[redacted] son in law, reported he was the only one in the house that spoke English but not well. CM [redacted] spoke with Mr. [redacted] while trying to get the phone translator to pick up. Mr. [redacted] was asked who lived there. He stated that [redacted] and their three kids [redacted] (his wife), [redacted] (21-year-old son), and their daughter [redacted] He stated that he lives there as well, and he and [redacted] have a 7-month-old son named [redacted] He stated that [redacted] sister, [redacted] lived there as well and she has a daughter named [redacted] who is 7 years old. The case has been updated for its current status. The primary challenge is with the Primary Care Physician (PCP) who is facing difficulties in obtaining records from the homicide department. The Case Manager (CM) has sought help through a liaison, yet there has been resistance in releasing the pertinent records. Consequently, this case will not move forward with prosecution in relation to the death. Nevertheless, there is an ongoing investigation due to the discovery of potential male DNA.

Next steps:
The CM plans to conduct an unannounced visit to gather information from the PCP directly. Additionally, the CM will rely on information from Sgt. [redacted] given the homicide department's refusal to provide access to their files. Updates will be added to the case notes accordingly.

Case Manager needs to add PCP medical records for the ACV, not just the autopsy. Law Enforcement investigation report needs to be entered in TFACTS. During the time of the child's death, it was noted that other family members resided in the home with minor children. CM needs to note if these family members still reside in the home and if so, safety of these children need to be noted. Death Summary is not approved until it is documented that the above tasks have been completed. Team Leader needs to ensure tasks are completed before summary is resubmitted to Team Coordinator for review.

The death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with the following staff: Case Manager (CM) [redacted] Team Leader (TL) [redacted] Team Coordinator (TC) [redacted] CPS Director (CPSD) [redacted] and Director of Critical Incident Support (DCIS) [redacted].

The CPS investigation was assigned on 12/18/23 concerning the death of ACV [redacted] (5yo). It was reported [redacted] resided with her birth mother [redacted] birth father [redacted] two adult siblings, a spouse of one sibling, and the children of the siblings, ages 7yo and 7mo.

On 12/16/23 the family reported they were all getting ready for church when [redacted] was running throughout the house and playing. At one point she went outside and unknown to the family, appeared to gain access to the neighbors backyard through a missing board in a fence between the two properties. The neighbors have a pool that was less than halfway full with a slide going down into it. Upon realizing [redacted] was missing, the family began to search and she was found by the father unresponsive in the pool. 911 was called and [redacted] was transported to the local hospital where pronounced deceased.

The family was interviewed and reported [redacted] had no shown intertest in the neighbors yard or pool in the past and she was believed to be safe that morning under the general supervision of the family throughout the home an believed contained within their property. The father saw [redacted] in the pool when outside looking for her through the fence and tore a larger section out quickly to get to her and pull her out. It is believed [redacted] saw the slide, which closely resembled the one attached the familys playset in their backyard, and decided to go down it. The family has house cameras in the front of the home, but not back. LE took pictures of the scene. Safe sleep was observed for the 7mo relative in the home and there are no concerns for the environment or the surviving household children.

Possible rectal trauma was noted and this is being assessed currently. The rectum was dilated at 3cm with no tears or blood observed. It is unknown at this time if abuse or natural medical circumstances are the cause. [redacted] was reported to have no physical or developmental concerns or delays.
