Additional info provided by Director [redacted]:
So after all the info has been obtained- right now we have zero info to suspect abuse or neglect on the deceased. We do however have information with concerns for the three surviving siblings, LOS maybe the most appropriate. Concerns reported the kids are sick, have truancy issues and often the oldest has to provide care for the others as mom "won't get out of bed". Including making a bottle and changing diapers. Two kids were previously in custody of a relative who will take all now, if needed.
The parents haven't been able to be reached about releasing the body to a funeral home this weekend- and they may just be upset or with family. There was a report they may go to MGM out of state.
The TC received an email with the specific phone numbers and names of relatives who are concerned about the children.
Since we have no reported concerns for abuse or neglect on the infant- I would suggest screen the death out- but add LOS for all remaining kids with both parents so CPS can assess all reported concerns. Should the autopsy have concerns it could then be screened in.

Note: Per TV Director [redacted], this intake will be assigned as a Child Death.

On April 4, 2024, CM [redacted] contacted Detective [redacted] regarding his response to the family home on March 31, 2023. He reported that he interviewed [redacted] and [redacted] He reported that the Ms. [redacted] brought [redacted] to [redacted] Regional Medical Center. He reported that Detective [redacted] and he interviewed [redacted] Ms. [redacted] reported that she and [redacted] father, were at the home with [redacted] and [redacted] Ms. [redacted] reported that [redacted] had recently been sick. Ms. [redacted] explained that all of the children had been sick since March 28, 2024. Ms. [redacted] reported that she had given [redacted] baby cereal, Pedialyte, and Similac. Ms. [redacted] reported that the last time she fed [redacted] was between midnight and 1:00 am on March 31, 2023, before she was put in a chair in an upstairs bedroom. Ms. [redacted] reported she checked on [redacted] at 7:00am and she appeared to be sleeping. She then woke up between 11:00 am and 12:00 pm she found [redacted] deceased. Ms. [redacted] reported that after finding her daughter, she was trying to cope and was mourning before she took [redacted] to the hospital at approximately 3:00pm on March 31, 2023.

Mr. [redacted] reported that he woke up around the same time as Ms. [redacted] and noticed there was no noise coming from his daughters room and felt something was wrong.

Detective [redacted] went to the family home and took several photographs of the layout of the apartment. During the death investigation at the home, it was discovered that Mr. [redacted] had placed [redacted] in the chair with a blanket just above the chest.

On April 4, 2023, CM [redacted] and CM [redacted] interviewed [redacted] Ms. [redacted] reported that on March 30, 2023, all of the children were sick. Ms. [redacted] reported that she called [redacted] Pediatrics but they did not have an opening see the children. Ms. [redacted] stated that [redacted] was very gassy and fussy. Ms. [redacted] reported that she put [redacted] put to bed at around 12:00 am or 1:00am and she was fed shortly before that. Ms. [redacted] reported that she got up a few times in the night to go the bathroom and checked on [redacted] Ms. [redacted] stated that she got up on March 31, 2023 around 11:00am or 12:00pm and [redacted] was not breathing. She reported that she could not give a clear timeline due to her being upset with the loss of the child. She reported that she did not have custody of her two older children and reported that her mother has custody of them.

Due to inconsistent stories provided by [redacted] Detective [redacted] reinterviewed her on June 26,2024, Ms. [redacted] explained that she was on medication for an abscessed tooth the night before the baby was found deceased. Ms. [redacted] explained that the medication made her sleepy the entire night. Due to the child's father being off work the next day, Ms. [redacted] asked if he would check in on her during the night, because she didn't know how the medication would affect her. The father agreed to watch her. As far as health issues the baby was having at the time, she said she kept spitting up her milk and was having problems defecating. Ms. [redacted] stated the baby also looked sick around her eyes and was sneezing. Ms. [redacted] added that all of her kids were sick or had been sick. When asked about feeding the baby with a bottle, Ms. [redacted] said she would feed her, and the father would feed her other times. Ms. [redacted] said she had also let her 7-year-old child hold her while she fed her, because she thought of herself as the "big sister". Mx. [redacted] said the child's father put the baby to bed the last time. When she got up out of bed once or twice, she felt "loopy" because of the medicine but she noticed the baby was still in the same location she had been placed. During the night, she remembered the father getting out of bed and heard the bedroom door open and closed at least once. Ms. [redacted] could not remember what time it was, but she walked into the baby's room and found the father with her. Ms. [redacted] said he told her the baby was fine and sleeping. Ms. [redacted] noticed she was still sitting in the chair in the same position. The child's father told her he needed to tell her something before both stepped outside to smoke while the other children were inside. Ms. [redacted] said it seemed to take a few minutes for the child's father to come up with the words to tell her. He told her that their child was gone. He

explained to her that he didn't want her to go in later and find her. While he gathered the other children and took them into another room to play, Ms. [redacted] stated she went into the room and took her baby and "broke down". Ms. [redacted] was asked if the father told her what time it was when he found the child deceased and said he did not. Ms. [redacted] was asked if she could think of anything the father could have done better to prevent the death of the baby. After a pause, she replied that he maybe could have checked on her more.

On March 31, 2023, an autopsy was performed on ACV [redacted] by [redacted] DO, Regional Forensic Center, [redacted] TN. The report states that no definitive cause of death could be ascertained. The report also states: [redacted] was reportedly found unresponsive after being placed to sleep in an unsafe sleep environment (infant rocker with blankets and a bottle) which is a known risk factor for an accidental asphyxia event. The anterior pattern of rigor mortis documented in the photographs taken at the hospital by law enforcement are inconsistent with the reproted positioning and suggest a terminal prone position. In addition, the bruising on the right side of the face (in the absence of lethal internal injuries), the differing accounts as to the timeline of events, and the delay in seeking medical attention after the infant was found unresponsive are concerning and a non-natural, non-accidental death cannot be definitively excluded. As such, the cause and manner of death are best classified as undetermined.

On July 24, 2024, CM [redacted] presented the case to the [redacted] Child Protective Investigation Team (CPIT). Those present were: CM [redacted] TL [redacted] Child Advocacy Center [redacted] May, Child Advocacy Center [redacted] Child Advocacy Center [redacted] Child Advocacy Center [redacted] County LE [redacted] District Attorney [redacted] Mental Health [redacted] The team agreed that the case will be classified as Allegation Unsubstantiated, Perpetrator Unsubstantiated regarding ACV [redacted] against APs [redacted] and [redacted]

Per DCS Policy Work Aid 1 Section E:

Child Death is defined as:

a) Any child death caused by abuse or neglect.

b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.

c) Any child death caused by abuse or neglect resulting from the parent or caretakers failure to stop another persons direct action that resulted in the death of the child. Child deaths are always treated as severe abuse.

During the course of the death investigation, an additional allegation of sexual abuse was received by the department on January 9, 2024.The AP was listed as [redacted] The children [redacted] and [redacted] were place temporarily with their Uncle [redacted] On January 11, 2024, [redacted] and [redacted] were placed into the custody of the Department of Childrens Services. Additional allegations of Drug Exposed Child, Environmental Neglect and Psychological Harm were added to the case and the APs were listed as [redacted] and [redacted] All allegations were substantiated against Mr. [redacted] and Ms. [redacted] and the children remain in the custody of the department at this time.

The is not preponderance of evidence to substantiate the allegation of Abuse Death. This case is closed and classified as Allegation Unsubstantiated, Perpetrator Unsubstantiated regarding [redacted] against APs [redacted] and [redacted]

Due to some changes in [redacted] version of what happened the night [redacted] passed away between this case and the case CM [redacted] had with the family in January, Detective [redacted] re-interviewed Ms. [redacted] CPSI received Detective [redacted] following notes via email from that interview that took place on 6/26/2024.

Detective [redacted] spoke with the [redacted] again at the [redacted] Police Department. Ms. [redacted] explained that she was on medication for an abscessed tooth the night before the baby was found deceased. Ms. [redacted] explained that the medication made her sleepy the entire night. Due to the child's father being off work the next day, Ms. [redacted] asked if he would check in on her during the night, because she didn't know how the medication would affect her. The father agreed to watch her.

As far as health issues the baby was having at the time, she said she kept spitting up her milk and was having problems defecating. Ms. [redacted] stated the baby also looked sick around her eyes and was sneezing. Ms. [redacted] added that all of her kids were sick or had been sick.

When asked about feeding the baby with a bottle, Ms. [redacted] said she would feed her, and the father would feed her other times. Ms. [redacted] said she had also let her 7-year-old child hold her while she fed her, because she thought of herself as the "big sister".

Mx. [redacted] said the child's father put the baby to bed the last time. When she got up out of bed once or twice, she felt "loopy" because of the medicine but she noticed the baby was still in the same location she had been placed. During the night, she remembered the father getting out of bed and heard the bedroom door open and closed at least once. Ms. [redacted] could not remember what time it was, but she walked into the baby's room and found the father with her. Ms. [redacted] said he told her the baby was fine and sleeping. Ms. [redacted] noticed she was still sitting in the chair in the same position. The child's father told her he needed to tell her something before both stepped outside to smoke while the other children were inside. Ms. [redacted] said it seemed to take a few minutes for the child's father to come up with the words to tell her. He told her that their child was gone. He explained to her that he didn't want her to go in later and find her.

On 1/12/24 [redacted] and [redacted] were taken into custody after a new referral came into the Department.

Transporting to transitional housing and foster care placement.

CPSI [redacted] and CPSI [redacted] transported [redacted] and [redacted] to transitional housing once the removal was complete. [redacted] and [redacted] were sad at first when leaving the office. Once they arrived at the transitional home, they cheered up. [redacted] was speaking to [redacted] about home. The children were happy once getting settled in but continued to talk about things that have occurred at home with their mommy and daddy. [redacted] spoke about their little sister who passed away last year. She enjoyed pretending she was a mommy with her baby doll and made a carrier out of her jacket for the baby. She also enjoyed doing handstands and gymnastics. [redacted] enjoyed playing a video game and playing with the cars and trucks. [redacted] enjoyed running around and throwing toys. He likes dinosaurs. [redacted] fell asleep after rocking himself back and forth and self-soothing. The children took baths/showers and played with the toys at the transitional house.

CPSI [redacted] and CPSI [redacted] then transported [redacted] and [redacted] to a foster home once placement was found. CPSI's arrived at the foster home with the boys and were welcomed inside. The foster parent (FP) showed the boys their room and they started playing with the toys right away. The boys settled in quickly, finding the toy box with cars, trucks, dinosaurs, etc. There were no safety concerns noted. CPSI [redacted] had the FP sign the appropriate forms and explained that the foster care worker would be in touch with them for the initial CFTM when it's scheduled. They stated they understood.

CPSI [redacted] reviewed a copy of [redacted] Autopsy from Law Enforcement. The autopsy noted after consideration of the medical history, review of available medical records, reported scene investigation, autopsy findings, toxicology report, microbiology testing, and the circumstances surrounding the death, as currently understood, no definitive cause of death could be ascertained. [redacted] was reportedly found unresponsive after being placed to sleep in an unsafe sleep environment (infant rocker with blankets and a bottle) which is a known risk factor for an accidental asphyxia event. The anterior pattern of livor mortis documented in the photographs taken at the hospital by law enforcement are inconsistent with the reported positioning and suggest a terminal prone position. In addition, the bruising on the right side of the face (in the absence of lethal internal injuries), the differing accounts as to the timeline of events, and the delay in seeking medical attention after the infant was found unresponsive are concerning and a non-natural, non-accidental death cannot be definitively excluded. As such, the cause and manner of death are best classified as undetermined. Should additional information arise, the cause and manner of death may be re-evaluated.

The Abuse Death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with Case Manager (CM) [redacted] Team Leader (TL) [redacted] Also present was Team Coordinator (TC) [redacted] CPS Deputy Director (CPSDD) [redacted], and Director of Critical Incident Support (DCIS) [redacted]

The CPS investigation was assigned on 4/4/23 concerning the death of ACV [redacted] (1mo). It was reported [redacted] resided with her birth mother [redacted] birth father [redacted] and three siblings [redacted] 3yo, [redacted] 6yo, and [redacted] 7yo] in [redacted] County.

It was reported at 3pm on 3/31/23 [redacted] was brought to [redacted] Regional ER by the mother by private vehicle and was determined to be deceased upon arrival. The mother reported the children had all been sick with a stomach bug the last few days, starting with the 7yo sibling on 3/28/23, but that [redacted] was only having diarrhea. The mother reported contacting the PCP to get an appointment for all four children but the PCP could not accommodate them all and an appointment was made for two on 3/31/23. The mother reported feeding [redacted] between 12am-1am on 3/31/23 and the father then placing her in her room to sleep. He reportedly placed her in a car seat type of carrier to sleep on her back with a blanket pulled up to her chest. The mother reported waking around 4am and used the bathroom, and at that time checked on [redacted] and heard her breathing. The mother stated she wok next at 7am and checked on the baby. She was still sleeping at that time. The mother stated she and the father got up around 12pm and she checked on [redacted] and found her unresponsive and not breathing, with the father coming into the room a short time later. The delay between when the parents found [redacted] not breathing to when she was brought to the ER was explained by the mother that she was in shock and knew it was too late. CM plans to follow-up with the parents and LE around the timeline.

Additional information was reported to DCS over the weekend with concerns regarding supervision in the home, and specifically that the 7yo sibling was often having to tend to [redacted] while the mother was staying in the bed. Following the death incident, the oldest two siblings have been staying with uncles. These two siblings are also reported to be in the legal custody of the maternal grandmother since 2018, but this is still being confirmed. There were concerns with the mothers living arrangements in the past and the grandmother petitioned and was awarded custody. The children have been staying with the mother since the beginning of the school year. The maternal grandmother and maternal great grandmother both

report concerns about supervision in the home and the children not going to school. CM spoke with the school who reported while they have missed more days than is preferred, all absences have had sick notes or reasons and the children were not considered truant at this time. CM spoke to the PCP who reported no current concerns with the children and verified that the mother had tried to make an appointment for all four children. All of the siblings were present in the home at the time of the incident. CM has observed the 3yo child in the mothers care with no concerns. CM has not had the opportunity to meet with or interview the oldest two children, who had been with their uncles. The uncles took the 6yo sibling to the ER after the death incident because during bath time the childs penis was noted to be swollen. The ER determined there was yeast infection present and cream and oral antibiotics were both prescribed. The child had follow-up with the PCP today who agreed with the findings.

At this time no charges are pending with LE. Autopsy results are pending. [redacted] did not have any injuries. LE had no notes of concerns with the home in their reports, including no evidence of drug use; however, the mother has not allowed CM into the home reporting she wants to clean it first. The funeral is today and CM is planning to follow-up with the family first of next week. Grief counsleing has been discussed with the mother. The father has not made himself available to interview at this time and the mother reported he does not always stay in the home overnight, but does see the children daily. He is the father of [redacted] and the 3yo sibling only.

Next Steps:
-- CM will request current ACVs birth and PCP records. Records will be reviewed and uploaded to TFACTS. Siblings records from medical clearance will also be requested an uploaded.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will request forensic interviews for the oldest two siblings once legal guardian is confirmed.
-- CM will complete home visit and ensure no ENN concerns.
-- CM will complete interview maternal grandmother, confirm custody of siblings, and request copy of custody paperwork.
-- CM will complete interviews with all individuals who expressed concerns for the children.
-- CM will complete background checks on both parents.
-- CM will inquire information on father(s) of the oldest siblings and contact if applicable.
-- CM will request school records/collaterals to confirm no truancy issues/or other concerns.
-- CM will document and upload autopsy into TFACTS once received.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.

Summary: This case came to the attention of the Department on 3/5/08 with allegation of physical abuse. It was alleged that Mr. [redacted] 'shakes' a sibling in the home. Upon further investigation, it was determined that there is a lack of evidence to support the allegations. No child in the home disclosed physical abuse, although one child has been spanked on the bottom, with a hand, during tantrums. The family no longer uses this. Further there were a number of 'allegations' which did not meet critieria (Mr. [redacted] is a sex offender, the children are left with 'random people' the children are afraid of Mr. [redacted] and they are always hungry. Due to Mr. [redacted] history with DCS as a juvenile (victim) the complete record was reviewed. Mr. [redacted] did receive services as a juvenile and successfully completed the program. After inquiring with the referrent, it appears this family may have more referrals, due to 'rumored' history. Mr. [redacted] and Ms. [redacted] along with all children were interview.

Current:

On March 31, 2023, a CPS referral was received as a priority one (P1). The allegation listed was abuse death; however, the case was not initially screened in. After being reviewed by RID [redacted], the case was screened back in, this occurred on April 04, 2023. The case was assigned to [redacted] as P1 case. The alleged child victim (ACV) was listed as [redacted] (deceased). The alleged perpetrators (APs) are listed as [redacted] (Birthmother) and [redacted] (birthfather). The report alleges the following:

[redacted] had brought [redacted] to [redacted] Regional Center via her car. [redacted] was already deceased when she was brought in. CPR had been tried on [redacted] but she was already gone. [redacted] said that [redacted] and the other kids had been sick with diarrhea and throwing up. [redacted] said that [redacted] was only having diarrhea. [redacted] said she last fed [redacted] around midnight last night on 3-31-23. [redacted] was put to bed around midnight or 1 am by [redacted] (he had put her in bed on her back with a blanket slightly above her chest). [redacted] said that she had checked on her twice. [redacted] said at 4 am she had gotten up to use the bathroom and she heard [redacted] breathing. [redacted] looked in at 7 am again and [redacted] was still sleeping. The last time she was seen alive was 7 am. [redacted] did not walk over to [redacted] [redacted] had not fed [redacted] all night after midnight because [redacted] had been sick. [redacted] and [redacted] had woken up between 11 am to 12 pm later. They noticed there was no noise coming from the room [redacted] was sleeping in [redacted]

[redacted] said that [redacted] was already gone. [redacted] was found in a car seat type bed. [redacted] was on her back found in the same way as when she was put to bed. [redacted] had been clingy and had not felt good. The police have pictures of the apartment and of [redacted] was found. There will be an autopsy done tomorrow. [redacted] did not have any injuries. The medical examiners are [redacted] and [redacted] The time of death is unclear. It is unknown if the parents have a criminal history. The parents are upset and are in shock. [redacted] had misplaced her keys at the hospital, and she also had a flat tire when she got out of the hospital. [redacted] has still found her keys. [redacted] is in the morgue at [redacted] Regional. [redacted] was brought back home by the police. It is unknown if there is any foul play at this time. The police took report number [redacted] and [redacted] is the detective on the case. There were no other concerns at home. There was no sign of drugs.

CM [redacted] assisted CM [redacted] to the family home due to it being CM [redacted] first child death case.

TL [redacted] provided CMs with the child death checklist.

CM [redacted] attempted to speak with the referent, but there was no answer.

CM [redacted] also attempted to speak with the assigned detective, but there was no answer.

CM [redacted] and CM [redacted] responded to the home residence. The birthmother/AP, [redacted] reported the two older children were not home and with their uncle. Ms. [redacted] stated she does not have legal custody of them, but she reports they have been residing with her, and she has been providing care. CMs' attempted to obtain a timeline, but Ms. [redacted] was too distraught to gain a full understanding of the incident and a timeline. Ms. [redacted] reported the funeral is tomorrow and was observed by the CMs' to not be in a good emotional state as observed by the breaking down and crying throughout the interview. Ms. [redacted] did not allow CM [redacted] and CM [redacted] into the home, reporting it was a mess right now. CMs were able to observe [redacted] (3) inside the home, and they reported he seemed well, and did not see any indication of abuse or neglect. Ms. [redacted] was hesitated to continue speaking with CMs and allowing CMs to interview siblings. CMs reported they did not observe any signs of drug abuse, but that Ms. [redacted] admitted to smoking marijuana (THC). CMs reported they did speak to Ms. [redacted] about grief counseling and stated she was interested. CMs reported that Ms. [redacted] stated before going through the timeline of events she would like an attorney present due to having already gone through the event so many times with so many different people already.

CM [redacted] CM [redacted] and TL [redacted] completed a conference call with RID [redacted]. The CMs provided a summary of the investigation tasks. CMs reported they would like to give Ms. [redacted] some time to process and try talking to her again after the funeral on Monday. CMs reported no immediate safety concerns and stated from what they read, LE had no initial concerns. CMs stated most of the history is from the mother, Ms. [redacted] as a minor. TL [redacted] inquired about the mentioned concerns of truancy. CM [redacted] reported CM did confirm the children being enrolled in school, but stated CM has not had a chance to review attendance record, but both CMs stated all the children had been sick. RID [redacted] inquired about Ms. [redacted] not having custody of the two older children, and CMs reported Ms. [redacted] told them she was a "dumb teenager" and did not know any better when her mother (maternal grandmother) said it would be best if she had custody. Ms. [redacted] stated she never failed a drug screen or anything like, according to what the CMs were told. CMs stated Ms. [redacted] said her mother (maternal grandmother) filed a private petition in [redacted] county where she obtained legal custody.

Due to there not being any immediate concerns noted, RID [redacted] agreed for CMs to talk to the mother, Ms. [redacted] again on Monday.

E. Investigation Summary

Instruction: Condense the finding rationale for each allegation relative to the child victim(s). Be sure to identify the facts that provided for the classification decision.

Summarize the key points and dates of the child or children's statements and/or the observation of the child or children's physical state or home environment:

Photos of the home from Law Enforcement following [redacted] death showed the home to be cluttered and in need of some house cleaning, and that there was food in the home.

. [redacted] reported that she is 7 years old and in the 1st grade. [redacted] stated that she lives with her mommy [redacted] daddy [redacted] and two little brothers [redacted] and [redacted] stated that she likes to have family time at home, which consists of coloring, playing Monopoly, and hanging out. [redacted] reported that she and her brothers had stayed with Uncle [redacted] for the last three nights and she likes it there because they get to climb trees. [redacted] reported that Uncle [redacted] lives in a trailer and it's Mimi's old house. [redacted] also mentioned Juju who is her God Aunt, whom they stay with sometimes. [redacted] reported that they don't stay with Nana anymore because she has family issues and is living with a lot of people now. [redacted] stated that she makes her brothers cereal and can make frozen Salisbury steak in the microwave for them. [redacted] stated that her mom works for Door Dash but has not been working lately, since her sissy's funeral. [redacted] reported that she used to be able to feed her baby sissy and that she would get her out of bed during the night and bring her to mom and dad when she would cry. [redacted] stated that daddy is only allowed to visit so he does not live with them all the time. [redacted] stated that the word safe means to keep things locked. [redacted] reported that she feels safe everywhere and no one makes her feel unsafe. [redacted] stated that her other daddy, [redacted] is not safe because he goes to jail for fighting.

[redacted] stated that he likes school. [redacted] reported that he has been living with Uncle [redacted] for a few nights. When he's not at Uncle [redacted] house, [redacted] reported that he lives with his mommy, daddy, baby sissy that passed away, [redacted] who is 3 years old, and [redacted] who is 7 years old. [redacted] stated that [redacted] hit him with a club on his face. CM observed a red mark on the left side of his nose. [redacted] stated that the word safe means to always look where you're going. [redacted] reported that he feels safe at home, school, and with Uncle [redacted] [redacted] stated that no one makes him feel unsafe. [redacted] stated that when he is staying with Uncle [redacted] they like to climb trees, and when he is with mommy, he likes to stay inside and watch the Red and Blue Fighting movie. When asked about his baby sissy, [redacted] reported that mommy would give him a bottle and he would get to hold and feed her. [redacted] reported that baby sissy farted on [redacted] and threw up on mommy, but never on him. [redacted] reported that he turns on the TV for his little brother, [redacted] when mommy and daddy are asleep, and then he goes to sleep.

[redacted] was to young to be interviewed, but was observed to be a very active child and was observed to have no marks brusies or abrasions.

Summarize professional, medical or psychological findings or opinions: What is the collateral's oral or written finding/opinion of the incident(s)/allegation(s)?

Detective [redacted] Detective [redacted] Mr. [redacted] and Ms. [redacted] went to the family home and took several photographs of the layout of the apartment were taken by Detective [redacted] Mr. [redacted] placed a doll in the chair [redacted] had been sleeping in, and was show both the position she was placed in and the last known position she was alive in. for an accidental asphyxia event. The anterior pattern of livor mortis documented in the photographs taken at the hospital by law enforcement are inconsistent with the reported positioning and suggest a terminal prone position. In addition, the bruising on the right side of the face (in the absence of lethal internal injuries), the differing accounts as to the timeline of events, and the delay in seeking medical attention after the infant was found unresponsive are concerning and a non-natural, non-accidental death cannot be definitively excluded. As such, the cause and manner of death are best classified as undetermined. Should additional information arise, the cause and manner of death may be re-evaluated.
