baby to the pack and play. [redacted] hasn't been sleeping in the pack and play because she rolls over on her face and they were afraid she would stop breathing. CPSI [redacted] observed the rock and play and also the pack and play. The pack and play was piled up with books, pillows and blankets and it was clear this was not being used for sleep.
Ms. [redacted] did complete a drug screen and was negative for all tested substances. She reported that [redacted] had a heart murmur and a hole in her heart. She has been going to [redacted] for genetics, Cardiologist and Pulmonologist. TIES and [redacted] are also currently in the home working with the family. Ms. [redacted] discussed the pump knot/bruise on [redacted] forehead and stated that [redacted] had dropped a toy piggy bank on [redacted] and that caused the pump knot. Ms. [redacted] said this just happened a day or two ago. Per Ms. [redacted] they didn't go to the doctor because the baby seemed fine.

The father, [redacted] was interviewed and was very soft spoken and tearful. He reported that the family had dinner in their bedroom on the previous night. He stated that he thought that Ms. [redacted] had taken the baby downstairs to put her to sleep after giving her the bottle. He said it was about 11 PM when they went to sleep. They had put [redacted] in her bedroom. [redacted] room was observed and she had a crib which had been converted to a bed with one rail off. There was nothing in her bed other than sheets and a pillow. Mr. [redacted] submitted to a urine drug screen and was negative for all tested substances.

CPSI [redacted] observed [redacted] and took a photo. [redacted] was being cared for by family friends, [redacted] and [redacted] was dressed in onesie zip-up pajamas with a jacket over the PJ's. There were no observed marks or bruises. [redacted] is non-verbal and Mr. and Mrs. [redacted] said that she doesn't respond with words and TEIS suspects some hearing issues. They are doing speech/OT/PT with the child. Mrs. [redacted] said that they often babysit when the mother needs a break. Mr. and Mrs. [redacted] expressed that they don't know if there is any drug use but have heard maybe [redacted] ([redacted] Father) may have had been in jail before and the mother mentioned that he has had a history of using drugs in the past. They are not aware of any current drug use by either parent. Mrs. [redacted] said that the mother is a very good mother, she loves and cares for the kids and is the primary person who cares for the kids. She stated that [redacted] and the mother have had an on/off relationship and he has left them before but she doesn't know any details about that.
The Autopsy was received and reviewed and noted that the cause of death is best classified as Undetermined. The autopsy noted that the child was placed in an unsafe sleep environment and that asphyxia cannot be ruled out as a result. The autopsy also noted that [redacted] had multiple cardiac rhabdomyomas in the heart. As a result, the medical examiner noted that death due solely to natural causes cannot be ruled out.

On September 30, 2022, an Immediate Protection Agreement (IPA) was completed with the family, placing [redacted] with family friend, [redacted] due to the finding during autopsy review that [redacted] had healed and healing fractures of the ribs and right Ulna. The parents were both re-interviewed and could not provide any reasonable cause for the fractures. Per the Medical Examiner, these fractures could not be explained by CPR being administered to [redacted] and are the result of abuse. Following a Child and Family Team Meeting (CFTM), no other placements could be identified so [redacted] was placed into DCS custody.

On December 28th 2022, The case was presented to the CPIT Team and all team members agreed with the classification of Allegation Unsubstantiated/Perpetrator Unsubstantiated for the Severe Abuse allegation of Abuse Death. The CPIT Team members all agreed with the classification of Allegation Substantiated/Perpetrator Substantiated for the Severe Abuse allegation of Physical Abuse for [redacted] and [redacted]

Physical Abuse is defined in Work-Aid 1 as: Any non-accidental physical injury or trauma that could cause injury

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

inflicted by a parent, caretaker, relative or any other person who is responsible for the care, supervision or treatment of the child. Physical abuse also includes but not limited to:
a) A parent or caretakers failure to protect a child from another person who perpetrated physical abuse on a child;
b) Injuries, marks and/or bruising that goes beyond temporary redness or is in excess of age appropriate corporal punishment , e.g., a bruise, broken bone, cut, burn;
c) Violent behavior by the parent or caretaker that demonstrates a disregard for the presence of a child and could reasonably result in serious injury (e.g., domestic violence). Striking (hitting, kicking, punching, slapping, etc.) a child in such a way that would result in internal injury. Munchausen by Proxy Syndrome could be considered physical abuse or psychological abuse.
NOTE: Physical abuse should not be confused with developmentally appropriate, discipline-related marks and bruises on the buttocks or legs of children six (6) years of age and older when there are no developmental or physical delays, past history of abuse or recent (within the past year) screened-out reports.
NOTE: In its most severe form, physical abuse is likely to cause serious bodily injury or death.

Child death is defined in Work-Aid 1 as:
-Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.
-Any child death caused by abuse or neglect resulting from the parent or caretakers failure to stop another persons direct action that resulted in the death of the child. Child deaths are always treated as severe child abuse.
-Any child death caused by abuse or neglect resulting from the parent or caretakers to stop another persons direct action that resulted in the death of the child

Based on the information obtained directly or indirectly, there is not preponderance of evidence to support the allegations of Abuse Death. The case will be classified as Allegation Unsubstantiated and Perpetrator Unsubstantiated as to those allegations. There is a preponderance of evidence to support the allegations of Severe Physical Abuse and that allegation is classified as Allegation Substantiated/Perpetrator Substantiated for that Severe Abuse allegation for [redacted] and [redacted]

Narrative Type: Original Entry Date/Time: 01/31/2023 10:32 AM Entered By: [redacted]

Purpose: judicial review
Present: [redacted] (FSW), [redacted] (TL), [redacted] (mom), [redacted] (dad), [redacted] (GAL), [redacted] (DCS attorney), [redacted] (moms attorney), [redacted] (dads attorney), [redacted] worker), [redacted]
The hearing was held in front Magistrate [redacted]
FSW testified that [redacted] entered [redacted] care in Oct 2022 and is currently placed in a level 3 [redacted] home. She is adjusting to the [redacted] home. Occasionally she has behaviors, but [redacted] mom does well with her. She attends [redacted] twice per week for PT, OT, Speech, and feeding therapy. She also has an IEP and attends the [redacted] school two half days per week. She had her dental and physical. At school, they are working on motor skills and preparing her for Kindergarten. She struggles with friends, but otherwise does well.
FSW testified that we have a perm plan with dual goals of reunification and adoption. Mr. [redacted] is asked to address A&D. A&D assessment was completed 1/5 and recommendations are pending. He provided proof of income. Parenting parents have been involved in most of [redacted] appointment. Both parents are participating in visitation. Parenting assessment was scheduled for today, but postponed due to [redacted] being sick. A mental health assessment was completed and results are pending. Parents have housing together. Dad was asked to complete domestic violence and is scheduled to start in February. He is also asked to complete anger management and that has not yet started. FSW has not yet been to the home. She has received a lease for the parents home. Dad and mom share a car. Mom was asked to do a mental health assessment and results are pending. Mom communicates well with DCS. Mom attends appointments with [redacted] Non offender DV classes are scheduled to start. Mom has provided her proof of income. She is planned to do parenting classes this month.
FSW testified that it is unknown if the current [redacted] home is pre-adoptive.
Both parents attended the perm plan CFTM and were in agreement. Both parents provided Criteria for TPR.
Parenting classes are pending. FSW provided resources for parenting for Mr. [redacted] but FSW is helping him get into classes. It is not his fault that he has not started parenting classes.
FSW testified that mom is cooperative, appropriate in visits, and provide supplies for visits. She has either done

The ACV is deceased.

The sibling was observed in her [redacted] home by the FSW [redacted] Exact time not noted:

On this date, TL [redacted] picked up [redacted] at her [redacted] home to transport her to PT, OT, and Speech. [redacted] mom reported that [redacted] did not have much of a nap due to several errands they did that morning. TL noted that [redacted] was appropriate dressed and had a jacket. [redacted] mom also provided TL with a backpack with extra pull ups, snacks, and a drink. TL put [redacted] in her car seat and ensured that she was securely in the straps. TL drove to therapy and walked [redacted] on. The staff all recognized [redacted] and talked to her. TL went with her into the therapy rooms. She moved from one room to another for each type of therapy. [redacted] did well and followed most instructions. During physical therapy there were a few things that she did not like doing and she would fuss, but other than that she cooperated with her therapists and did a good job. The therapists each provided positive feedback on [redacted] progress and behavior and reported that they have noticed an overall improvement she has entered [redacted] care. After therapy was over, TL transported her back to the [redacted] home.

TL staffed the case with CM [redacted] on this date. ME's Office has advised that the fractures noted in the autopsy report are from abuse and could not have been caused by CPR and could not be accidental. The parents were unable to provide any plausible explanation for the fractures but denied any abuse in the home. Due to being unable to determine the cause of the fractures through interview with the parents and the statements by the ME, the sibling, [redacted] was removed from the parent's custody and placed into a Kinship Placement. ME did note that the fractures do not appear to have contributed to the death of the child, however, the cause of death was undetermined. Court hearing is scheduled for 10/25/2022. Due to the additional information received from the ME, PHA will need to be added as an allegation for [redacted] and the case will need to be re-presented to CPIT.

FAST score is No Need/Risk

Classification is Pending

Safety score is Immediate Intervention Not Recommended.

TL received a TC from Medical Examiner [redacted] who stated that she feels that the fractures noted for the ACV are definitely from abuse. ME [redacted] reported that the ACVs rib fractures are "likely" from being squeezed. She reported that the right arm was also broken in two places, one which was fully healed and one which was in the process of healing. ME [redacted] reported that she is unable to tell the cause of the arm breaks due to how far along the healing process was. ME reported that she feels that, due to the child's age there is not any other way for the fractures to have occurred other than abuse.

Child Protective Services Investigator (CPSI) [redacted] was sent by Lead Investigator (LI) [redacted] to meet with the family and do an Immediate Protection Agreement (IPA) because of the results of the Child Death Fatality Review and review with Regional Nurse, [redacted] determination that sibling/ACV, [redacted] death was considered an abuse death by the medical examiner's and the Regional nurse indicated that the fractures the child had could not be caused only by the CPR which was performed on the infant at the time of the incident and at the time the infant had stopped breathing in Oct. 2021.

CPSI [redacted] completed and IPA with the parents and a family friend, [redacted] pending a Child and Family Team Meeting (CFTM) as Ms. [redacted] can only be a temporary placement.

TL staffed the case with CM [redacted] on this date. Autopsy has been received, which stated that "no definitive cause of death could be ascertained". The autopsy notes that unsafe sleep could have been a factor and also that " multiple cardiac rhabdomyomas were identified in the heart". CM advised that the case has been presented to the CPIT team and AUPU was approved as the classification for Abuse Death allegation. Closing summary has been reviewed by CPSD [redacted] and forwarded for final review. Last sibling F2F was 8/17. There s concern at this point due to healed fractures noted on the autopsy report. The autopsy notes healed fractures of the ribs and right ulna as well as contusions on the child's head. It was previously reported that the sibling had dropped a piggy bank on the ACVs head, which could explain the head contusions. The parents have been spoken to about the fractures and reported that the child did receive CPR in October 2021, which could explain rib fractures. The parents denied any knowledge of possible cause of the ulna fracture. Nurse [redacted] has requested the Anthropology report from the ME as it was not received with the autopsy. Nurse [redacted] reports that she will notify when received. Pediatrician records for the sibling have also been obtained and forwarded to Nurse [redacted] for review.

FAST score is No Need/Risk

Classification is Pending

Safety score is Immediate Intervention Not Recommended.

Ms. [redacted] texted CPSI [redacted] that they had not made it home in time for the 4:00 PM home visit. She said they are off [redacted] donation center so [redacted] can donate and get gas money. CPSI [redacted] agreed to come to the [redacted] instead of the home. CPSI [redacted] met outside of the facility with the mother and [redacted] The child was coloring and playing while sitting next to her mom. CPSI [redacted] talked about trying to get a gas card for the soon to assist and the mother was very appreciative. We discussed that services are still in place with [redacted], [redacted] and [redacted]. The mother does not know of any other services the family needs. The father came out of the center after completing the donation and met briefly with CPSI [redacted] He said that they were just short on gas money right now and doing what they could do raise extra money. CPSI [redacted] let him know DCS would look into the possibility of a gas card to relieve their budget.

CPSI [redacted] will contact Ms. [redacted] about the gas card after speaking with the resource linkage coordinator.

The ACV was unable to be seen due to being deceased.

CPSI [redacted] met with Ms. [redacted] ad with [redacted] at her home. The mother was surprised that CPSI [redacted] still had an open case but was fine with CPSI [redacted] observing [redacted] and the home. The child was playing in the living room. The home was a little cluttered but not unclean. There were a lot of toys and household items in the living room area. The child was clean, dressed well, she appeared well cared for. The mother is still receiving in home services with [redacted] as well as [redacted] to try and get her into a preschool for the year. She still attends [redacted] for therapy (PT/OT/Speech). The mother has been attending all well visits and doctors appointments for the child.

Note: ACV is deceased

Child Protective Services Investigator (CPSI) [redacted] arrived at the home and the mother and [redacted] were outside playing in the yard. Ms. [redacted] Supervisor, was also outside doing her visit with the family. CPSI [redacted] asked Ms. [redacted] how the lip surgery went for [redacted] and she showed CPSI [redacted] her mouth and both Ms. [redacted] and Ms. [redacted] stated that now that the cleft lip surgery was done, [redacted] has started to say words. The child is continuing to go to [redacted] for Speech, OT/PT and preschool. The child was observed to be clean, dressed in shorts and a t-shirt and there were no concerns observed. She was running and playing with a riding toy and pulling dandelions to blow and bringing those to her mother. Ms. [redacted] stated that she has been working with the family on storage of anything dangerous and also on organization. The home was messy but not unclean and much more tidy than it was in the past couple of visits. There were no safety concerns observed.

Ms. [redacted] did not identify any other needed services. She stated that she had gone and picked up a copy of the autopsy and felt it left her with more questions than answers. She said that it does provide some type of closure but it's not the answering she was hoping for more details about the actual cause of death. Mr. [redacted] was not at home during the visit as he was at work.

CPSI [redacted] arrived at the home unannounced on a Saturday and the family was not at home. A friend, [redacted] opened the door and said the parents and [redacted] are on vacation. She is housesitting for them. She did not want to provide her last name for the case record. [redacted] called the mother on facetime and let her know DCS was present. Ms. [redacted] was observed holding [redacted] and [redacted] was in the background. Ms. [redacted] stated that they took a vacation to the beach because next week they have to have [redacted] surgery on her cleft lip which they hope will improve her ability to speak. Ms. [redacted] said that she has not yet received the autopsy but would let CPSI [redacted] know if she did receive it. She reported being ready for the DCS case to close but understood the reason DCS is following up. CPSI [redacted] observed the child who was smiling and there were no concerns observed. She was unable to be interviewed due to her speech issues.

TL staffed the case with CM [redacted] on this date. CM advised that records have been received and reviewed by Safety Nurse [redacted] CM will need to note Nurse [redacted] concerns or lack thereof in TFACTS. CM advised that church member supports were interviewed as collaterals and did not note any significant concerns other than that they suspect that the father may use marijuana. Collaterals reported that they babysit regularly and that the mother is "a really good Mom". Mother and father were both drug screened and were negative. CPSI advised that she has talked with both TEIS and [redacted] and neither provider have any concerns. CM will need to maintain contact with the family, ensuring that F2F with siblings is completed monthly until case closure or until waived by TC. Last sibling F2F was 3/31. CM will need to ensure that all steps noted in Admin Review by [redacted] are completed and documented. CM will need to ensure that all documents are uploaded. Autopsy has not yet been received.

Child Protective Services Investigator (CPSI) [redacted] and Detective [redacted], [redacted] Police Department ([redacted]PD) went to do an unannounced follow up visit with the family. The ACV is deceased. [redacted] was at home with both parents and they had all just got up from a nap. The parents said they like to try to nap when she is napping. TEIS and [redacted] is still working in the home and the child goes a couple days a week to the Preschool Program, [redacted], through [redacted]

The home was observed and was a little messy in the living room area. The cat litter needed to be changed and there were some clothes in the floor. The dishes were washed and overall the house was in good condition. The parents were encouraged to continue to make efforts to keep the home more tidy. The parents expressed they are doing well and did not need any additional referrals for services at this time.

The Abuse Death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with Case Manager (CM) [redacted] and Team Leader (TL) [redacted] Also present was Team Coordinator (TC) [redacted], CPS Director (CPSD) [redacted] and Director of Critical Incident Support (DCIS) [redacted].

The CPS investigation was assigned on 1/11/22 concerning the death of ACV [redacted] (3mo). It was reported [redacted] resided with her birth mother [redacted] birth father [redacted] and 2yo sibling [redacted] in [redacted] County.

On 1/11/22 911 was called from the family home after the mother checked on [redacted] and found her unresponsive in her electric baby swing in the living room. The mother was administering CPR when first responders arrived. [redacted] was pronounced deceased at the scene. There were initial concerns of possible bruising to [redacted] head as well environmental concerns in the home.

The Medical Examiner completed scene investigation with law enforcement and CM present. ME preliminary observations was that the death was medically related. It was reported [redacted] had current medical issues including a murmur and hole in her heart and was being seen by cardiologist/specialist for her condition. The parents reported they lost another child in 2018 shortly after birth also due to heart problems. It was additionally reported the 2yo has kidney problems and see a specialist for those needs. No concerns, marks or bruises were noted for the sibling. Neither child was prescribed medication or specialized medical equipment for the home. TEIS and [redacted] are actively involved with the family. The home was cluttered and disorganized, which the family was requested to address; however, CM reported the ENN needs were not an immediate safety risk to the children in the home. The mother reported the family has support through counseling at her church. The parents also reported childcare assistance occasionally through the pastoral team at their church. Autopsy results are pending.

Next Steps:

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted] [redacted]
Case Status:	Close	Organization:	[redacted] Region

-- CM will request current medical records for ACV and sibling, to include birth, PCP, and specialist records. Records will be reviewed and uploaded to TFACTS. Safety Nurse will be consulted as needed.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will complete collateral interviews with church member(s) who has supported the family in the past and with services such as TEIS and [redacted] who are familiar with the family.
-- CM will document and upload autopsy into TFACTS once received.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.

On 01/11/2022 at 10:10 AM [redacted], a referral was called into Child Abuse Hotline. The referral was screened into [redacted] County as a P1 with the allegations of Abuse Death. The alleged child victim is [redacted] age 3 months old. The alleged perpetrator is unknown. Response is due on 01/12/2022 at 10:10 AM [redacted]. The case is assigned to Investigator [redacted] It is Unknown if the children are of Native American Descent.
[redacted] County DCS has an agreement with the Juvenile Courts in which the Reader and/or Lead Investigators will send notification of referrals to Assigned Juvenile Court as per local protocol. The District Attorney will be notified as per local protocol on all Severe Abuse Cases. Notification is made weekly to the Juvenile Court Judge by the Reader and/or Lead Investigator as requested per local protocol.

Summary: [redacted] (2) and [redacted] (3 months) live with their mother, [redacted] (23), and their father, [redacted] (33), in [redacted] County.
At 9:48 AM on 1/11/2022, Law Enforcement was dispatched to the residence regarding [redacted] being unresponsive. Upon arrival, officers observed [redacted] on the floor of the living room receiving CPR from [redacted] is deceased. There were bruises observed on [redacted] head; pictures were taken of these injuries. [redacted] reported that she had checked on [redacted] at around 9:00 AM at which time she found [redacted] unresponsive while in her electric swing in the living room. Both [redacted] and [redacted] were present; however, neither has been interviewed. Law Enforcement will be providing more details regarding [redacted] death to the DCS Case Manager who is responding to the scene. At this time, [redacted] and [redacted] are at the residence. Law Enforcement is on scene. There are concerns for environmental neglect but there are no further details.

Contacted: [redacted] (Deceased/ACV); [redacted] (Sibling/2 year old); [redacted] (Birth Father); [redacted] (Birth Mother)
Location: Family Home @ [redacted] TN [redacted]

Child Protective Services Investigator (CPSI) [redacted] arrived at the residence and first met with Detective [redacted] Police Department ([redacted]PD), who was outside of the home with the mother, [redacted] and the grandmother, [redacted] Ms. [redacted] said that she had raised [redacted] since she was 3 years old and although she was not her birth mother, she is "mom" and grandma to the children, [redacted] and [redacted] She said that she was the custodian of [redacted] but did not adopt her. She was not present at the home when the death occurred and stated that she just came over this morning to be a support.

[redacted] stated that [redacted] is with a family friend, [redacted] and [redacted] at [redacted] Their cell is [redacted]. [redacted] is a Pastoral Assistant at her church and they often babysit [redacted] for them. She did not want her running around right now with all of the people in the home right now investigating. The mother was crying. CPSI [redacted] comforted the mother about the loss of her infant and let her know that we would need to interview when the medical examiner was done with her.

CPSI [redacted] observed the medical examiners placing the infant in the body bag after the reenactment with the parents. Mr. [redacted] and Ms. [redacted] were both very tearful. CPSI [redacted] met first with the mother of the children along with Detective [redacted] who did an audio recording of the interview. The mother stated that last night they had cooked dinner later around 8-9 PM and then the whole family was upstairs in the parent's

bedroom to eat dinner. She stated that they often eat in their room and it's a large room so they hang out in there a lot. She said that she fed the baby a bottle ad that about 10-11, after dad placed the baby to sleep in the rock and play downstairs, that she fell asleep. She stated that they checked on the baby about 2:00 AM and then they didn't get up until about 9:00 AM and they found the baby unresponsive. They called 911. She stated that they didn't have a baby monitor downstairs but they left their room door open and can easily hear the baby if she cries because it is a small apartment. The mother said that the baby was born at 5 pounds and currently only weighed 8 pounds at 3 months old. She talked about having lost a baby in 2018, [redacted] that only lived 30 minutes after birth. The hospital told her during her pregnancy her baby would die because she had heart problems so they delivered her early.

The mother stated that back in October 2021, there was another incident where the baby had stopped breathing and they took her to [redacted] ER. The doctor had said to make sure the baby lays on her back with no pillows or blankets and they discussed safe sleep. The mother stated that the doctor said it was okay to use the swing (rock and play) occasionally for sleeping but to transition the baby to the pack and play. The baby hasn't been sleeping in the pack and play because she rolls over on her face and they are afraid she would stop breathing. CPSI [redacted] observed the rock and play and also the pack and play. The pack and play was piled up with books, pillows and blankets and it was clear this was not being used for sleep.

The home was observed to be piled up with clothing, dirty dishes, and trash that needed to be taken out. The entire home needed to be cleaned. There was not an odor and it appeared they did take out trash but the home needed to be cleaned. CPSI [redacted] discussed this with the mother and let her know that DCS understands that she just had a loss and today would not be a good day to worry about it but when things improve, we can talk further and set goals. She stated that she is letting [redacted] mostly stay with the family friends until they can handle the funeral and then clean the house.

CPSI [redacted] asked the mother if she would be willing to do a drug screen. She submitted to an observed drug screen and was negative for all substances. CPSI [redacted] obtained a list of the children's doctors. She stated that he baby, [redacted] has a heart mumur and hole in her heart. She has been going to [redacted] for genetics, Cardiologist and Pulmonologist. The PCP is [redacted] at [redacted]. She said that [redacted] genetics is [redacted]. [redacted] sees a kidney specialist at [redacted] She said that the children have TEIS and [redacted] In the home. [redacted] is the case manager but she is on leave. Her cell is [redacted]. The children have speech and PT/OT with [redacted] TEIS. [redacted] is standing in right now while [redacted] is on leave. [redacted].

The mother discussed the pump knot/bruise on the infant's forehead and said that [redacted] had dropped a toy piggy bank on her and that caused the pump knot. She said this just happened a day or two ago. They didn't go to the doctor because the baby seemed fine.

CPSI [redacted] then spoke with the father. He was very soft spoken and tearful. He was clearly upset about the loss of the baby. He said that they had dinner as mom had described in their bedroom. He thought that mom had taken the baby downstairs to put her to sleep after giving her the bottle. He said it was about 11 PM when they went to sleep. They had put [redacted] in her bedroom. [redacted] room was observed and she had a crib which had been converted to a bed with one rail off. There was nothing in her bed, just sheets and a pillow. The room was messy.

The father submitted to a urine screen and was negative. He stated that in the past he has used "weed" but that was a few months ago and he had not ever used around the kids. He said he hasn't used any in a long time.

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

CPSI [redacted] asked the parents about the space heaters in the home. They said the heat went out and the landlord for the apartments had the heat fixed and it went out again. They had just called again to have this fixed. The home was warm and the space heaters did not have anything in front of or near them.

CPSI [redacted] met with the Detectives and Medical Examiner. It appears at this time to be a medical cause of death but an autopsy is pending.

CPSI [redacted] discussed the case with Lead Investigator (LI) [redacted] CPSI [redacted] then went to the residence of [redacted] and [redacted] at [redacted]. They were not at home but left a note that they had run to an appt. and to call them. CPSI [redacted] called and they said they would be back in about 10-15 minutes.

1:42 PM CPSI [redacted] observed [redacted] and took a photo. She was dressed in a onsie zip up pajamas with a jacket over the PJ's. There were no observed marks or bruises. The child is non-verbal and the caregivers said that she doesn't respond with words and TEIS suspects some hearing issues. They are doing speech/OT/PT with the child. She said that they often babysit when the mother needs a break. The caregivers expressed that they don't know if there is any drug use but have heard maybe [redacted] ([redacted] Father) may have had been in jail before and the mother mentioned that he has had a history of using drugs in the past. They are not aware of any current drug use by either parent. [redacted] said that the mother is a very good mother, she loves and cares for the kids and is the primary person who cares for the kids. She stated that [redacted] and the mother have had an on/off relationship and he has left them before but she doesn't know any details about that.

3	[redacted]	[redacted]	Abuse Death	Unknown Participant [redacted]		Allegation Unsubstantiated / Perpetrator Unsubstantiated	Yes	[redacted] / 05/18/2022

C. Disposition Decision

Disposition Decision: Assessed and Closed

Comments: On January 11th, 2022, the Department of Children's Services (DCS) received a referral for an allegation of Abuse Death regarding Alleged Child Victim (ACV) [redacted] The alleged perpetrator was reported as unknown. There was not ever an alleged perpetrator identified. This investigation was assigned to Child Protective Service Investigator (CPSI) [redacted] by Lead Investigator (LI) [redacted] This case was worked in conjunction with [redacted] Police Department ([redacted]PD) Investigator, [redacted] Allegations of Severe Physical Abuse were added after the Death Review Team reviewed the autopsy.

There is not a preponderance of evidence to support the allegation of Abuse Death. This case will be closed and classified as Allegation Unsubstantiated, Perpetrator Unsubstantiated for the Abuse Death of [redacted] There is a preponderance of evidence to support the allegation of Severe Physical Abuse.

D. Case Workers

Case Worker: [redacted] Date: 01/06/2023

Team Leader: [redacted] Date: 01/06/2023

E. Investigation Summary

Instruction: Condense the finding rationale for each allegation relative to the child victim(s). Be sure to identify the facts that provided for the classification decision.

Department of Children's Services

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

Case Name : [redacted] **Investigation ID:** [redacted]

Summarize the key points and dates of the child or children's statements and/or the observation of the child or children's physical state or home environment:

The child was deceased at the time of the report. The sibling was two years old, non-verbal due to speech delays, and was unable to be interviewed. The sibling was observed and there were no concerns. The home was very messy upon initial report. [redacted] and TEIS worked with the parents and this environment improved significantly during the life of the case.
Upon receipt of the autopsy and review by the Death team, medical experts stated that the fractures the infant had were too extensive to be caused by the CPR performed on the infant in Oct. 2021. The sibling was removed due to this and placed in [redacted] care after no other appropriate placement resources were located. The child remains in [redacted] care.

Summarize professional, medical or psychological findings or opinions: What is the collateral's oral or written finding/opinion of the incident(s)/allegation(s)?

CPIT reviewed the case on May 18th, 2022 and agreed with the findings that there was not a preponderance of evidence to support the Abuse Death Allegation.

CPIT reviewed the case on December 28th, 2022 and agreed with the findings that there was a preponderance of evidence to support the allegation of Severe Physical Abuse.

Summarize alleged perpetrator's statement or admission: What is the perpetrator's explanation of the incident(s)/allegation(s)?

There was no alleged perpetrator identified as to the allegation of Abuse Death.

The parents were interviewed both by DCS and Law Enforcement, and denied causing any of the fractures to the infant. Their only explanation was that the CPR performed on their baby could have caused the injuries.

Summarize witnesses' descriptions of what they saw and what they believe indicates child abuse/neglect:

There were no witnesses.

The mother stated that back in October 2021, there was another incident where the baby had stopped breathing and they took her to [redacted] ER. The doctor had said to make sure the baby lays on her back with no pillows or blankets and they discussed safe sleep. The mother stated that the doctor said it was okay to use the swing (rock and play) occasionally for sleeping but to transition the baby to the pack and play. The baby hasn't been sleeping in the pack and play because she rolls over on her face and they are afraid she would stop breathing. CPSI [redacted] observed the rock and play and also the pack and play. The pack and play was piled up with books, pillows and blankets and it was clear this was not being used for sleep.

Summarize any other evidence or factors that support the investigative finding(s) for the allegation(s) of abuse/neglect:

The autopsy was received May 12th, 2022 and the cause of death was classified as Undetermined.

The Death team reviewed the autopsy in September 2022, and medical experts stated that the injuries the child had (fractures and bruising) could not have been caused by the CPR that was performed on the infant.
