# Child Fatality Report Release of Information to the Public

**Person ID:** 111550665

**County of Child's Residence:** FRIO

**Gender:** Female

**Age:** 0 Year(s) 10 Month(s)

**Date of Death:** 06/12/2024

On the date of the fatality, the child was not in DFPS conservatorship and was living with the child's parent, a managing conservator, a legal guardian or other person entititled to the child's possession.

---

**Child's Name:** Gonzales,Nylah

**Current Report(s) of Abuse/Neglect:**

**Intake Date(s):** 06/06/2024, 06/06/2024, 06/06/2024 - three reports merged into single investigation

**Summary of Allegation(s)/Investigation:**

The Department received three reports regarding the deceased child who was brought to the hospital. The child presented with multiple bruises in varying stages of healing, and the child's mother's explanation that the child had fallen off the bed was inconsistent with the observed injuries.

The Department's investigation determined that the mother had left the child in the care of her paramour while she dined at a restaurant with one of the paramour's daughters. During this time, the child became unresponsive. The mother reported the child was uninjured and showed no distress when she left for dinner. Upon her return, she found the child with significant injuries and bruising. The paramour initially prohibited the mother from seeking medical care and instructed her to conceal his involvement. He has a history of violent behavior. Earlier that day, the child had been in the care of the mother's boss, who confirmed the child was uninjured and displayed no concerning behavior while at her home. A physical examination of the deceased child revealed bruising to both ears, the lower face, the left shoulder, the upper arm, across the chest and abdomen, and a possible bruise on the back. The child also had superficial healing abrasions on her neck and both lower legs. Law enforcement discovered a scale and traces of marijuana within the child's reach in the home. At the time the incident, two out of three children of the paramours were in the home, but they did not sustain any injuries.

The Department consulted child abuse medical professionals with the Forensic Assessment Center Network which concluded substantial evidence of physical child abuse.

The medical examiner conducted an autopsy; however, final results were pending when the Department's investigation closed. Preliminary findings indicated a contact injury, including an abrasion and contusion, on the right side of the child's head. The injuries were deemed acute and not consistent with a fall from a bed.

Law enforcement conducted an investigation, and the mother's paramour was charged with injury to a child with intent to cause serious bodily injury or death.

**Investigation Findings:**

The Department confirmed the mother's paramour committed physical abuse against the deceased child, which led to her death.

The Department was unable to determine if the mother and her paramour committed neglectful supervision of the deceased child.

The Department administratively closed the neglectful supervision allegations involving the paramour's three children as they were being addressed in another investigation under their biological mother's name.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 06/10/2024: Safety Assessment - Initial: Safe with plan
2.) 06/14/2024: Safety Assessment - Reassessment: Unsafe

Risk Assessment Final Risk Level: Very High

**Case Action:**

Removal/Subcare

**Services and Referrals Provided to the Family:**

Counseling and Evaluation,Parent/Caregiver Training

**Other Services:**

The mother agreed to services and referrals offered as part of the legal case.

**Other Actions Taken to Mitigate Risk:**

Two of the deceased child's older siblings were initially sent to the maternal grandfather's home while the 8-year-old sibling remained in the maternal grandmother's home where she has been residing since infancy. The Department then sought and was granted Temporary Managing Conservatorship of the three surviving siblings who were all placed with the maternal grandmother. The paramour's children remained in the care of their biological mothers and the paramour will be completing services through a Family-Based Safety Services case.

**If one or more children were previously removed from the home, for each conservatorship episode, summarize dates of conservatorship and type of placement at the end of conservatorship:**

Not applicable.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 04/11/2018, 4/12/2018 - two reports merged into a single investigation

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the biological children of the paramour in the fatality investigation so will be referred to as father.

The Department received two reports with concerns the father was hitting the mother on a daily basis around the children and that the 4-year-old had also been slapped by her mother and was seen with a bruise on her face.

The Department's investigation determined that the family was currently involved with Family-Based Safety Services. The family was staying with the paternal grandmother temporarily due to the water not working in their home and she reported no concerns but agreed to be a safety monitor. The paternal uncle also lived in the home and had no concerns. Forensic interviews were completed on the verbal children. One of the children reported her father would show her photos of people who were naked. The father denied all allegations but stated he had photos of naked women on his phone and the mother saw them and got mad. He believed the child probably overheard this. The mother claimed the father was always watching videos with half naked girls while the child sat next to him. The children were seen and no concerns for four of the children, but the 4-year-old did have what appeared to be a handprint on her face. The mother claimed the 3-year-old had hit her older sibling. A child abuse pediatrician was consulted and indicated it was unlikely that a 3-year-old caused the mark.

**Investigation Findings:**

The Department confirmed an unknown individual committed physical abuse of the 4-year-old child.

The Department was unable to determine if the mother committed physical abuse of the 4-year-old child.

The Department was unable to determine if the mother committed neglectful supervision of the 4-year-old child.

The Department did not confirm the father committed neglect supervision of the 4-year-old child.

The Department did not confirm the mother or father committed neglectful supervision of the 3-year-old child.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 04/12/2018: Safety Assessment - Initial: Safe

Risk Assessment Final Risk Level: Very High

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

No additional services provided as the family was already involved in Family-Based Safety Services.

**Other Actions Taken to Mitigate Risk:**

This investigation was closed as the family was still actively involved in a Family-Based Safety Services case that opened on 01/19/2018. The family was receiving family, individual and group counseling, drug and alcohol abuse testing or treatment and parenting skills. The father was also referred to domestic violence counseling.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 05/24/2018

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the biological children of the paramour in the fatality investigation so he will be referred to as father.

The Department received a report with concerns that the 4-year-old child stated her mother was upset with her and pushed her into the bathtub leaving bruising to her lower back hip area and another bruise as well. A few months ago, the child made an outcry of physical abuse against the father as he had slapped her and left red marks on her face. It was also reported there was domestic violence in the home.

The Department's investigation determined that the family was currently involved with Family-Based Safety Services. The 4-year-old was forensically interviewed and stated she fell in the shower. Child abuse pediatrician was consulted and indicated the marks could be accidental. Family members on both sides expressed no concerns. The maternal aunt and paternal grandmother agreed to be safety monitors and would check on the family during the week. A bruise was noticed on the mother's left cheek, but she advised she lost her balance playing superman with the kids.

**Investigation Findings:**

The Department did not confirm the mother or father committed physical abuse of the 4-year-old child.

The Department did not confirm the mother or father committed neglectful supervision of any of the five children in the home.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 05/25/2018: Safety Assessment - Initial: Safe

Risk Assessment Final Risk Level: Very High

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

None as the family was actively involved in a Family-Based Safety Services case.

**Other Actions Taken to Mitigate Risk:**

A family team meeting was held and the maternal aunt and the paternal grandmother agreed to visit the home five times a week. Family-Based Safety Services was going to refer the mother and father to couples counseling and also provide daycare assistance.

This investigation was closed as the family was still actively involved in a Family-Based Safety Services case that was opened on 01/19/2018.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 09/23/2019

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the biological children of the paramour in the fatality investigation so he will be referred to as father.

The Department received a report with concerns that after returning from her father's home the 4-year-old child said her back was hurting because her father hit her when she didn't want to put her shoes on, and she had bruising. The 6-year-old child also said the father hit her as well and had a minor bruise. The father has not been physical with them in the past. The 4-year-old child was taken to the hospital and the doctor said everything was fine.

The Department's investigation determined the children's mother was filing a restraining order against the father and communicated with him through an aunt. The children were forensically interviewed and had conflicting stories. Per mother, one of the children said it hurt her 'down there' however the child was diagnosed with a urinary tract infection. The father denied the allegations and there was no bruising observed on the children. The mother and children resided with relatives who were a support and protective of the children.

**Investigation Findings:**

The Department did not confirm the father committed physical abuse of his children.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 09/23/2019: Safety Assessment - Initial: Safe
2.) 10/18/2019: Safety Assessment - Reassessment: Safe
3.) 11/01/2019: Safety Assessment - Reassessment: Safe
4.) 11/21/2019: Safety Assessment - Case Closure: Safe

Risk Assessment Final Risk Level: High

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

The mother agreed to services provided by the Department through a Family-Based Safety Services case.

**Other Actions Taken to Mitigate Risk:**

The Family-Based Safety Services case was opened on 11/22/2019. During this case, the father refused to complete services. A court order to participate was recommended if new reports for domestic violence was received to ensure the father participated. The mother tried to initiate services, but the provider was nonresponsive, and the mother preferred to use her family support for guidance. The mother was not involved with the children's father and resided, along with the children, with family. The Family-Based Safety Services case was closed on 02/11/2020.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 02/09/2020

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the paramour in the fatality investigation and the children of his youngest child's mother so will be referred to as paramour as his son was not born yet.

The Department received a report stating the paramour assaulted the children's mother in the vehicle while was driving and crashed into a guardrail. The paramour left scene, leaving the mother and her two children behind. The mother sustained injuries, and it was reported the paramour has a long history of being violent in relationships.

The Department's investigation determined the paramour did not want to interview and advised he was at his lawyer's office and hung up. The mother reported she did not remember much about the incident other than they crashed and she thought the paramour punched her. She had a protective order in place and reported she was no longer having contact with the paramour. Collaterals reported no concerns regarding the mother or the children in her care and relatives were supportive to the mother and saw the family frequently.

**Investigation Findings:**

The Department confirmed the paramour committed neglectful supervision of the children.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 02/12/2020: Safety Assessment - Initial: Safe

Risk Assessment Final Risk Level: Moderate

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

The mother accepted referrals provided to her.

**Other Actions Taken to Mitigate Risk:**

Not applicable.

The investigation was closed.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 04/27/2020

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the paramour in the fatality investigation and the children of his youngest child's mother so will be referred to as paramour as his son was not born yet.

The Department received a report with concerns that the children were picked up by an aunt from their mothers with observable bruising that law enforcement felt looked like bruising from a hand. The report also stated the 4-year-old child stated her mother's paramour caused the bruising and had also touched her private parts.

The Department's investigation determined that the 4-year-old was seen with bruising and stated the paramour did it during a forensic interview. This child also stated the paramour touched her 'cookie' but could not provide further details. Both children were seen with bruising and examined by child abuse physicians who indicated pattern of bruising for the 4-year-old was concerning for physical abuse and forceful grabs and the pattern of bruising for the 3-year-old was concerning for physical abuse and multiple forceful impacts. The mother admitted to domestic violence with the paramour and was pregnant with his child. The mother denied knowing how her children got the bruising.

**Investigation Findings:**

The Department confirmed the mother committed neglectful supervision of her children.

The Department confirmed the paramour committed physical abuse of the mother's children.

The Department did not confirm an unknown individual committed physical abuse to the oldest child as it was found the paramour was responsible.

The Department did not confirm the paramour committed sexual abuse of the 3-year-old child.

The Department was unable to determine if the paramour committed sexual abuse of the 4-year-old child.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 04/27/2020: Safety Assessment - Initial: Safe with plan

Risk Assessment Final Risk Level: High

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

The mother and father agreed to accept services offered by the Department through Family-Based Safety Services.

**Other Actions Taken to Mitigate Risk:**

A Safety Plan was completed in which the two children would reside with their biological father, and he would ensure their safety. The case was transferred to Family-Based Safety Services on 6/5/2020. During this case, the mother gave birth to the paramour's son. The mother participated in counseling which included parenting, domestic violence intervention, and addressing her protective capacities. The paramour did not participate in any services indicating he had no contact with his child and only saw photos on social media. The Family-Based Safety Services case was closed on 01/04/2021. At case closure, the two older children resided with their biological father and the paramour's son resided with the mother and an aunt and uncle.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 09/04/2023

**Summary of Previous Allegation(s)/Investigation:**

The Department received a report after law enforcement conducted a welfare check and found the deceased child's mother with substantial bruising on her arm and both of her eyes. She claimed one of the children head butted her and then said the deceased child's father had assaulted her the previous day. The mother claimed the children were not home; however, the grandmother said they were. The father left the home. There is a history of domestic violence, and the mother has not always contacted law enforcement.

The Department's investigation determined that the deceased child and her two older siblings were with the paternal grandmother at the time of the assault. The father was not residing with the mother but had come to the home to visit and became angry when he found the mother had been texting another man. The mother and children had already moved in with the maternal great grandmother when the Department made contact. The children were observed with no concerns noted. The father was unable to be located however did have active warrants pending. The mother was participating in services with the Department and was compliant with those services.

**Investigation Findings:**

The Department did not confirm the father committed neglectful supervision of the deceased child and her two older siblings.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 09/05/2023: Safety Assessment - Initial: Safe with plan
2.) 10/06/2023: Safety Assessment - Case Closure: Safe

Risk Assessment Final Risk Level: High

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

No services or referrals provided as the family was already working services with Family-Based Safety Services.

**Other Actions Taken to Mitigate Risk:**

A Safety Plan was initiated in which the mother and children would reside with the grandmother where they could be safe.

The investigation was closed, and the Family-Based Safety Services case remained open.

## Previous Report of Abuse/Neglect:

**Intake Date(s):** 03/26/2024

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the biological children of the paramour in the fatality investigation so he will be referred to as father. The deceased child's mother is his paramour in this case and will be referred as such.

The Department received concerns regarding the father being on social media and drinking alcohol in front of his children and his paramour's children. The father was also said to be using cocaine in the home around the children the paramour was also drinking around the children.

The Department's investigation determined the children were interviewed and made no outcries of drugs or alcohol by their father or his paramour upon initial contact. The father denied using although admitted to drug use four years previously. He was never observed to be under the influence and did not drug test for the Department. After the fatal incident occurred with the deceased child, marijuana was located at the home during a search warrant however it was unknown if he was ever under the influence when caring for the children, who were 10, 9, and 3.

**Investigation Findings:**

The Department was unable to determine if the father committed neglectful supervision to his three biological children.

**Safety and Risk Assessment Factors Identified:**

Structured Decision Making Safety Assessments:
1.) 03/27/2024: Safety Assessment - Initial: Safe
2.) 06/06/2024: Safety Assessment - Reassessment: Safe with plan

Risk Assessment Final Risk Level: Moderate

**Case Action:**

**Services and Referrals Provided to the Family:**

**Other Services:**

The father agreed to participate in services provided by the Department.

**Other Actions Taken to Mitigate Risk:**

After the fatal incident occurred, a Safety Plan was initiated in which the father's children went to reside with their biological mother's. Any contact between the father and his children would be supervised by the maternal grandmother.

The case was transferred to Family-Based Safety Services on 07/02/2024. The father was drug tested and continued to test positive for cocaine. He participated in several anger management classes but only one parenting class. He was arrested on 12/03/2024 but released on bond within 24 hours of his arrest. His bond conditions included him to not have any contact with any victims, victims' family, or witnesses unless authorized by the court which included his children. The Family-Based Safety Services case closed on 12/23/2024 with the father not making progress or being compliant in services, however the children were safe in the primary care of their mothers.

## Other Previous Report of Abuse/Neglect:

**Intake Date(s):** 06/13/2015, 07/16/2015 - two reports merged into single investigation

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the relatives of the paramour in the fatality investigation so he will be referred to as the cousin.

The Department received a report stating law enforcement conducted a traffic stop and knew the vehicle pulled out of a home known to sell narcotics. Methamphetamines were found in the mother and stepfather's vehicle and there were children present. A second report was received regarding the mother and some of her children who were now residing with relatives, to include their cousin. This report stated the mother was recently arrested for marijuana and that the cousin was giving the 15-year-old in the home marijuana.

The Department's investigation determined after the initial report that the children were residing with their father as the mother had been arrested. After the second report that had concerns for the cousin, it was determined that the cousin was nineteen and living with his parents and had no caregiving responsibilities in the home. The cousin denied the allegations and none of the children in the home made any outcries of abuse or neglect.

**Investigation Findings:**

The Department did not confirm the cousin committed physical abuse of the youngest child in the home.

The Department was unable to determine if the mother committed neglectful supervision of her children.

The Department did not confirm the stepfather committed neglectful supervision of the children.

**Safety and Risk Assessment Factors Identified:**

Risk Assessment: 06/18/2015: Safety Assessment - Initial: Safe
08/05/2015: Safety Assessment - Reassessment: Safe
Risk Assessment Risk Finding: Factors Controlled

**Case Action:**

Closed

**Services and Referrals Provided to the Family:**

The family agreed to accept referrals offered to assist one of the children with educational programs.

**Other Services:**

Not applicable.

**Other Actions Taken to Mitigate Risk:**

Not applicable.

## Other Previous Report of Abuse/Neglect:

**Intake Date(s):** 2/28/2023

**Summary of Previous Allegation(s)/Investigation:**

The Department received a report regarding the deceased child's father getting into a violent altercation with the paternal great grandmother and paternal aunt. The deceased child's sibling was said not to be present at the time.

The Department's investigation determined the child in the home was not present or injured during the altercation and the deceased child's mother was not involved.

**Investigation Findings:**

The Department did not confirm the mother or father committed neglectful supervision of the deceased child's sibling.

**Safety and Risk Assessment Factors Identified:**

Risk Assessment: 03/03/2023: Safety Assessment - Initial: Safe
05/02/2023: Safety Assessment - Reassessment: Safe
Risk Assessment Final Risk Level: High

**Case Action:**

Opened to Family-Based Safety Services

**Services and Referrals Provided to the Family:**

The mother agreed to accept services offered by the Department through Family-Based Safety Services.

**Other Services:**

Not applicable.

**Other Actions Taken to Mitigate Risk:**

The Family-Based Safety Services case was opened on 05/12/2023. The mother completed parenting and counseling services and moved in with her family for support after a new report was received on 09/24/2023 when the deceased child's father assaulted the mother. During this case, the deceased child was born on 07/28/2023 at 34 weeks and was in the Neonatal Intensive Care Unit (ICU) for a month before going home. On 10/12/2023, the mother reported the child was in the ICU due to Respiratory Syncytial Virus (RSV), had coded and was on a ventilator. While in the ICU, the child's IV infiltrated, burning her foot and surgery was required as well as a skin graph. The child was still in the hospital at the closing visit but was set to go home the same week. The case closed on 11/27/2023.

## Other Previous Report of Abuse/Neglect:

**Intake Date(s):** 08/07/2017

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the biological children of the paramour in the fatality investigation so he will be referred to as father.

The Department received a report with concerns that while at housing, the mother left her 3-month-old child in the lobby unattended for 20 seconds while she went into an office to sign a paper. The 4-year-old child was seen with bruising to her legs and said it was from her father. The mother of the children said the 4-year-old was lying but admitted to the child moving in order to get away from her father.

The Department's investigation determined the 4-year-old was unable to be fully interviewed due to her inability to stay focused, but she did say she fell at the park which the mother and a relative confirmed. The child was observed and had no marks. Video was observed and the mother did step into an office to sign paperwork but her 3-month-old was within line of sight. The mother of the children reported she and the father had a 50/50 court order of all four children. She noted the bruising on the child was from the park. The parents had been in a relationship for 8 years. Collaterals had no concerns for the children; however, a Law Enforcement report was obtained indicating the father had a recent assault against the mother.

**Investigation Findings:**

The Department did not confirm the father committed physical abuse of the 4-year-old.

The Department did not confirm the mother committed neglectful supervision of the 3-month-old.

**Safety and Risk Assessment Factors Identified:**

Risk Assessment: 08/07/2017: Safety Assessment - Initial: Safe
Risk Assessment Final Risk Level: Moderate

**Case Action:**

Closed

**Services and Referrals Provided to the Family:**

The mother and father agreed to services and referrals provided.

**Other Services:**

Not applicable.

**Other Actions Taken to Mitigate Risk:**

Not applicable.

## Other Previous Report of Abuse/Neglect:

**Intake Date(s):** 11/05/2017

**Summary of Previous Allegation(s)/Investigation:**

This report is regarding the biological children of the paramour in the fatality investigation so he will be referred to as father.

The Department received a report concerning four children stating law enforcement was called to the home for a domestic violence incident between their mother and father. The parents had been arguing for the past two days. The mother claimed the father assaulted her however the father claimed he grabbed the mother because she had a knife to her chest, and he was trying to get it. The mother admitted she was trying to scare him.

The Department's investigation determined that the mother reported she caught the father texting another girl. She took a knife and put it to her throat to scare him. He kept insulting her and told her to kill herself. The father hit the mother in the head and caused her to fall and then the father kicked her. She indicated the children were present during the incident. The father did not speak to the specifics of the incident but admitted that what he did was wrong and was willing to complete services.

**Investigation Findings:**

The Department confirmed the father committed neglectful supervision of his three children.

The Department determined the mother had no role and initial concerns of neglectful supervision of the children by her were removed.

**Safety and Risk Assessment Factors Identified:**

Risk Assessment: 11/06/2017: Safety Assessment - Initial: Safe with plan
Risk Assessment Final Risk Level: High

**Case Action:**

Opened to Family-Based Safety Services

**Services and Referrals Provided to the Family:**

The family agreed to accept services provided by the Department.

**Other Services:**

Not applicable.

**Other Actions Taken to Mitigate Risk:**

A safety plan was put in place during the investigation in which the parent's would be supervised by an aunt. The family was referred to Family-Based Safety Services on 01/19/2018. During this case, the maternal aunt would visit the home daily and was a support to the family. The mother attended counseling and parent training. The mother and father completed drug testing and were negative throughout the case. Early Childhood Intervention assessed the children under the age of 3. The father did not really participate in services due to getting a job in the oilfield however the family was able to discuss how they were handling disagreements to ensure they did not escalate and were aware how their behaviors impacting the children. The Family-Based Safety Services case was closed on 10/18/2018.

## Other Previous Report of Abuse/Neglect:

**Intake Date(s):** 03/26/2024

**Summary of Previous Allegation(s)/Investigation:**

The Department received concerns regarding the deceased child's mother's paramour being on social media drinking alcohol in front of the mother's children. The paramour was also said to be using cocaine in the home around the children to include the paramour's own biological children and that the mother was also drinking around the children.

The Department's investigation determined that the mother denied the allegations and stated she does not drink and has not seen the paramour use drugs or drink around her children or his own. She denied ever using illegal drugs but does take medication for anxiety. The mother completed a drug test which returned negative for all substances. The mother and children were living with the maternal great grandmother, and she denied leaving her children alone with her paramour. She felt this was retaliation as her paramour used to be involved with a friend of hers and has text messages from this friend threatening her. The deceased child and the two siblings

that resided in the home were observed but the mother did not allow any interviews at the time as she needed to leave to run errands. The home was observed with no concerns noted. The paramour's children were interviewed and made no outcries of drugs or alcohol by the mother or their father, the mother's paramour. Collaterals for the mother had no concerns for her or the children.

**Investigation Findings:**

Not applicable as this was an alternative response investigation.

**Safety and Risk Assessment Factors Identified:**

Risk Assessment: 03/29/2024: Safety Assessment - Initial: Safe
Risk Assessment Final Risk Level: Moderate

**Case Action:**

Closed

**Services and Referrals Provided to the Family:**

There were no services or referrals provided.

**Other Services:**

Not applicable.

**Other Actions Taken to Mitigate Risk:**

A Family Team Meeting was offered but the mother declined.

Note: This report was prepared on 05/12/2026 and does not include corrections or updates, if any, that may be subsequently made to DFPS data on or after the date this report was prepared.
