Allegations

Alleged Victim	Age	Allegation	Severe ? / CSEM ?	Alleged Perpetrator	Relationship to Alleged Victim
[redacted]	2 Yrs 11 Mos	Physical Abuse	Yes /	Unknown Participant [redacted] Unknown	

Referent(s)

Referent Name: [redacted]

Role to Alleged Victim(s): [redacted]

Referent Address:

Referent Phone Number: [redacted]

Type of Contact: I-3 Phone

Notification: None

Narrative: County of Jurisdiction: [redacted]
School/ Daycare: Unknown
Active Military: Unknown

Reporter's Name/Relationship: [redacted]

-Child/Family Identification and Relationship Introduction Paragraph:
[redacted] 3mos) resides with his father [redacted] (28) and mother [redacted] (19) in [redacted] County.

-Are you requesting immediate assistance from DCS to your location, or only an immediate phone call?
Immediate assistance is needed at [redacted] Tn, [redacted] The location is the [redacted] Children's Hospital.

Tennessee Department of Children's Services
Tennessee Child Abuse Hotline Summary

-Please provide a brief summary of the concerns and why DCS is needed to respond immediately.
[redacted] nurse has concern for his safety. [redacted] arrived at the hospital on 9/12/2022 in a full cardiac arrest. [redacted] also has a subdural bleed. The subdural bleeding is internal bleeding. [redacted] also has unexplained head injuries. It is unknown where the head injuries are located on [redacted] There are concerns of who is protective over [redacted] in his home. [redacted] and [redacted] did not have a reason for the state that [redacted] was in when he arrived at the hospital on 9/12/2022. [redacted] brought [redacted] to the hospital in a private vehicle herself. [redacted] is currently stable at the hospital; he is expected to survive.

-Are there any concerns for the safety of a Department of Children's Services Case Manager responding to the child's home?
Unknown

-Anything additional to add to this initial report for the responding worker to know prior to response?
None

CM Notation: No
Screener Notation: No

Emailed/Paged CPSI On Call: Email sent to [redacted] Region CPS Notification group. Received by [redacted].

Per SDM: Investigation P1. CM3 [redacted] on 9/12/2022 @ 4:00 PM [redacted]

Extended Intake Narrative:
Given the length of time the child received CPR, the findings on the brain scans and physical examination indicates that the child has a poor prognosis. Ultimately the child will likely progress into brain death. However, given poor prognosis, parents have elected to withdraw care rather than wait for examination to confirm death by neurological criteria. At this time, the child has not received an examination for death by neurological criteria.

Even if the parents did not elect to withdraw care, the status of the child would not change. The referent did not want to make a new report of concerns and the parents are withdrawing care as of now. Referent stated that the social worker may contact DCS to make a new report on 9/14.

CM who took the Ext. Intake, Date AND Time: [redacted] cm2 9/13/2022 @ 9:18pm

Emailed: [redacted]

[redacted] County On call was paged due to the parents wanting to withdraw care.

Administrative Review for Case Closure

This investigation was submitted to Team Coordinator (TC) [redacted] for review for case closure. The Alleged Child Victim (ACV) is [redacted] and the Alleged Perpetrators are [redacted] putative birth father, and [redacted] birth mother. The allegations of Abuse Death and Physical Abuse were investigated by Child Protective Service Investigator (CPSI) [redacted]

The autopsy results were received and revealed the cause of death is Multiple Blunt Force Injuries and the Manner of Death is Homicide. The family was offered grief counseling. Follow up visits were made with the family. The mother does not have any other children. This case has been reviewed by Regional Director [redacted] and Executive Director [redacted] and approval for closure has been granted.

The allegations of Abuse Death and Physical Abuse are classified as Allegation Substantiated Perpetrator Substantiated regarding the mother and the father and is classified as Allegation Unsubstantiated Perpetrator Unsubstantiated regarding the Unknown Perpetrator. A closing FAST was completed resulting in Immediate Intervention Recommended and Moderate Need/Risk. The case was presented to the Child Protective Investigative Team (CPIT) and the CPIT Partners and the ADA (Assistant District Attorney) agreed with the classification decision. The referent notification has been made through the CARAT System. The 740 has been completed, uploaded in TFACTS, and will be forwarded to the Juvenile Court Judge and the District Attorney for classification. The Autopsy, Medical Records, and other required forms have been uploaded.

TC [redacted] has reviewed the case file and is approving the investigation for closure.

Children Concerning

Participant(s)

Narrative Details

Narrative Type: Original Entry Date/Time: 03/25/2025 08:36 AM Entered By: [redacted]

On September 12, 2022, the Department of Childrens Services (DCS) received a referral for the allegation of Physical Abuse regarding Alleged Child Victim (ACV) [redacted] (3 months). The Alleged Perpetrators (AP) are listed as an Unknown Participant, Mother, [redacted] and Father, [redacted]

On September 16, 2022, the allegation of Abuse Death was added for Alleged Child Victim (ACV), [redacted] The Alleged Perpetrator (AP) is listed as Unknown. This investigation was assigned to Child Protective Services Investigator (CPSI) [redacted] by Lead Investigator (LI) [redacted] This case was worked in conjunction with The [redacted] Police Department ([redacted]PD).
[redacted] (3 months) lives at home with his birth mother, [redacted] and his birth father, [redacted]

On September 12, 2022, [redacted] was transported to [redacted] Hospital, and he arrived in full cardiac arrest. [redacted] had a subdural bleed and unexplained head injuries. [redacted] and [redacted] did not have an explanation for the state [redacted] was in. The findings on the brain scans and physical examination indicated a poor prognosis. [redacted] will likely progress into brain death, and his parents have elected to withdraw care, rather than wait for a death confirmation.

On September 12, 2022, Nurse [redacted] stated [redacted] suffered bilateral rib fractures, a grade 4 liver laceration, a pubic bone fracture, a subdural hematoma, an anoxic brain injury, blood in his chest, blood in his liver, and a fractured pelvis.

Birth Mother, Ms. [redacted] was interviewed and she stated woke up at about 10 or 11 am. [redacted] was given a bath. Ms. [redacted] got him ready and fed him. She was waiting on Mr. [redacted] to get out of the shower. Ms. [redacted] heard [redacted] crying. Ms. [redacted] asked the father what he did to her baby, and he asked why she would accuse him. [redacted] stopped crying once she picked him up. Mr. [redacted] patted [redacted] on his back, and he was attempting to catch his breath. Milk was coming out of [redacted] nose and mouth, and he did not have a heartbeat. They began CPR, and it was conducted until the ambulance arrived. The only people who watch the baby are Ms. [redacted] and Mr. [redacted] The parents noticed a bruise on his chest last month, but they thought it was from his car seat. Ms. [redacted] called [redacted] and the doctor told her if the bruise did not turn blue, the child was okay. The bruise went away, in about 2 days. Ms. [redacted] did not know anything about her child having bruises. The father has a good attitude towards the baby. He has never disciplined the baby, and

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

neither has Ms. [redacted] Ms. [redacted] and Mr. [redacted] were fighting in August, and Mr. [redacted] pushed Ms. [redacted] backwards. Ms. [redacted] fell on the baby for a of couple seconds. They have fought twice.

Dr. [redacted] of [redacted] Hospital, stated [redacted] had multiple bodily injuries. The child had a hematoma and an anoxic injury. Dr. [redacted] did not expect a significant recovery. The child was on a ventilator, and he was critically sick. Dr. [redacted] expected [redacted] to die or have severe long-lasting injuries.

On September 13, 2022, Dr. [redacted] stated [redacted] was having seizures, overnight. He would be receiving his first brain death exam. She did not know if the baby could withstand a CT scan or an MRI.
Maternal Grandmother, [redacted] confirmed that her daughter and grandson were at her home, Sunday. Ms. [redacted] was not aware of the injuries that her grandson had. She stated that her daughter, Ms. [redacted] and Mr. [redacted] have never been abusive or did anything to harm the child. Ms. [redacted] has never kept the child, alone. She stated that when she visited the child, Ms. [redacted] would bring the child to her home, or she would go to their house.

Regional Nurse [redacted] stated that grade 4 liver lacerations were very severe, and they usually come from car accidents or severe blunt force trauma. [redacted] had severe injuries, and the injury to his head possibly caused oxygen to not get to his brain. The child had active bleeding, which caused blood on his brain. The pubic bone fracture and pelvic bone fractures are not common in immobile children. With the rib fractures, it depends on where the fractures are. If the CPR was done correctly, fractures would not be on both sides.

Birth Father, [redacted] was interviewed and he stated he woke up at 8 am Monday morning, and his shower was taken at 10 am. [redacted] was with his mother, doing their morning routine. [redacted] was fed after his bath. While the morning routine was taking place, Mr. [redacted] was in the shower. When he got out the shower, [redacted] was in the crib, asleep. Mr. [redacted] and Ms. [redacted] then traded places, and she went to take her shower. Mr. [redacted] began to lotion his body. Something told him to look at [redacted] and [redacted] appeared to be gasping for air. He told Ms. [redacted] to come look, as she was getting out the shower. They both looked at the baby, and Mr. [redacted] picked him up. He laid [redacted] on his back. Mr. [redacted] did not hear a heartbeat. He then blew in the babys mouth, and milk was coming out of [redacted] nose and mouth. They then called 911. They were instructed on how to give CPR. In August, Mr. [redacted] and Ms. [redacted] had a petty argument. Ms. [redacted] was pushed, and she fell on the baby, but she hopped right up. The child would grunt when he would move. They told the doctor about the grunting, last week. He was around when Ms. [redacted] called [redacted] about the bruise that they figured was from [redacted] car seat. The doctor told the family to keep a look on the bruises. He does not know how the child got the injuries, but he wishes that he and mom would not have had that argument, in August.

On June 13, 2024, the Autopsy Report was received. The autopsy was completed on [redacted] [redacted] on September 14, 2022, by the [redacted] Tennessee Regional Forensic Center, [redacted] TN. Autopsy Findings include blunt trauma to the head and neck, blunt trauma of the torso, and blunt trauma of the extremities. Toxicological studies performed on postmortem iliac blood were negative. Death was caused by multiple blunt force injuries. Reports of the death scene investigation, circumstances surrounding and leading up to the death, and autopsy findings indicate the manner of death to be homicide.

On June 20, 2024, Sgt. [redacted] with the [redacted] Police Department's Homicide Bureau, stated Crime Scene Investigators found traces of blood in the home, and TBI will test the DNA. Additional statements will be conducted from the parents. The phone records will also be reviewed. The state report will be sent off, once everything is complete. Ms. [redacted] does not have criminal charges. Mr. [redacted] has theft charges.

On June 20, 2024, CPSI [redacted] presented the case to the [redacted] County Child Protective Investigative Team (CPIT). The CPIT Meeting was held via Zoom Video Conference.
The Alleged Child Victim is [redacted] The Alleged Perpetrators are Birth Mother, [redacted] Birth Father, [redacted] and an Unknown Perpetrator. The Allegations are Physical Abuse and Abuse Death.

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

The CPIT Team consisted of Assistant District Attorney [redacted], [redacted] Hospital staff, [redacted] Child Advocacy Center Staff, Department of Childrens Services Staff, and Law Enforcement.
The Allegations of Physical Abuse and Abuse Death will be classified as Allegation Substantiated Perpetrator Substantiated for [redacted] and [redacted]
The Allegations of Physical Abuse and Abuse Death will be classified as Allegation Unsubstantiated Perpetrator Unsubstantiated for the Unknown Perpetrator.
Assistant District Attorney Dru Carpenter recommended for Homicide Investigators to complete additional tasks before charges are pursued. The charges are expected to be murder in perpetration of aggravated child abuse, murder in perpetration of child neglect, aggravated child abuse, and aggravated child neglect on both parents.

On February 26, 2025, Sergeant [redacted] with the [redacted] Police Departments Homicide Bureau stated indictment paperwork was sent in on [redacted] and [redacted] in September of 2024. There has not been any warrants or indictment charges pursued against the parents, yet.

Per DCS Policy Work Aid 1 Section C:
Child Death is defined as:

a) Any child death caused by abuse or neglect.
b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.
c) Any child death caused by abuse or neglect resulting from the parent or caretakers failure to stop another persons direct action that resulted in the death of the child. Child deaths are always treated as severe abuse.
The Tennessee Department of Childrens Services defines Physical Abuse as any non-accidental physical injury or trauma that could cause injury inflicted by a parent, caretaker, relative or any other person who is responsible for the care, supervision or treatment of the child. Physical abuse also includes, but is not limited to:
a) A parent or caretakers failure to protect a child from another person who perpetrated physical abuse on a child;
b) Injuries, marks and/or bruising that go beyond temporary redness or are in excess of age appropriate corporal punishment.(e.g., a bruise, broken bone, cut, burn);
c) Violent behavior by the parent or caretaker that demonstrates a disregard for the presence of a child and could reasonably result in serious injury (e.g., domestic violence). Striking (hitting, kicking, punching, slapping, etc.) a child in such a way that would result in internal injury. Munchausen by Proxy Syndrome could be considered physical abuse or psychological abuse.
NOTE: Physical abuse should not be confused with developmentally appropriate, discipline-related marks and bruises on the buttocks or legs of children six (6) years of age and older when there are no developmental or physical delays, past history of abuse or recent (within the past year) screened-out reports.
NOTE: In its most severe form, physical abuse is likely to cause serious bodily injury or death.

There is a preponderance of evidence to support the allegations of Physical Abuse and Abuse Death against [redacted] and [redacted] This case will be closed and classified as Allegation Substantiated, Perpetrator Substantiated for Physical Abuse and Abuse Death. There is a not a preponderance of evidence to support the allegations of Physical Abuse and Abuse Death against the Unknown Perpetrator. This case will be closed and classified as Allegation Unsubstantiated, Perpetrator Unsubstantiated for Physical Abuse and Abuse Death.

CPSI [redacted] reviewed [redacted] Birth Records from [redacted] Hospital.

[redacted] was born at 26 weeks, 4 days, and he was in the NICU for 79 days.

He was born at risk for infection, with low birth weight, and with hyperbilirubinemia.

[redacted] had abdominal distention, and surgery was consulted. a right inguinal hernia was found, which caused partial bowel obstruction. Surgery was conducted, prior to discharge. The child also was circumcised.

[redacted] was fed Neosure and took multivitamin iron drops, by mouth.

CPSI [redacted] reviewed [redacted] Medical Records.

[redacted] was admitted to [redacted] on September 12, 2022.

[redacted] came to [redacted] Hospital, by ambulance, in cardio-respiratory arrest. There was a concern for non-accidental trauma. He was found unresponsive by his parents, who reported the child being in his usual state of health. When Emergency Medical Services (EMS) arrived to the home, [redacted] did not have a pulse. Resuscitation and bag ventilation were started. This was continued for 40 minutes, prior to hospital arrival.

[redacted] was found to have head trauma, which caused a loss of consciousness. [redacted] had a subdural hematoma, overlying the left superior parietal lob. Opthalmology ruled out hemorrhages.

[redacted] was found to have abdominal trauma. A grade 4 liver laceration were found on his liver. Fat stranding was seen on the [redacted] left scrotum, which made it appear larger than the right. This could be due to an inguinal hernia. Fractures were found on the 4th, 5th, and 6th ribs. [redacted] also had a pelvis injury.

[redacted] had left-sided head turning and stiffening. There was a concern for seizures. [redacted] sustained a brain injury, due to anoxia.

On September 13, 2022, [redacted] had a brain death examination, which demonstrated no brain or brainstem activity. Time of death was called at 10 pm.

Narrative Details

Narrative Type: Original Entry Date/Time: 09/26/2022 12:00 PM Entered By: [redacted]

The Abuse Death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with Case Manager (CM) [redacted] and Team Leader (TL) [redacted] Also present was Team Coordinator (TC) [redacted], CPS Director (CPSD) [redacted], and Director of Critical Incident Support (DCIS) [redacted].

The CPS investigation was assigned on 9/12/22 concerning the death of ACV [redacted] (3mo). It was reported [redacted] resided with birth mother [redacted] and birth father [redacted] in [redacted] County. A half-sibling [redacted] /1yo] belonging to the father has occasional contact with the family.

On 9/12/22 [redacted] presented to [redacted] Childrens Hospital via ambulance with multiple unexplained, non-accidental injuries, including bilateral rib fractures, a grade 4 liver laceration, pubic bone fracture, subdural hematoma, anoxic brain injury, blood present in his chest and liver, a fractured pelvis, and knee fractures. No external bruises or injuries were reported. [redacted] had a poor prognosis, continued to decline, and died as a result of his injuries on 9/13/22.

The mother reported she woke around 10-11am on 9/12/22, gave [redacted] a bath, got him ready for the day, and fed him. The father was in the shower and she was waiting on him to finish so she could shower while he watched the baby. The mother stated when she exited the shower, she heard [redacted] crying and went to him, but he stopped when she picked him up. The father was putting lotion on himself at this time. When the mother placed [redacted] down, the father picked him up and held [redacted] by his ear, and said he didnt hear breath and began to pat him on the back. Milk was coming out of [redacted] nose and mouth, and the father said he didnt hear a heartbeat. They then called 911 and were instructed on initiating CPR while waiting on the ambulance to arrive. The parents stated they were the only ones who have ever watched [redacted] since birth. The parents reported the previous month they noted a bruise on [redacted] chest and called [redacted] about this, with the doctor informing them unless it turned blue there should not be concern. The mother stated the bruise went away within a couple days. The mother reported no concerns about the fathers care for the baby in the past. The maternal grandmother observed [redacted] in the 24 hours before his death, and she reported no concerns or odd behaviors during this time or concerns about the parents. It was reported [redacted] had a doctor appointment on 9/7/22 at [redacted] Hospital at which time he received a RSV shot. [redacted] was born at 26 weeks gestation and had been discharged at the beginning of August. The parents reported an argument in August during which the father pushed the mother and she fell on the baby but hopped

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

up immediately and they were aware of no injuries from this incident. The father reported [redacted] would sometimes grunt when he moved, but thats why they went to the hospital on 9/7/22 for the RSV shot. The parents had no explanation for [redacted] injuries. The mother denied any postpartum issues. LE had no concerns regarding the home environment at the scene.

Grief counseling has been offered to the parents. The father would not provide information regarding the mother [redacted] of the half sibling or their whereabouts, but the child reportedly stays with his mother. The father has past assault charges that have reportedly been thrown out involving, a coworker, another mother, and his sister.

Next Steps:
-- CM has requested records from [redacted] and [redacted] Hospitals. Records will be reviewed and uploaded to TFACTS. Safety Nurse consult will be utilized as needed.
-- CM will request all interviews and information/evidence collected by LE within their investigation and upload to TFACTS.
-- CM will complete local backgrounds, clear search, benefit checks in attempt to locate the half sibling to assess for safety.
-- CM will request medical clearance and restrict contact with the half sibling and father once located.
-- CM will document and upload autopsy into TFACTS once received.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.

CPSI [redacted] called Dr. [redacted] again, to ask questions about [redacted] injuries. Dr. [redacted] stated that if Ms. [redacted] and Mr. [redacted] were in an argument, where pushing occurred, on August 14th, the child's injuries would have been in the healing stage. All of his internal injuries are fresh. She also found a tear under his tongue, when she completed her examination of the baby. [redacted] was also found to have a knee injury, meaning that his leg was being pulled. Dr. [redacted] is not ruling out abuse.

CPSI [redacted] conducted a Parent Interview with Birth Father, [redacted] The interview was conducted privately, in the [redacted] Floor Family Room, of [redacted] Hospital. CPSI [redacted] gave an introduction and stated the purpose of the interview.

Mr. [redacted] woke up at 8 am Monday morning and his shower was taken at 10 am. [redacted] was with his mother, doing their morning routine. [redacted] was fed after his bath. While the morning routine was taking place, Mr. [redacted] was in the shower. When he got out the shower, [redacted] was in the crib, asleep. Mr. [redacted] and Ms. [redacted] then traded places, and she went to take her shower. Mr. [redacted] began to lotion his body. Something told him to look at [redacted] and [redacted] appeared to be gasping for air. He told Ms. [redacted] to come look, as she was getting out the shower. They both looked at the baby, and Mr. [redacted] picked him up. He laid [redacted] on his back. Mr. [redacted] did not hear a heartbeat. He then blew in the babys mouth. Milk and was coming out of [redacted] nose and mouth. They then called 911. They were instructed on how to give CPR. The baby was put in the ambulance and they followed.

The child just went to the doctor, at [redacted] on [redacted] and received an RSV shot. The RSV shot was to prevent him from getting infections from other people. [redacted] was born at 26 weeks. He got out of the NICU, at the beginning of August. Mr. [redacted] works Sunday through Thursday, from 2-9 pm, but he did not go this Sunday. He took [redacted] Ms. [redacted] and [redacted] to Dave and Busters. CPSI [redacted] asked for [redacted] mom's information so that the child could be medically cleared. Mr. [redacted] stated that [redacted] does not need to be apart of the investigation.

In August, Mr. [redacted] and Ms. [redacted] had a petty argument. Ms. [redacted] was pushed and she fell on the baby, but she hopped right up. The child would grunt, when he would move. They told the doctor about the grunting, last week. He was around when Ms. [redacted] called [redacted] about the bruise that they figured was from [redacted] car seat. He was taken to the doctor for that. The doctor told the family to keep a look on the bruises. He does not know how the child got the injuries, but he wishes that he and mom would not have had that argument, in August.

CPSI [redacted] staffed this investigation with Regional Nurse, [redacted] CPSI [redacted] gave Nurse [redacted] information regarding [redacted] She stated that grade 4 liver lacerations are very severe and they usually come from car accidents or severe blunt force trauma. The child has severe injuries, and the injury to his head possible caused oxygen to not get to his brain. The child had active bleeding, which caused blood on his brain. The pubic bone fracture and pelvic bone fractures are not common in immobile children. With the rib fractures, it depends on where the fractures are. If the CPR was done correctly, it would not be on both sides. It is unclear how the child would have fractures on both sides.

CPSI [redacted] explained and reviewed the information contained in the Case Intake Packet and obtained the appropriate initials and signatures. In addition to the forms provided, CPSI [redacted] inquired if the child was affiliated with a Native American Tribe, and Miss [redacted] denied.

CPSI [redacted] conducted a Parent Interview with [redacted] The interview was conducted in the [redacted] Floor Family Room, of [redacted] Hospital. CPSI [redacted] gave an introduction and stated the purpose of the interview.

Ms. [redacted] woke up at about 10 or 11 am. She took [redacted] a bath, got him ready, and fed him. She was waiting on dad to get out of the shower. Ms. [redacted] heard the child crying. Ms. [redacted] asked the father what did he do to her baby and he asked why would she accuse him. [redacted] stopped crying, once she picked him up. Mr. [redacted] was putting lotion on himself and the child was in his crib, before Ms. [redacted] picked him up.

Mr. [redacted] got the baby and patted him on his back. The baby was attempting to catch his breath. Milk was coming out of [redacted] nose and mouth. Mr. [redacted] did not hear a heartbeat. They began CPR. They conducted CPR, until the ambulance arrived.

The only people who watch the baby are Ms. [redacted] and Mr. [redacted] The parents noticed a bruise on his chest last month, but they thought it was from his car seat. Ms. [redacted] called [redacted] and the doctor told mom if the bruise did not turn blue, the child was okay. The bruise went away, in about 2 days. Ms. [redacted] stated that she does not know anything about her child having bruises. The father has a good attitude towards the baby. He has never disciplined the baby, and neither has she.

Sunday, starting about 11, Ms. [redacted] did the normal routine. The baby then slept until they went to get his brother. They then went back home. The family then went to her mom's house and the child was still strapped in the car seat. The baby was not ready to eat. The baby feeds every three hours. The family went back home and fed him. The family then went to Dave and Buster's and the dad had him in a chest carrier. The brother was dropped back off at his home. Ms. [redacted] came

Investigator [redacted] was assigned the following P1 Referral by Team Leader [redacted]

Juvenile Court and District Attorney are notified on referrals and classification on a monthly basis per local protocol and policy. The referent requested EMAIL notification of the referral.

The Tennessee Department of Children services received the following P1 investigation on 09/12/2022 at 3:02 pm with an allegation of Physical Abuse. The alleged child victim is 3-month-old, [redacted] The Alleged Perpetrator is listed Unknown.

[redacted] arrived at the hospital on 9/12/2022 in a full cardiac arrest. [redacted] also has a subdural bleed. The subdural bleeding is internal bleeding. [redacted] also has unexplained head injuries. There are concerns of who is protective over [redacted] in his home. [redacted] and [redacted] did not have a reason for the state that [redacted] was in when he arrived at the hospital on 9/12/2022. [redacted] brought [redacted] to the hospital in a private vehicle. [redacted] is currently stable, and he is expected to survive.

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

Case Name : [redacted] **Investigation ID:** [redacted]

E. Investigation Summary

Instruction: Condense the finding rationale for each allegation relative to the child victim(s). Be sure to identify the facts that provided for the classification decision.

Summarize the key points and dates of the child or children's statements and/or the observation of the child or children's physical state or home environment:

CM [redacted] conducted an Observation with Alleged Child Victim, [redacted] The child was observed in the Hospital Bed, of Room [redacted] at [redacted] Hospital. The child was observed laying in the hospital bed, fully covered in a blanket. The child had breathing tubes, in his nose. The child had just had a procedure of getting his pic line put in.

[redacted] was pronounced deceased at 10 pm, on September 13, 2022.

Summarize professional, medical or psychological findings or opinions: What is the collateral's oral or written finding/opinion of the incident(s)/allegation(s)?

On September 12, 2022, Nurse [redacted] stated [redacted] suffered bilateral rib fractures, a grade 4 liver laceration, a pubic bone fracture, a subdural hematoma, an anoxic brain injury, blood in his chest, blood in his liver, and a fractured pelvis.

Dr. [redacted] of [redacted] Hospital, stated [redacted] had multiple bodily injuries. The child had a hematoma and an anoxic injury. Dr. [redacted] did not expect a significant recovery. The child was on a ventilator, and he was critically sick. Dr. [redacted] expected [redacted] to die or have severe long-lasting injuries.

On September 13, 2022, Dr. [redacted] stated [redacted] was having seizures, overnight. He would be receiving his first brain death exam. She did not know if the baby could withstand a CT scan or an MRI.

Regional Nurse [redacted] stated that grade 4 liver lacerations were very severe, and they usually come from car accidents or severe blunt force trauma. [redacted] had severe injuries, and the injury to his head possibly caused oxygen to not get to his brain. The child had active bleeding, which caused blood on his brain. The pubic bone fracture and pelvic bone fractures are not common in immobile children. With the rib fractures, it depends on where the fractures are. If the CPR was done correctly, fractures would not be on both sides.

On June 13, 2024, the Autopsy Report was received. Death was caused by multiple blunt force injuries. Reports of the death scene investigation, circumstances surrounding and leading up to the death, and autopsy findings indicate the manner of death to be homicide.

Summarize alleged perpetrator's statement or admission: What is the perpetrator's explanation of the incident(s)/allegation(s)?

Mother, Ms. [redacted] woke up at about 10 or 11 am. [redacted] was given a bath. Ms. [redacted] got him ready and fed him. She was waiting on Mr. [redacted] to get out of the shower. Ms. [redacted] heard [redacted] crying. Ms. [redacted] asked the father what he did to her baby, and he asked why she would accuse him. [redacted] stopped crying once she picked him up. Mr. [redacted] patted [redacted] on his back, and he was attempting to catch his breath. Milk was coming out of [redacted] nose and mouth, and he did not have a heartbeat. They began CPR, and it was conducted until the ambulance arrived. The only people who watch the baby are Ms. [redacted] and Mr. [redacted] The parents noticed a bruise on his chest last month, but they thought it was from his car seat. Ms. [redacted] called [redacted] and the doctor told her if the bruise did not turn blue, the child was okay. The bruise went away, in about 2 days. Ms. [redacted] did not know anything about her child having bruises. The father has a good attitude towards the baby. He has never disciplined the baby, and neither has Ms. [redacted] Ms. [redacted] and Mr. [redacted] were fighting in August, and Mr. [redacted] pushed Ms. [redacted] backwards. Ms. [redacted] fell on the baby for a of couple seconds. They have fought twice.

Birth Father, [redacted] woke up at 8 am Monday morning and his shower was taken at 10 am. [redacted] was with his mother, doing their morning routine. [redacted] was fed after his bath. While the morning routine was taking place, Mr. [redacted] was in the shower. When he got out the shower, [redacted] was in the crib, asleep. Mr. [redacted] and Ms. [redacted] then traded places, and she went to take her shower. Mr. [redacted] began to lotion his body. Something told him to look at [redacted] and

Department of Children's Services

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

Case Name : [redacted] **Investigation ID:** [redacted]

[redacted] appeared to be gasping for air. He told Ms. [redacted] to come look, as she was getting out the shower. They both looked at the baby, and Mr. [redacted] picked him up. He laid [redacted] on his back. Mr. [redacted] did not hear a heartbeat. He then blew in the baby's mouth, and milk was coming out of [redacted] nose and mouth. They then called 911. They were instructed on how to give CPR. In August, Mr. [redacted] and Ms. [redacted] had a petty argument. Ms. [redacted] was pushed, and she fell on the baby, but she hopped right up. The child would grunt when he would move. They told the doctor about the grunting, last week. He was around when Ms. [redacted] called [redacted] about the bruise that they figured was from [redacted] car seat. The doctor told the family to keep a look on the bruises. He does not know how the child got the injuries, but he wishes that he and mom would not have had that argument, in August.

Summarize witnesses' descriptions of what they saw and what they believe indicates child abuse/neglect:

On September 12, 2022, [redacted] nurse had a concern for his safety. He arrived at the hospital in full cardiac arrest. [redacted] also has a subdural bleed. The subdural bleeding is internal bleeding. [redacted] also has unexplained head injuries. It is unknown where the head injuries are located on [redacted] There are concerns of who is protective over [redacted] in his home. [redacted] and [redacted] did not have a reason for the state that [redacted] was in when he arrived at the hospital. Ms. [redacted] brought [redacted] to the hospital in a private vehicle. [redacted] is currently stable at the hospital; he is expected to survive. Given the length of time the child received CPR, the findings on the brain scans and physical examination indicates that the child has a poor prognosis. Ultimately, the child will likely progress into brain death. However, given poor prognosis, parents have elected to withdraw care rather than wait for examination to confirm death by neurological criteria.

Summarize any other evidence or factors that support the investigative finding(s) for the allegation(s) of abuse/neglect:

There is a preponderance of evidence to support the allegations of Physical Abuse and Abuse Death against [redacted] and [redacted] This case will be closed and classified as Allegation Substantiated, Perpetrator Substantiated for Physical Abuse and Abuse Death. There is a not a preponderance of evidence to support the allegations of Physical Abuse and Abuse Death against the Unknown Perpetrator. This case will be closed and classified as Allegation Unsubstantiated, Perpetrator Unsubstantiated for Physical Abuse and Abuse Death.
