At the time of the alleged incident, ACV [redacted] resided with the biological father [redacted] and the fathers paramour, [redacted] half-sister, [redacted] (DOB: [redacted]; 1 year old) and Ms. [redacted] children, [redacted] (DOB: [redacted]; 8 years old), and [redacted] (DOB: [redacted]; 10 years old)

The referral alleged that [redacted] was unresponsive and observed by first responders with bruises all over his body. It is unknown how long [redacted] was unresponsive before he was taken to the neighbors home by his biological father, [redacted] A neighbor performed CPR on him for 5 to 6 minutes. During this time paramedics were called. Paramedics also performed CPR. While performing CPR, it was reported food was pulled from [redacted] throat. The bruises observed were on [redacted] back, down his spine, right eyelid, hands, feet, left cheek, and under his eye. [redacted] had old, new, and healing bruises. The bruises were observed to be yellow, black, and purple.

[redacted] was taken to [redacted] Medical Center and then flown to [redacted] Childrens Hospital in [redacted] TN. [redacted] had a very faint heartbeat. Hospital personnel informed law enforcement they also pulled food from [redacted] throat. [redacted] was without a heartbeat for 20 minutes. It is unknown how long [redacted] went without oxygen prior to him going to the neighbor's home.

On October 28, 2022, CM [redacted] talked to Dr. [redacted] Dr. [redacted] reported [redacted] had coded for 45 minutes and had to be intubated at [redacted] County Medical Center and that he was currently still intubated, with a skull fracture, bleeding on the brain (subdural hemorrhages), bruises all over his body, and he tested positive for Amphetamines (which she reported dad stated he was unsure how he could be positive for Amphetamines). Per DCS Policy 14 Protocol:
Physical Abuse
Any non-accidental physical injury or trauma that could cause injury inflicted by a parent, legal custodian, relative or any other person who is responsible for the care, supervision or treatment of the child.
Physical abuse also includes, but is not limited to:
a) A parent or legal custodian/caretakers failure to protect a child from another person who perpetrated physical abuse on a child;
b) Injuries marks and/or bruising that go beyond temporary redness or are in excess of age-appropriate corporal punishment. (e.g., a bruise, broken bone, cut, burn);
c) Violent behavior by the parent or legal custodian/caretaker that demonstrates a disregard for the presence of a child and could reasonably result in serious injury. Striking (hitting, kicking, punching, slapping, etc.) a child in such a way that would result in internal injury. Factitious Disorder Imposed on Another (FDIA), formerly known as Munchausen by Proxy Syndrome could be considered physical abuse, medical neglect or psychological abuse.
Note: Physical abuse should not be confused with developmentally appropriate, discipline-related marks and bruises on the buttocks or legs of children six (6) years of age and older when there are no developmental or physical delays, past history of abuse, or recent (within the past year) screened-out reports.
Note: In its most severe form, physical abuse is likely to cause serious bodily injury or death.

Drug Exposed Child (Severe)
Severe forms of this allegation include, but are not limited to:
♦ The manufacturing of methamphetamine where children are present, or in close proximity.

Tennessee Department of Children's Services

♦ Infants born with a diagnosis of Fetal Alcohol Spectrum Disorder (FASD).
♦ Infants born with a diagnosis of Neo-Natal Abstinence Syndrome (NAS) where the diagnosis is not based on the mothers prescribed and appropriately followed Medication-Assisted Treatment.
♦ Knowingly or with gross negligence allowing a child under eight (8) years of age to ingest an illegal substance or a controlled substance that results in the child testing positive on a drug screen, except as legally prescribed to the child; and/or
♦ Knowingly allowing a child to be within a structure where a Schedule I controlled substance under TCA 39-17-406, cocaine, methamphetamine and/or fentanyl are present and accessible by the child.

Lack of Supervision
Failure to provide adequate supervision, by a parent or other legal custodian/caretaker, who is able to do so. A lack of supervision allegation or determination means that:
a) The child has been placed in a situation that requires actions beyond the childs level of maturity, physical ability, and/or mental ability; or
b) Caregiver inadequately supervises a child. The caregiver is with the child, but is unable or unwilling to supervise (e.g., the caregiver is under the influence of alcohol or drugs, is depressed, sleeps during the day or has inadequate parenting knowledge or skills).
c) Any registered sex offender residing in the home with unrelated minor children or victim of offender and/or caregiver knowingly resides with and/or allows children to be unsupervised with a registered sex offender.

Child Death:
1. Child death is defined as:
a) Any child death caused by abuse or neglect.
b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.
c) Any child death caused by abuse or neglect resulting from the parent or legal custodian/caretaker failure to stop another persons direct action that resulted in the death of the child. Child deaths are always treated as severe abuse.

route. Return of spontaneous circulation was achieved in the emergency department. Physical exam revealed multiple injuries in various stages of healing on his right eye, left cheek, back, buttock, and right leg, concerning for non-accidental trauma. He was transferred via helicopter to [redacted] Childrens Hospital for further management. Imaging revealed a skull fracture and subdural hemorrhage. The Abuse Death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with Case Manager (CM) [redacted] and Team Leader (TL) [redacted] Also present was Team Coordinator (TC) [redacted], CPS Director (CPSD) [redacted], and Director of Critical Incident Support (DCIS) [redacted].

The CPS investigation was assigned on 10/28/22 concerning the death of ACV [redacted] (3yo). It was reported [redacted] resided with his birth father [redacted] the fathers paramour [redacted] and the couples only child together [redacted] 1yo]. The birth mother [redacted] reported she has been unable to locate and have visitation with [redacted] the past couple years due to the father being uncooperative and not disclosing their whereabouts. The mother has three other children in her care [redacted] 5yo, [redacted] 7yo, and [redacted] /9yo]. The fathers paramour has two other children [redacted] 5yo and [redacted] 8yo] who primarily resided with their maternal grandmother [redacted] and a third child who resides in Nebraska with his father.

On 10/28/22 911 was called from the family home sue to [redacted] becoming unresponsive. The father initially stated [redacted] was eating chicken nuggets in his room and choked. The father took [redacted] outside to get help from a neighbor who used to be an EMT. The neighbor attempted to do CPR but [redacted] airway was blocked so she could only do chest compressions. Upon paramedics arrival they were able to clear some food from the airway. [redacted] was transported to the hospital where multiple brain bleeds, multiple skull fractures, and extensive bruising all over his body covering the back to the buttocks. [redacted] also tested positive for amphetamines. [redacted] was not responding to stimuli and brain death testing occurred with death occurring on /1/22. Medical stated [redacted] throat was packed with food and medical opinion is this may have been done purposefully to hide the abuse and make the incident appear accidental.

The mother came to the hospital upon the father informing her he was there and has responded appropriately. LE interviewed the father and paramour. The father admitted to pushing [redacted] and stated [redacted] hit his head. The paramour initially was uncooperative and appeared under the influence. Upon a follow-up interview the paramour admitted she was

present at the home at the time of the incident, and had previous concerns about how the father would discipline [redacted] and scream at him to eat his food. [redacted] had begun drinking his urine and [redacted] was mad about this at the time of the incident. The paramour admitted she has been smoking meth since July 2022 and was caught with it in the care. She stated the father didnt know she was using and admitted to eating meth the day of the incident. Percocet and THC were found in the house, but not meth. The father was charged with aggravated child abuse and the paramour with aggravated child neglect. The neighbors were interviewed by LE and reported they had concerns because they never saw [redacted] outside, but would see the other child and family members. An IPA was completed for the 1yo sibling and the paramours other children. They were placed with a maternal aunt [redacted] with no contact with their mother and [redacted] father.

Region is planning FIs with all of the children of the mother and paramour since they have all been around the father and in his care at different times in the past. There is alleged history when him being aggressive, yelling, and shoving food in their mouths.

Next Steps:
-- CM will request all medical records available for ACV from birth to present. Records will be reviewed and uploaded to TFACTS.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will complete FIs for all of the mothers and paramours children.
-- CM will request hair follicles for the 1yo sibling and the paramours two older children who had recently stayed at the home.
-- CM will document and upload autopsy into TFACTS once received.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.
