On June 21, 2024, an autopsy was completed on [redacted] by Dr. [redacted] County Medical Examiner, [redacted] TN. Autopsy stated, The reported trauma of hitting the head on the door is not consistent with the injuries of bleeding and swelling of the brain. These injuries are the result of inflicted head injury rather than an accidental bump against an object. The cause of death is inflicted head injury, and the manner of death is homicide.

On 8/9/24 [redacted] was in the care of the father at the familys home. The mother was at work as a schoolteacher and the 1yo sibling was in daycare. The father called the mother at work and reported [redacted] began choking during a bottle feeding and blood was coming from his nose. During the call [redacted] reportedly began to turn blue and the mother told the father to take the baby to the hospital. En route to the hospital the father was still on the phone with the mother and he noted [redacted] became unresponsive. The mother told him to hang up and call 911. The father called 911 and EMS met the father at his location. [redacted] was transported to [redacted] and then med-flighted to [redacted] Childrens Hospital for specialized care. [redacted] was placed on a ventilator in critical condition. The medical team has reported [redacted] injuries include subdural hematoma, retinal hemorrhages, and blood in the spinal cord, all suspicious for non-accidental trauma. The prognosis is very poor with the decision to remove medical care likely being made on 8/15/24.

The father reported he was feeding [redacted] when he began to cough and choke. He patted [redacted] on the back and then noted blood coming from his nose. The father also reported during this time he accidentally bumped [redacted] head into a door after which he became fussy. The father also reported an incident in July in which he went outside to mow the lawn and left [redacted] inside with the window open so he could hear him cry. The father reported he heard [redacted] cry while mowing, went inside to tend him, and in the process tripped over the baby swing and [redacted] fell into a couch and bumped the area above his left eye leaving a minor bruise. The mother was aware of this incident and no medical attention was sought at the time as they did not feel it was warranted. Additionally, there was an incident involving the sibling as an infant when the family resided in Kentucky. The sibling was in the care of the father and received injuries including a torn frenulum and facial bruising. Military CID was involved in the investigations and the father was ordered to complete services through FAP which included a parenting plan, behavioral assessment, and anger management. Both the mother and father acknowledge past incidents of the father becoming frustrated and over stimulated while caring for the children. The mother reported she has recommended the father take a break and step away when he became frustrated.

CM [redacted] contacted Mrs. [redacted] via text message to reschedule a home walkthrough. (CM had scheduled the home walk through due to Mrs. [redacted] requesting that at the next court date, it be discussed to allow [redacted] to have supervised visits in her home so that he can start getting used to it again. CM agreed to do a home walkthrough so that the team could consider this option).

Mrs. [redacted] replied " That's fine. Is he still able to come to my house on Thanksgiving?"

CM replied: "No ma'am. That is not something that has been approved."
"The purpose for your home walk-through taking place is so we could potentially ask in court next time for supervised visits to take place in your home on occasion."

Mrs. [redacted] replied: "My lawyer is saying something completely different."

CM replied: "If she has questions, she can reach back out to the GAL and DCS attorney. That is not something I nor my supervisors have authorized."

CM [redacted] arrived at the Caretaker home located at [redacted] TN [redacted] on 11.14.24 at approximately 4:30pm for a monthly face to face with ACV [redacted]
CM was welcomed into the home by [redacted] and invited into the living room where CM observed [redacted] to be present on the couch with [redacted]

[redacted] was observed to be clean, appropriately dressed, and free of visible marks or bruises. Due to the age of the child, CM is unable to interview but observed [redacted] to be well adjusted and very well bonded to his mother, [redacted] and caretaker, [redacted] played in the living room with toys, chased the cats, and had a snack of whales while CM was present in the home.

CM engaged with Ms. [redacted] regarding how [redacted] is doing. Ms. [redacted] reported that [redacted] is doing well, but that he was sick over the weekend. Ms. [redacted] reported that she and Ms. [redacted] took him to the doctor because he also had a diaper rash.
Ms. [redacted] and Ms. [redacted] reported how smart [redacted] is and how fast he is growing up and further stated they feel that the new daycare ([redacted] Center) has been great for him and he has been learning so much being there. Ms. [redacted] reported that [redacted] is half way through learning the alphabet.

CM asked Ms. [redacted] what her plans are for the holidays. Ms. [redacted] reported that they will be doing her family and her husband's family each. Ms. [redacted] reported that she has told [redacted] that she is very welcome in the homes and is welcome to come with them and would not be intruding.
CM asked Ms. [redacted] if she plans to attend as well.
Ms. [redacted] reported that she and her attorney both feel that it was decided in court that CM [redacted] DCS has the ability to allow any kind of visitation that is seen fit and that her attorney would be reaching out to CM.

CM stated that is fine and that the attorney could contact CM any time. CM reminded Ms. [redacted] the process of

increasing visitation and how it is to happen incrementally. CM reported that this is on purpose and in effort to protect the parents throughout the investigative process. CM stated that as long as classes continue to be worked/completed and therapy continues, that we will look at adjustments or additional visitation with each court date, but that is always something that we present in front of the judge.

Ms. [redacted] asked CM if [redacted] could be enrolled in therapy. CM explained unsureness due to his age but reported that it would be looked into as an option.
Ms. [redacted] and Ms. [redacted] reported they are interested in this option due to [redacted] experiencing "big emotions" and outbursts that they feel are abnormal for a child his age. Ms. [redacted] stated that [redacted] has been through a lot and she is confident that it is likely due to that, but they want to ensure that [redacted] is receiving the care that he needs.

CM engaged with Ms. [redacted] regarding the processes with Mr. [redacted] and if things have been cordial through their attorneys.
Ms. [redacted] reported that Mr. [redacted] is following the protective order and has not reached out to her except through their attorneys and stated that she has only seen Mr. [redacted] at court. Ms. [redacted] reported that they are in the midst of negotiations regarding the divorce and the most recent contract stated that Mr. [redacted] wanted what was described as "all the fun times" such as weekends, holidays, and school breaks. Ms. [redacted] reported that her attorney told her that he would not be getting all of that, but it is his attorney's job to ask for "more" before receiving less.

Ms. [redacted] and Ms. [redacted] asked CM if there were any updates in the case or thoughts about how it would conclude/when it would be finished.
CM reminded the ladies that at this point in the case we are waiting for the autopsy to come back and a decision from law enforcement on how they intend to proceed for their cases. CM explained that it could still be an additional 4-6 months before we know for sure and encouraged them to continue to communicate with CM and be cooperative with the investigations.

Ms. [redacted] asked CM if at a next change in visitation, if it would be possible to allow [redacted] to be back in the home with [redacted] present for him to get use to the home, his bed and room, and their animals again. CM encouraged Ms. [redacted] to schedule a walk through at the home so that CM could see it and that CM would ask DCS supervisors after the fact if that would be an option.
Ms. [redacted] reported that her address is [redacted] off of [redacted].

CM engaged with Ms. [redacted] and Ms. [redacted] regarding [redacted] mom, Ms. [redacted] The ladies both reported that they are both still on the same page regarding restricting Ms. [redacted] until she gets help due to her erratic behaviors. Ms. [redacted] stated that she is still uncomfortable with Ms. [redacted] in her home or around her due to how Ms. [redacted] has spoken about her and been treating her.

Ms. [redacted] and Ms. [redacted] requested an additional person be approved as a babysitter and asked if it would be okay for visits/time together to spent at that home.
CM got the names of the individuals and notified them that CM would ask a supervisor and get back with them about the question.

Ms. [redacted] and Ms. [redacted] reported feeling defeated and frustrated by the investigation process and how they are ready for things to conclude and Mr. [redacted] to go to jail.
CM encouraged Ms. [redacted] and stated that it is seen how hard she is working her services, working in therapy, and working on herself and encouraged Ms. [redacted] to keep doing what she's doing because her work has not gone unnoticed. CM encouraged Ms. [redacted] about how hard she has been working to be a safe space for [redacted] and be a support to her friend and that she is doing a great job.

TL [redacted] CM [redacted] and CM [redacted] met with Mr. [redacted] Mrs. [redacted] and Mrs. [redacted] at the DCS office on 8/19/24 at approximately 12:00pm. Mr. [redacted] and his NCO, [redacted] were present via telephone call.

TL [redacted] began the conversation by reviewing the previous history and conversation that took place on Friday, 8.16.24 due to Mrs. [redacted] reporting to CM [redacted] via phone over the weekend that she needed clarification on why there were restrictions put in place for her.
Mrs. [redacted] was very resistant to the conversation, as well as her mother, Mrs. [redacted] who became very frustrated throughout the meeting. TL [redacted] informed the family that when we begin the conversation regarding what the meeting today is for, we will need to call in Mr. [redacted] as he is also a parent and has rights in the decision-making process.
Mr. [redacted] became angry and stated, Im going to choke that motherfucker. TL [redacted] encouraged Mr. [redacted] that if he could not remain calm and able to have a conversation, that he would need to step out of the meeting for the duration. Mr. [redacted] stated that he would wait for the women outside and was escorted out by TL [redacted]

CM [redacted] called Mr. [redacted] at approximately 12:45pm to include Mr. [redacted] and his NCOIC SGT [redacted] in the topic for the CFTM.
TL [redacted] engaged with the family regarding the incident that happened with Mrs. [redacted] and Mr. [redacted] family over the weekend.
Mrs. [redacted] reported that she was arrested for vehicular theft. Mrs. [redacted] reported that [redacted] family was trying to bait her and that she was simply there to get [redacted] shoes for the funeral. Mrs. [redacted] stated that when she arrived there were a lot of people in the home and she thought they were having a party. Mrs. [redacted] reported that when she went inside to get the shoes, [redacted] shoe rack was half empty and she became upset. Mrs. [redacted] reported that all parties

got into emotional conversations with each other. Mrs. [redacted] reported that [redacted] father is retired police and that she believes the situation was a set up by [redacted] family. Mrs. [redacted] reported that she was attacked by [redacted] family and showed bruising on her arms stating it was from the attack. Mrs. [redacted] reporting that she is counter suing the family for assault, but that she was the only person arrested and it was for vehicular theft.

TL [redacted] engaged with the parties stating that due to the altercation that occurred and the case being for concerns of physical abuse, that it is no longer appropriate for [redacted] to remain in the care of Mr. and Mrs. [redacted]

Mrs. [redacted] offered her friend, [redacted] and her husband [redacted] as an alternate placement option.
Mr. [redacted] stated that he had no objections regarding a change in placement and would sign in approval for the new placement location.

CM [redacted] explained the process of the new IPA and the process that the [redacted] family would need to agree to. All parties reported understanding and stated they were in agreement and would comply with the new Immediate Protection Agreement. CM [redacted] witnessed confirmation regarding the [redacted] willingness to take [redacted] in and their willingness to comply to thorough background checks and stated they would make themselves available to comply with a home walkthrough at the end of the work day.

On this day it was observed that the opinion of Mrs. [redacted] and her family was more directly against Mr. [redacted] in their statements that he is a murderer, they will be getting divorced, and placing fault on Mr. [redacted]
CM [redacted] inquired with Mrs. [redacted] if she received new information or if there was anything that created this change in her thinking.
Mrs. [redacted] replied stating that this is the grieving process and I am now in the angry phase.
CM stated that was understandable and CM just had to ask since Mrs. [redacted] felt that Mr. [redacted] was innocent on Friday during the last conversation.

Mrs. [redacted] agreed to go gather her belongings and stated that she would move into her mother and fathers house today in order for [redacted] to live in the [redacted] home.
CM [redacted] thanked the family for their time and escorted them out of the building.

CM [redacted] completed a home walk through at the end of the day at the [redacted] home located at [redacted] TN.
CM observed no safety hazards or concerns inside or outside of the home. The home was observed to be clean, plenty of food, working water and electric utilities, and space for [redacted] and all of his belongings.
CM [redacted] went over the IPA restrictions and set up a visitation schedule that [redacted] and [redacted] all were willing to agree to. CM [redacted] explained that if there was a violation of this agreement that there would be serious repercussions, and all parties stated understanding.

The preliminary near death (PND) investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with the following staff: Case Manager (CM) [redacted] Team Leader (TL) [redacted] CPS Director (CPSD) [redacted], and Director of Critical Incident Support (DCIS) [redacted].

The CPS investigation was assigned in TFACTS on 8/9/24 concerning allegations of Lack of Supervision (PND) for ACV [redacted] (1mo). It was reported [redacted] resided with his birth mother [redacted] birth father [redacted] and sibling [redacted] 1yo] in [redacted] County. This father is active military.

On 8/9/24 [redacted] was in the care of the father at the familys home. The mother was at work as a schoolteacher and the 1yo sibling was in daycare. The father called the mother at work and reported [redacted] began choking during a bottle feeding and blood was coming from his nose. During the call [redacted] reportedly began to turn blue and the mother told the father to take the baby to the hospital. En route to the hospital the father was still on the phone with the mother and he noted [redacted] became unresponsive. The mother told him to hang up and call 911. The father called 911 and EMS met the father at his location. [redacted] was transported to [redacted] and then med-flighted to [redacted] Childrens Hospital for specialized care. [redacted] was placed on a ventilator in critical condition. The medical team has reported [redacted] injuries include subdural hematoma, retinal hemorrhages, and blood in the spinal cord, all suspicious for non-accidental trauma. The prognosis is very poor with the decision to remove medical care likely being made on 8/15/24.

The father reported he was feeding [redacted] when he began to cough and choke. He patted [redacted] on the back and then noted blood coming from his nose. The father also reported during this time he accidentally bumped [redacted] head into a door after which he became fussy. The father also reported an incident in July in which he went outside to mow the lawn and left [redacted] inside with the window open so he could hear him cry. The father reported he heard [redacted] cry while mowing, went inside to tend him, and in the process tripped over the baby swing and [redacted] fell into a couch and bumped the area above his left eye leaving a minor bruise. The mother was aware of this incident and no medical attention was sought at the time as they did not feel it was warranted. Additionally, there was an incident involving the sibling as an infant when the family resided in Kentucky. The sibling was in the care of the father and received injuries including a torn frenulum and facial bruising. Military CID was involved in the investigations and the father was ordered to complete services through

FAP which included a parenting plan, behavioral assessment, and anger management. Both the mother and father acknowledge past incidents of the father becoming frustrated and over stimulated while caring for the children. The mother reported she has recommended the father take a break and step away when he became frustrated.

CID is investigating the current incident, and a military protective order has been issued for the father between he and the mother and children. Additionally, DCS has initiated a safety plan for no contact between the father and children. There are currently no restrictions between the mother and children, but the case is being restaffed with legal as information and evidence continues to be processed. The mother and sibling are currently residing with the grandparents as the family home is being processed as a crime scene by CID. Medical clearance/skeletal exam is being scheduled for the sibling as well as parenting and DV assessments for the mother.

Next Steps:
-- CM and TL will restaff case with legal regarding any restrictions needed between the mother and children.
-- CM will ensure medical clearance for sibling is completed ASAP.
-- CM will request ACVs birth, PCP, and current incident medical records; sibling PCP records. Records will be reviewed and uploaded to TFACTS.
-- CM will request all interviews and information/evidence collected by LE/CID within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will setup parenting and DV assessment appointments for the mother.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.
