Reporter's Name/Relationship: [redacted]

-Child/Family Identification and Relationship Introduction Paragraph:
[redacted] (5) lives with her mother [redacted] (34) in [redacted] County. Also in the home is [redacted] husband [redacted]

-Are you requesting immediate assistance from DCS to your location, or only an immediate phone call?
Requesting and immediate response to [redacted] Children's Hospital in [redacted] TN.

Tennessee Department of Children's Services
Tennessee Child Abuse Hotline Summary

-Please provide a brief summary of the concerns and why DCS is needed to respond immediately.
[redacted] was brought to the hospital due to a burn at 10:32 PM. [redacted] said she ran a bath around 5:00 pm on 5/3/2024, and she did not check how hot it was. She stated [redacted] got in the tub and [redacted] got out. [redacted] said she tried to dress the burns at home herself and put Neosporin on it, but when she started to notice blisters she brought [redacted] in. [redacted] has a burn to the lower body extremity, buttocks and labia and the doctor said she has a partial thickness burn from the waist down that is 36%. [redacted] will likely be admitted to the hospital. [redacted] does not have a history of visits at [redacted] Children's Hospital.

-Are there any concerns for the safety of a Department of Children's Services Case Manager responding to the child's home?
No.

-Anything additional to add to this initial report for the responding worker to know prior to response?
No.

Narrative Details

Narrative Type: Original Entry Date/Time: 09/29/2025 11:48 AM Entered By: [redacted]

On May 4, 2024, a P-1 referral was received at the Child Abuse Hotline listing Alleged Child Victim, [redacted] (6) as the Alleged Child Victim and Alleged perpetrator, [redacted] (35) for the allegation of Lack of Supervision. Alleged Child Victim, [redacted] died on May 18, 2024, because of the injuries reported in the initial intake, the allegation of Abuse Death was added to the open case. This investigation was assigned to Child Protective Services Case Manager (CM) [redacted] by Team Leader, (TL) [redacted] This case was worked in conjunction with the [redacted] Police Department ([redacted]PD), Law Enforcement Officer Sgt. [redacted].

At the time of the incident, [redacted] was in the care of her mother, [redacted] lived in the home with her birth mother, [redacted] and the mothers boyfriend, [redacted] in [redacted] County. No other minor children reside in the home. It was reported that the mother is currently 6-months pregnant. The birth father, [redacted] is reportedly not involved.
It was reported that on May 3, 2024, at approximately 5 p.m., [redacted] ran water so that [redacted] could take a bath. [redacted] got in the tub and when she exited the mother noted her legs were red and burned. The mother treated with Neosporin but brought [redacted] to [redacted] Childrens Hospital later that evening at approximately 10:30 p.m. when she noticed that blisters were forming. Mom did not verify the temperature of the water. She claimed that [redacted] entered the bathtub and later got out. Doctors diagnosed [redacted] as having partial thickness burns to the lower half of her body, including legs buttocks, and labia. [redacted] was admitted to [redacted] Children Hospital to receive medical treatment. When asked about marks noticed on [redacted] hospital staff reported that mom stated they could be from [redacted] hitting herself while jumping rope. The mother also made a comment about December 2023 being the last time she had physically disciplined [redacted] and that her boyfriend had made a comment about her methods.

Case Manager (CM) [redacted] met response time at [redacted] Childrens Hospital on May 4, 2024, and discussed the allegations with the mother Ms. [redacted] Ms. [redacted] reported that she was already upset with [redacted] due to her behavior at school. She stated that she intended to bathe, feed, and send [redacted] to bed for the night. Ms. [redacted] reported that she ran the bath water and then proceeded to take the dog outside. However, she became distracted due to the dog's need for supervision. Ms. [redacted] asserted that she instructed [redacted] to be in the tub by the time she came back in the house. Ms. [redacted] reports that when she came back in the house, she went to the bathroom and observed [redacted] rocking

Tennessee Department of Children's Services

Case Status: Close Organization: [redacted] Region

back and forth. Ms. [redacted] said she then observed the steam emanating from the water and screamed for [redacted] to exit the tub. Ms. [redacted] reported that [redacted] was extremely irritated and red, prompting her to contact the maternal aunt, [redacted] who is a nurse. [redacted] advised Ms. [redacted] to go to Walgreens to obtain Neosporin and gauges, and to bandage [redacted] legs. Ms. [redacted] reports that she placed only a bandage on a single location on the back of [redacted] thigh. She stated that [redacted] refused to eat and just wanted to go to bed. Ms. [redacted] reported that she checked on [redacted] at approximately 9:00 p.m. and that [redacted] stated that she was hurting. Ms. [redacted] reported that she observed [redacted] legs with the formation of sores and "blisters." She also observed that the bandage on [redacted] leg had detached, causing skin to fall off. Ms. [redacted] stated that she was aware at that moment that she needed to transport [redacted] to the hospital. Ms. [redacted] stated that [redacted] is capable of informing her when additional hot or frigid water is required in the bathtub. Ms. [redacted] declared that she runs the bath water on each occasion. She stated that she loves her child and would never purposely inflict any harm upon her.

During an interview with CM [redacted] at [redacted] disclosed that she was experiencing discomfort in her legs and butt when she moved. [redacted] only stated that she took a bath. At this time, no further information was collected, as CM [redacted] advised [redacted] to rest.

On May 08, 2024, CM [redacted] spoke with Ms. [redacted] who reported she was at [redacted] Hospital [redacted] located in [redacted] Ohio ([redacted] Ohio [redacted] due to [redacted] requiring specialized care from the burn unit. CM [redacted] spoke with the Child Abuse Pediatrician at [redacted] Hospital [redacted] Ms. [redacted] via phone on May 9, 2024. Ms. [redacted] informed CM [redacted] that the ACV is currently in the surgical room and would most likely remain in the hospital for an extended period of time owing to significant injuries. Ms. [redacted] further indicated that the child's body bears patterned marks, and there are suspicions of physical abuse prior to this incident. Medical records were provided. [redacted] condition continued to decline with the burns causing swelling in her brain and spinal cord. Additionally, the hospital reporting observing loop-shaped marks and deep bruising on [redacted] back.

Social Worker [redacted] at [redacted] Hospital reported to CM [redacted] that [redacted] is not in good condition. A computed tomography (CT) of the head was conducted yesterday, May 13, 2024, and frontal hemorrhage was observed. Additionally, the child's pulse rate increased. Doctors report that the hot water is the cause of the skull injuries. The child's back bore a scar, and the mother informed medical personnel that the bruise was the result of [redacted] playing jump rope. The mother also disclosed that her boyfriend, [redacted] resides in the residence and was alone with [redacted] in the home on the night of the incident, while the mother departed for the store to obtain treatment for the child's bruises. CM [redacted] Team Leader (TL) [redacted] Dr. [redacted] RN [redacted] and Social Worker [redacted] participated in a conference call. During this call it was confirmed that [redacted] arrived at [redacted] Children's Hospital at 2:00 p.m. on Saturday, May 4, 2024. According to Dr. [redacted] at that time, 32% of [redacted] skull was burned. Dr. [redacted] stated that when she arrived, the child was alert and informed her that she got in the bathtub and fell asleep. [redacted] stated that her mother had to wake her up and get her out of the tub. The mother was also interviewed by medical personnel and confirmed that she ran the child's bath water without checking the temperature before the child entered. According to the mother, the incident occurred at 5:00 p.m., and records shows she did not arrive at the hospital until 11:00 p.m. During the initial wound care at [redacted] Hospital [redacted] 's right and left thighs were noticed to have markings in the shape of a "U." [redacted] experienced raspatory symptoms on Wednesday evening. Staff reported that [redacted] was talkative and engaging with the staff upon her arrival. There were instances in which the mother was extremely aggressive and made statements about the child, claiming that the child had kept her awake all night. Ms. [redacted] claims that the mother informed her that she does not derive any pleasure from being a mother. Ms. [redacted] reportedly stated she planned to give [redacted] up for adoption when she was pregnant. Staff then reported that the mother seems to be very concerned and is acting appropriately when discussing the childs condition.

Safety Nurse, [redacted] consulted on this case that Dr. [redacted] noted, Wounds are deep second degree without significant blanching. [redacted] also had bruising and patterns in red lines within areas of wounds. On the History and Physical dated May 4, 2024, Dr. [redacted] noted, [redacted] is a 5-year-old female with no PMH (past medical history)

Tennessee Department of Children's Services

who presents as a transfer after sustaining an acute scald burn from waist down around 5:00 pm on May 3, 2024. [redacted] did not arrive to the [redacted] Emergency Department until 23:30. Wounds are deep second degree in most areas with areas that also have bruising and patterns in red underlying the blistered skin. There are concerns about story and patterns. Nursing narrative dated May 6, 2024, [redacted] RN, noted, Multiple bruises and scabbed laceration areas noted to bilateral thighs, back, etc. Team present during patient awaking from sedation as patient stated, my mom whipped me with the switch for acting up at school. Per documentation dated May 6, 2024, by Child Life Specialist, [redacted] patient easily introduced herself and openly shared without prompting that she was burned when her "mom put hot water in the bathtub and made me get in". And When patients mom was not present, patient intermittently made comments about her burn injury without prompting and in seemingly random order. Patient made multiple statements such as "my mom did this", "it's mom's fault she didn't check the water", "my mom made me get in the hot water". Patient referred to the pain during the injury several times as well saying "it really hurt when I was burned", "the hot water hurt me". [redacted] RN noted on May 6, 2024, While repositioning patient with [redacted] RN, patient states "my mom broke my legs." Per medical review of [redacted] Hospital records dated May 14, 2024, [redacted] has developed mixed hypovolemic and septic shock. Hypovolemic shock occurs when the body loses too much blood or fluids, and septic shock occurs when there is widespread infection causing organ failure and low blood pressure. It was noted she had severe ARDS with fluid overload. ARDS is respiratory distress syndrome in which fluid collects in the lungs, depriving organs of oxygen. She is intubated & on the ventilator. She has a new small intracranial hemorrhage (bleeding in the skull) likely due to sepsis. Per the physicians note dated May 15, 2024, the plan is to return to surgery to remove the dead skin, there is concern for areas of necrosis (death of cells/tissue) on the right foot. [redacted] brain swelling increased and by May 18, 2024, brain death had occurred, and [redacted] was removed from life support.

On May 24, 2024, CM [redacted] spoke with Sgt. [redacted] with the [redacted] Police Department ([redacted]PD) who informed CM [redacted] that a search warrant was approved and that investigators would proceed with moving forward with the case. Due to this case being time-sensitive, Sgt. [redacted] stated he will proceed with the search of the home today and that CMs presence was not needed. Sgt. [redacted] informed CM [redacted] that the assistant district attorney office (ADA) approved charges to proceed against the mother [redacted]

On June 12, 2024, CM [redacted] arrived at the residence of Mr. [redacted] and AP Ms. [redacted] CM [redacted] conversed with Mr. [redacted] and Ms. [redacted] simultaneously in the living room of the residence. Ms. [redacted] confirmed that she and Mr. [redacted] both met with homicide detectives at the police station last week following their arrival at her residence with a search warrant. Ms. [redacted] asserts that officers entered her attic and caused damage to her roof while inspecting the hot water heater. She asserts that the excessive number of individuals resulted in the roof's cracking. Mr. [redacted] stated that he and Ms. [redacted] have been in a relationship for one year. Ms. [redacted] is currently 25 weeks pregnant with his daughter. Both confirmed that [redacted] attended Pre-K at [redacted] Elementary School and exhibited typical child behavior. Ms. [redacted] stated that the teacher reported [redacted] refusal to lie on her mat as directed. [redacted] spoke defiantly to the teacher. The following day, [redacted] exhibited disruptive behavior throughout the class. Ms. [redacted] stated that she struck [redacted] with a belt upon her arrival home. She recounted placing [redacted] in a chicken wing position by restraining one of her arms and striking her on the posterior with a belt. Ms. [redacted] asserts that [redacted] kept moving, which may have resulted in her striking [redacted] on the back. Ms. [redacted] asserts that she never observed any bruises on [redacted] Mr. [redacted] asserts that he only disciplined [redacted] by confiscating her toys. He was at work when the incident occurred in the home. Ms. [redacted] claimed medical professionals are the ones who busted the blisters following the incident where the child was taken to [redacted] Ms. [redacted] asserts that [redacted] had COVID, which may have exacerbated the situation due to inadequate medical treatment provided by the doctors. She states that [redacted] was improving and then abruptly deteriorated. She attributes her child's death to the doctors' inadequate treatment, asserting that her child would still be alive otherwise. [redacted] father is inactive.

As of September 27, 2024, records shows that Ms. [redacted] was arrested and charged with Aggravated Child Abuse-Child U/6 and First-Degree Murder. CM [redacted] received a call from Mr. [redacted] on September 30, 2024, informing her that Ms. [redacted] is now incarcerated on charges relating to the open case of [redacted] During the course of the investigation, Ms. [redacted] recently gave birth to newborn [redacted] on [redacted] Mr. [redacted] is the father to

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

[redacted] who is currently at the home of the maternal aunt who keeps the child while the father is at work.

On March 20, 2025, CM [redacted] spoke with Ms. [redacted] with The [redacted] County Coroners Office who confirmed that an autopsy was done on [redacted] however, those records cannot be released to the department. The report was released to the investigating agency.
This case was presented to CPIT by CM [redacted] on May 8, 2025, and will be classified as Allegation Substantiated Perpetrator Substantiated for Abuse Death and Allegation Substantiated Perpetrator Substantiated for Lack of Supervision against the mother [redacted] There is a preponderance of evidence to support these allegations.
According to DCS Policy Chapter 14, Work Aid 1, Section E, Child Death is defined as:
a) Any child death caused by abuse or neglect.
b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.
c) Any child death caused by abuse or neglect resulting from the parent or legal custodian/caretaker's failure to stop another person's direct action that resulted in the child's death. Child deaths are always treated as severe abuse.

According to DCS Policy Chapter 14, Work Aid 1, Section C, Lack of Supervision
Failure to provide adequate supervision, by a parent or other legal custodian/caretaker, who is able to do so. A lack of supervision allegation or determination means that:
a) The child has been placed in a situation that requires actions beyond the childs level of maturity, physical ability, and/or mental ability; or
b) Caregiver inadequately supervises a child. The caregiver is with the child, but is unable or unwilling to supervise (e.g., the caregiver is under the influence of alcohol or drugs, is depressed, sleeps during the day or has inadequate parenting knowledge or skills).
c) Any registered sex offender residing in the home with unrelated minor children or victim of offender and/or caregiver knowingly resides with and/or allows children to be unsupervised with a registered sex offender.
d) Concerns that children in a congregate care facility were able to engage in sexual activity regardless of age of children and/or if initially reported as consensual, should be assigned as lack of supervision in addition to the sexual abuse allegation.

She has a new small intracranial hemorrhage (bleeding in the skull) likely due to sepsis. Per the physicians note dated May 15, 2024, the plan is to return to surgery to remove the dead skin, there is concern for areas of necrosis (death of cells/tissue) on the right foot. [redacted] brain swelling increased and by May 18, 2024, brain death had occurred, and [redacted] was removed from life support.

On May 24, 2024, CM [redacted] spoke with Sgt. [redacted] with the [redacted] Police Department ([redacted]PD) who informed CM [redacted] that a search warrant was approved and that investigators would proceed with moving forward with the case. Due to this case being time-sensitive, Sgt. [redacted] stated he will proceed with the search of the home today and that CMs presence was not needed. Sgt. [redacted] informed CM [redacted] that the assistant district attorney office (ADA) approved charges to proceed against the mother [redacted]

On June 12, 2024, CM [redacted] arrived at the residence of Mr. [redacted] and AP Ms. [redacted] CM [redacted] conversed with Mr. [redacted] and Ms. [redacted] simultaneously in the living room of the residence. Ms. [redacted] confirmed that she and Mr. [redacted] both met with homicide detectives at the police station last week following their arrival at her residence with a search warrant. Ms. [redacted] asserts that officers entered her attic and caused damage to her roof while inspecting the hot water heater. She asserts that the excessive number of individuals resulted in the roof's cracking. Mr. [redacted] stated that he and Ms. [redacted] have been in a relationship for one year. Ms. [redacted] is currently 25 weeks pregnant with his daughter. Both confirmed that [redacted] attended Pre-K at [redacted] Elementary School and exhibited typical child behavior. Ms. [redacted] stated that the teacher reported [redacted] refusal to lie on her mat as directed. [redacted] spoke defiantly to the teacher. The following day, [redacted] exhibited disruptive behavior throughout the class. Ms. [redacted] stated that she struck [redacted] with a belt upon her arrival home. She recounted placing [redacted] in a chicken wing position by restraining one of her arms and striking her on the posterior with a belt. Ms. [redacted] asserts that [redacted] kept moving, which may have resulted in her striking [redacted] on the back. Ms. [redacted] asserts that she never observed any bruises on [redacted] Mr. [redacted] asserts that he only disciplined [redacted] by confiscating her toys. He was at work when the incident occurred in the home. Ms. [redacted] claimed medical professionals are the ones who busted the blisters following the incident where the child was taken to [redacted] Ms. [redacted] asserts that [redacted] had COVID, which may have exacerbated the situation due to inadequate medical treatment provided by the doctors. She states that [redacted] was improving and then abruptly deteriorated. She attributes her child's death to the doctors' inadequate treatment, asserting that her child would still be alive otherwise. [redacted] father is inactive.

As of September 27, 2024, records shows that Ms. [redacted] was arrested and charged with Aggravated Child Abuse-Child U/6 and First-Degree Murder. CM [redacted] received a call from Mr. [redacted] on September 30, 2024, informing her that Ms. [redacted] is now incarcerated on charges relating to the open case of [redacted] During the course of the investigation, Ms. [redacted] recently gave birth to newborn [redacted] on [redacted] Mr. [redacted] is the father to

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]
Case Status:	Close	Organization:	[redacted] Region

[redacted] who is currently at the home of the maternal aunt who keeps the child while the father is at work.

On March 20, 2025, CM [redacted] spoke with Ms. [redacted] with The [redacted] County Coroners Office who confirmed that an autopsy was done on [redacted] however, those records cannot be released to the department. The report was released to the investigating agency.
This case was presented to CPIT by CM [redacted] on May 8, 2025, and will be classified as Allegation Substantiated Perpetrator Substantiated for Abuse Death and Allegation Substantiated Perpetrator Substantiated for Lack of Supervision against the mother [redacted] There is a preponderance of evidence to support these allegations.
According to DCS Policy Chapter 14, Work Aid 1, Section E, Child Death is defined as:
a) Any child death caused by abuse or neglect.
b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report.
c) Any child death caused by abuse or neglect resulting from the parent or legal custodian/caretaker's failure to stop another person's direct action that resulted in the child's death. Child deaths are always treated as severe abuse.

According to DCS Policy Chapter 14, Work Aid 1, Section C, Lack of Supervision
Failure to provide adequate supervision, by a parent or other legal custodian/caretaker, who is able to do so. A lack of supervision allegation or determination means that:
a) The child has been placed in a situation that requires actions beyond the childs level of maturity, physical ability, and/or mental ability; or
b) Caregiver inadequately supervises a child. The caregiver is with the child, but is unable or unwilling to supervise (e.g., the caregiver is under the influence of alcohol or drugs, is depressed, sleeps during the day or has inadequate parenting knowledge or skills).
c) Any registered sex offender residing in the home with unrelated minor children or victim of offender and/or caregiver knowingly resides with and/or allows children to be unsupervised with a registered sex offender.
d) Concerns that children in a congregate care facility were able to engage in sexual activity regardless of age of children and/or if initially reported as consensual, should be assigned as lack of supervision in addition to the sexual abuse allegation.

This case is being submitted for closure on September 23, 2025, to TL [redacted] with the allegations of Lack of Supervision and Abuse Death being classified as Allegations Substantiated/Perpetrator Substantiated for alleged child victim(s) [redacted] The alleged perpetrator(s) is/are [redacted] Notice of classification is submitted to the Juvenile Court Judge per local protocol via completion and submission of the 740. The District Attorneys office is notified of closure for all severe abuse referrals per local protocol.

Services in place at case closure: According to the mother, she placed the child in the tub and went to take the dog outside. She returned and got the child out the tub and noticed several blisters from her waist down. The incident occurred at 5:00 p.m., and records shows she did not arrive at the hospital until 11:00 p.m. During the initial wound care at [redacted] Hospital [redacted] 's right and left thighs were noticed to have markings in the shape of a "U" with wounds showing deep second degree in most areas underlying the blistered skin. The child stated my mom whipped me with the switch for acting up at school, and made multiple statements such as "my mom did this", "it's mom's fault she didn't check the water", "my mom made me get in the hot water. Per medical records dated May 14, 2024, [redacted] developed mixed hypovolemic, due to the body losing too much blood or fluids, and septic shock, an infection causing organ failure and low blood pressure. It was noted she had severe ARDS with fluid overload. ARDS is respiratory distress syndrome in which fluid collects in the lungs, depriving organs of oxygen. She developed intracranial hemorrhage (bleeding in the skull) likely due to sepsis. [redacted] had progressed to brain death with her brain herniating into her spinal column. The mother was later arrested and charged with AGGRAVATED CHILD ABUSE-CHILD U/6 and FIRST-DEGREE MURDER. The mother gave birth to a sibling who is now in the care of the father.

SAFETY/FAST recommended Immediate Intervention not Recommended, No Need/Risk. CM is requesting closure at this time.

This case is now prepared for review. The Case Manager (CM) and Team Leader (TL) have attempted to obtain the autopsy report for [redacted] however, all efforts have been unsuccessful. It has been indicated that the autopsy was conducted in Ohio, and because a related criminal case is ongoing, access to this data is not permissible. The case has progressed toward prosecution against [redacted] the mother, who faces charges of aggravated child abuse and first-degree murder. The mother has since given birth to another child, [redacted] who is currently in the care of the biological father, [redacted] CM [redacted] ensured that the father received all necessary supplies for the child. The TL and CM made attempts to initiate a PCO for the new child, aiming to grant the father primary custody and limit the mothers contact, but these efforts were declined by the legal department. The CM advised the father to pursue custody through a private petition.

Autopsy Update:
The autopsy report cannot be obtained due to the active criminal case. It has been recommended that approval be sought to proceed with this case towards closure without an autopsy, subject to upper management review and consent.

TL has reviewed and submitted the death summary to TC [redacted] for review and advisement.

CPSI [redacted] conducted a home visit with the newborn at the birth father's residence. The alleged perpetrator is currently incarcerated in relation to this incident. The father is adequately equipped with all necessary items for the newborn, and arrangements for daycare are being considered to provide additional support. Safe sleep practices were discussed during the visit. The case remains pending the outcome of the autopsy.

- Daycare arrangements have been approved and finalized.

Next step:
Continue monitoring the newborn and maintain regular monthly visits until further notification.

The case has been reviewed with Team Leader [redacted] regarding recent developments. According to Case Manager [redacted] the mother has been arrested and charged in connection with the death of the alleged child victim. Additionally, the mother has recently given birth to another child, whose biological father is actively involved and maintains physical custody. The Case Manager plans to apply for daycare for the newborn. CM will discuss Safe sleep and implement a pack and play if necessary. The Team Leader will engage legal counsel to determine that primary custody is awarded to the father, while imposing restrictions on the mother's visitation rights or potentially prohibiting contact with the new child.

Next steps:
Staff the case with Legal.
Submit the daycare applications.

The death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with the following staff: Case Manager (CM) [redacted] CM [redacted] Team Leader (TL) [redacted] TL [redacted] Team Coordinator (TC) [redacted] CPS Director (CPSD) [redacted] and Director of Critical Incident Support (DCIS) [redacted]

On 05/04/2024 at 01:00 AM a P1 referral was received by central intake involving alleged child victim(s) [redacted] The alleged perpetrator(s) is/are [redacted] The allegation(s) is/are Lack of Supervision. The referral states [redacted] was brought to the hospital due to a burn at 10:32 PM. [redacted] said she ran a bath around 5:00 pm on 5/3/2024, and she did not check how hot it was. She stated [redacted] got in the tub and got out. [redacted] said she tried to dress the burns at home herself and put Neosporin on it, but when she started to notice blisters, so she brought [redacted] in. [redacted] has a burn to the lower body extremity, buttocks and labia and the doctor said she has a partial thickness burn from the waist down that is 36%. [redacted] will likely be admitted to the hospital. [redacted] does not have a history of visits at [redacted] Children's Hospital. The CPS investigation was assigned to CM [redacted] on 05/06/2024 concerning Physical Abuse of ACV [redacted]
On 05/04/2024, CM [redacted] traveled to [redacted] Children Hospital and contacted the family. CM spoke with Ms. [redacted] about what happened to the child. Ms. [redacted] reports that she fucked up. She stated that she was already fussing at [redacted] due to her acting out at school. She reports that she told [redacted] that she was going to take a bath, eat, and go to bed. Ms. [redacted] states that she ran the bathe water and then she went to take the dog outside, and she got distracted because the dog must be watched outside, or he will run away. Ms. [redacted] states that she told [redacted] to be in the tub when she came back in. She states that when she got back in the bathroom, she saw [redacted] just rocking back and forth, and she then saw the steam from the water, and she yelled and told [redacted] to get out. Ms. [redacted] states that [redacted] was very red, and she called her sister ([redacted] because she is a nurse and [redacted] told her to go to Walgreens and get Neosporin and some gauges and wrap [redacted] legs. She states that she had but a bandaid on one spot on the back of her thigh. She states that [redacted] stated that she didnt want to eat but just go to bed. Ms. [redacted] states that she checked on [redacted] bout 9PM before she was to go to work (FedEx) her paramour [redacted] ([redacted]) got home because she works nights [redacted] stated that she was hurting. Ms. [redacted] states that she looked at [redacted] legs and boils blisters were beginning to form and where the band aid was on [redacted] leg came off and

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted]

skin came with it. She knew then she needed to bring [redacted] to the hospital.

CM [redacted] spoke with [redacted] assigned nurse. The nurse informed CM that the child is burned badly but they were not suspecting it to be abuse. The nurse staff stated that [redacted] labia was burned badly as well. The nurse staff states that mom was very defensive with them when first questioned. [redacted] (ACV) has burns that cover her body 36%; concern is how the youth obtained the burns. CM thanked nurse staff for speaking with her. [redacted] was admitted to [redacted] Childrens Hospital and later transported to [redacted] Childrens Hospital in Ohio.

On 05/14/2024, CM [redacted] spoke with social worker [redacted] with [redacted] Childrens Hospital via phone. Ms. [redacted] informed CM that the ACV is not in good condition. A head CT was performed and showed frontal bleeding on yesterday. The child also had an increase in heart rate. The mother became ill and had to be transported to an adult hospital, [redacted] once learning of the childs condition. The mother was discharged and is not back at the hospital with the ACV. Doctors report that the skull injuries are due to the hot water. There was a scar observed on the childs back and the mother stated to medical personnel that the child got the bruise from when she was jumping rope. The mother also reported that the boyfriend lives in the home and was with the child alone in the home while the mother went to the store to get treatment for the childs bruises. Later, 05/14/2024, A conference call was held with CM [redacted] TL [redacted] Dr. [redacted] RN [redacted] and Social Worker [redacted] According to Ms. [redacted] the ACV arrived at Children's Hospital on Saturday 05/04/2024 at 2:00 pm. At the time, 32 % of her skull was burned. The child was awake upon arrival and told Dr. [redacted] that she got in the tub and fell asleep. The ACV stated that her mother had to wake her up and get her out of the tub. Medical personnel also spoke with the mother who reported she ran the childs bath water and did not check the temperature before the child got in the tub. The mother saw the child with blisters, so she contacted her sister who told the mother to take the child to the hospital. The mother says the incident happened at 5:00 pm and the mother did not arrive at the hospital until 11:00 pm. The initial wound care noticed bruises shaped in a U pattern on the childs right and left thigh. The burns were intense, but the child is expected to live. The child was having raspatory symptoms Wednesday night. Doctors said they did not get the impression that the mother held the child down in the tub. Upon arrival, the ACV was talkative and engaging with staff. There were times when the mother was very aggressive and made statements towards the child saying the child kept her up all night. Ms. [redacted] says the mother told her she does not get any joy from being a mother. The mother reportedly stated she planned to give the child up for adoption when she was pregnant. The mother is currently pregnant. She has no unrestricted access to the child.

Safety nurse consulted on case by [redacted] for records review. Per review of [redacted] Hospital [redacted] note dated 5/4/23, Dr. [redacted] noted, Wounds are deep second degree without significant blanching. Also have bruising and patterns in red lines within areas of wounds. On the History and Physical dated 5/4/24, Dr. [redacted] noted, [redacted] is a 5-year-old female with no PMH (past medical history) who presents as a transfer after sustaining an acute scald burn from waist down around 5pm on 5/3/24. Per report from [redacted] patient was reportedly in the tub of hot water when she was burned. There was a delay in presentation, and patient did not arrive to the [redacted] ED until 2330. Upon arrival, patient states she got into the bathtub and fell asleep. She then got out on her own. She denies anyone putting her in the tub. Wounds are deep second degree in most areas with areas that also have bruising and patterns in red underlying the blistered skin. Concern about story and patterns. Patient able to tell us that she got in the bath herself but then fell asleep and mother had to wake her up to get out of bath. She reports that she is not afraid of anyone at home. Ms. [redacted] included photos where bruising and pattern marks were visible on the back of [redacted] legs. On the [redacted] note dated 5/6/24, Dr. [redacted] noted, Nursing approached Dr. [redacted] and I about concerns of mother attempting to record medical team. Dr. [redacted] and I did approach mother and informed her that family is not to film or photograph staff at all without knowledge or consent. The mother can take pictures of her daughter but without staff or machinery in the picture. Mother reports that she understands. Nursing narrative dated 5/6/24, [redacted] RN, noted, Multiple bruises and scabbed laceration areas noted to bilateral thighs, back, etc. See pics. Team presents during patient awaking from sedation as patient stated, my mom whipped me with the switch for acting up at school. Per documentation dated 5/6/24 by Child Life Specialist, [redacted] pt easily introduced herself and openly shared without prompting that she was burned when her

Tennessee Department of Children's Services

Case Recording Summary

Case Id:	[redacted]	Case Name:	[redacted] [redacted]
Case Status:	Close	Organization:	[redacted] Region

"mom put hot water in the bathtub and made me get in". And when pt's mom was not present, pt intermittently made comments about her burn injury without prompting and in seemingly random order. Pt made multiple statements such as "my mom did this", "it's mom's fault she didn't check the water", "my mom made me get in the hot water". Pt also shared that her mom was there when she got in the bathtub, but then shared "my mom found me asleep and kept trying to wake me up." Pt shared "I was dead, but she was able to wake me up". Pt referred to the pain during the injury several times as well saying "it really hurt when I was burned", "the hot water hurt me". Additionally, pt shared that she is "never going to get better" because she "was burned" and that she was "not safe" because she was "not in Tennessee anymore". [redacted] [redacted] RN noted on 5/6/24, While repositioning patient with [redacted] RN, patient states "my mom broke my legs." Asked patient to repeat what she just said as both RNs couldn't understand what she said at first, when patient repeated herself, you could clearly hear her say "my mom broke my legs." Per medical review of [redacted] Hospital records dated 5/14/24, [redacted] has developed mixed hypovolemic and septic shock. Hypovolemic shock occurs when the body loses too much blood or fluids, and septic shock occurs when there is widespread infection causing organ failure and low blood pressure. It was noted she had severe ARDS with fluid overload. ARDS is respiratory distress syndrome in which fluid collects in the lungs, depriving organs of oxygen. She is intubated & on the ventilator. She has a new small intracranial hemorrhage (bleeding in the skull) likely due to sepsis. Per the physicians note dated 5/15/24, the plan is to return to surgery to remove the dead skin, there is concern for areas of necrosis (death of cells/tissue) on the right foot. (p.3) Safety nurse voiced concern with [redacted] safety if she were to return home with her current caregivers. Safety nurse recommended if other children reside in the home, they should be evaluated by the CARES team at [redacted] as soon as possible. CM [redacted] informed Safety nurse there were no other children in the home and that [redacted] had progressed to brain death with her brain herniating into her spinal column. [redacted] passed away on 05/18/2024.

- CM will request ACVs current incident medical records and most recent PCP record. Records will be reviewed and uploaded to TFACTS.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will coordinate and schedule interviews with the mother and her boyfriend.
-- CM will complete home visit where incident occurred.
-- CM will complete collateral contact with ACVs school.
-- CM will document and upload autopsy into TFACTS once received.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.

Content: AP Interview
Location: [redacted] TN. [redacted]

CM arrived at the family home where CM was greeted and invited inside by Mr. [redacted] CM spoke with Mr. [redacted] and AP [redacted] together inside the living room area of the home. Ms. [redacted] says she and Mr. [redacted] both went to speak with homicide detectives at the police station last week after they came to her home with a search warrant. Ms. [redacted] says officers went into her attic and damaged her roof after looking at the hot water heater. She says there were too many people causing the roof to crack. They also stated they were searching to see if there was any blood splatter.

Mr. [redacted] says he and Ms. [redacted] have been together for a year. Ms. [redacted] is currently 25 weeks pregnant with his child. They are having a girl. Mr. [redacted] and Ms. [redacted] described the ACV as cheerful and playful. She had no siblings. The ACV was in Pre-K at [redacted] Elementary School, and she behaved like a normal child. Ms. [redacted] says the teacher reported on Thursday that the ACV did not want to lay on her mat as instructed. The ACV talked back to the teacher. The following day, the child was acting out in class all day. The ACV arrived home and Ms. [redacted] says she whooped the child with a belt. She described her putting the child in a chicken wing by holding the child by one arm and hitting her on her bottom with a belt. Ms. [redacted] says the child was moving which may have caused her to hit her on the back. Ms. [redacted] says she never saw any bruises on the child. Mr. [redacted] says he never disciplined the child unless he took away her toys. He was at work when the incident happened. Ms. [redacted] says she told the child to get ready to take her bath and go to bed while Ms. [redacted] took the dog out. She came back and the ACV was already in the tub. She got the child out the tub and noticed several blisters from her waist down. Mr. [redacted] arrived home and Ms. [redacted] went to Walgreens to get some cream to apply to the blisters. Later that night, Ms. [redacted] took the child to the hospital because the child was in pain. Doctors are the ones who busted

the blisters. The child was transported from [redacted] to Ohios burn unit. Ms. [redacted] says the ACV had COVID which may have made things worse when the doctors did not properly care for the ACV. She says the ACV was doing well and suddenly became worse. She blames doctors for improper treatment saying her child would have still been alive. Mr. [redacted] says that same week, the family dog died due to being left in the heat too long. The family is going through a lot after the loss of the ACV and the dog.

Ms. [redacted] says she has plenty of family support but still feels she needs grief counseling. She is insured with [redacted] Her last doctors appointment was today at [redacted]. The childs father is not active. While the child was acting out fighting the nurses in the hospital, Ms. [redacted] says she told the child she would call her father. She was referring to Mr. [redacted] Ms. [redacted] says she never made the statement that she did not want the child. Both Mr. [redacted] and Ms. [redacted] says the child was well-loved and cared for in the home.

Observation: Ms. [redacted] and Mr. [redacted] showed CM videos and pictures of the child on their phone. There were no photos in the home. Both stated they were in the process of getting a bed for the child who was sleeping on an air mattress. The childs bedroom still had her toys and clothes inside. CM observed the roof that was cracked inside the childs room where the mother stated detectives are the one who did the damage. CM did test the water in the bathroom. The family had no baby supplies because Ms. [redacted] stated she wants to wait until she has the baby.

Household Composition

[redacted] [redacted] DOB: [redacted]
[redacted] [redacted] DOB: [redacted]

Plan: CM will put services in the home for grief counseling

The death investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with the following staff: Case Manager (CM) [redacted] CM [redacted] Team Leader (TL) [redacted] TL [redacted] Team Coordinator (TC) [redacted] CPS Director (CPSD) [redacted] and Director of Critical Incident Support (DCIS) [redacted]

The CPS investigation was assigned in TFACTS on 5/6/24 initially concerning allegations of Lack of Supervision for ACV [redacted] (5yo). [redacted] died on 5/18/24 as a result of the injuries reported in the initial intake, at which time the allegation of Abuse Death was added to the open case. It was reported [redacted] resided with her birth mother [redacted] and the mothers boyfriend [redacted] in [redacted] County. No other minors reside in the home; however, it was reported the mother is 6 months pregnant. The birth father [redacted] is reportedly not involved.

On 5/3/24 at approximately 5pm the mother ran a bath for [redacted] at home. [redacted] got in the tub and when she exited the mother noted her legs were red and burned. The mother treated with Neosporin, but brought [redacted] to the hospital [redacted] later that evening at approximately 10:30pm when she noted blisters were forming. The hospital noted [redacted] had partial thickness burns to the lower half of her body, including legs buttocks, and labia. [redacted] required specialized care from a burn unit and was transferred to [redacted] Hospital in Ohio. [redacted] condition continued to decline with the burns causing swelling in her brain and spinal cord. Additionally, the hospital reporting observing loop-shaped marks and deep bruising on [redacted] back. Medical has documented the marks with photographs. When asked about these marks, the hospital reported the mother stated they could be from [redacted] hitting herself while jumping rope. The mother also made a comment about December 2023 being the last time she had physically disciplined [redacted] and that her boyfriend had made a comment about her methods. On 5/17/24 [redacted] brain swelling increased and by 5/18/24 brain death had occurred, and she was removed from life support. The mother stayed at [redacted] side during her hospitalizations and death.

Regarding the day of the incident, the mother reported [redacted] had gotten in trouble at school, so she was making her take a bath, eat dinner, and go to bed early. The mother reported she was frustrated and ran the bath water for [redacted] and told her to get in, without checking the water temperature. The mother stated she took the dog outside to use the bathroom and

Tennessee Department of Children's Services

Case Status:	Close	Organization:	[redacted] Region

told [redacted] she better be in the tub when she returned. When back inside the mother stated she noted steam coming from the water and [redacted] was in the tub rocking back and forth. She told her to get out of the water and when she did, noted her legs were red and appeared burned. The mother called her sister who is a nurse to ask how to best treat [redacted] Her sister recommended applying Neosporin and wrapping her legs in gauze. The mother reported she went to the store for the items while her boyfriend watched [redacted] and before she needed to be at work at 9pm. The mother applied the Neosporin and gauze as well as Band-Aid to what appeared to be a blister forming on [redacted] thigh. When she went to reapply and wrap before going to work, the mother pulled off the Band-Aid to check the blister and noted the skin pulled off with it. At that point she decided [redacted] needed a higher level of medical treatment.

CM has not made contact with the mother since [redacted] death. The body was transported to the Ohio ME and they are awaiting on information from the mother of which funeral home to release to in [redacted]

Next Steps:
-- CM will request ACVs current incident medical records and most recent PCP record. Records will be reviewed and uploaded to TFACTS.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will coordinate and schedule interviews with the mother and her boyfriend.

Safety nurse consulted on case by [redacted] Philips for records review. Per review of [redacted] Hospital [redacted] note dated 5/4/23, Dr. [redacted] noted, Wounds are deep second degree without significant blanching. Also have bruising and patterns in red lines within areas of wounds. On the History and Physical dated 5/4/24, Dr. [redacted] noted, [redacted] is a 5-year-old female with no PMH (past medical history) who presents as a transfer after sustaining an acute scald burn from waist down around 5pm on 5/3/24. Per report from [redacted] patient was reportedly in the tub of hot water when she was burned. There was a delay in presentation, and patient did not arrive to the [redacted] ED until 2330. Upon arrival, patient states she got into the bathtub and fell asleep. She then got out on her own. She denies anyone putting her in the tub. Wounds are deep second degree in most areas with areas that also have bruising and patterns in red underlying the blistered skin. Concern about story and patterns. Patient able to tell us that she got in the bath herself but then fell asleep and mother had to wake her up to get out of bath. She reports that she is not afraid of anyone at home. Ms. [redacted] included photos where bruising and pattern marks were visible on the back of [redacted] legs. On the [redacted] note dated 5/6/24, Dr. [redacted] noted, Nursing approached Dr. [redacted] and I about concerns of mother attempting to record medical team. Dr. [redacted] and I did approach mother and informed her that family is not to film or photograph staff at all without knowledge or consent. The mother can take pictures of her daughter but without staff or machinery in the picture. Mother reports that she understands. Nursing narrative dated 5/6/24, [redacted] RN, noted, Multiple bruises and scabbed laceration areas noted to bilateral thighs, back, etc. See pics. Team present during patient awaking from sedation as patient stated, my mom whipped me with the switch for acting up at school. Per documentation dated 5/6/24 by Child Life Specialist, [redacted] pt easily introduced herself and openly shared without prompting that she was burned when her "mom put hot water in the bathtub and made me get in". And When pt's mom was not present, pt intermittently made comments about her burn injury without prompting and in seemingly random order. Pt made multiple statements such as "my mom did this", "it's mom's fault she didn't check the water", "my mom made me get in the hot water". Pt also shared that her mom was there when she got in the bathtub, but then shared "my mom found me asleep and kept trying to wake me up." Pt shared "I was dead, but she was able to wake me up". Pt referred to the pain during the injury several times as well saying "it really hurt when I was burned", "the hot water hurt me". Additionally, pt shared that she is "never going to get better" because she "was burned" and that she was "not safe"

because she was "not in Tennessee anymore". [redacted] RN noted on 5/6/24, While repositioning patient with [redacted] RN, patient states "my mom broke my legs." Asked patient to repeat what she just said as both RN's couldn't understand what she said at first, when patient repeated herself, you could clearly hear her say "my mom broke my legs."
Per medical review of [redacted] Hospital records dated 5/14/24, [redacted] has developed mixed hypovolemic and septic shock. Hypovolemic shock occurs when the body loses too much blood or fluids, and septic shock occurs when there is widespread infection causing organ failure and low blood pressure. It was noted she had severe ARDS with fluid overload. ARDS is respiratory distress syndrome in which fluid collects in the lungs, depriving organs of oxygen. She is intubated & on the ventilator. She has a new small intracranial hemorrhage (bleeding in the skull) likely due to sepsis. Per the physicians note dated 5/15/24, the plan is to return to surgery to remove the dead skin, there is concern for areas of necrosis (death of cells/tissue) on the right foot. (p.3)
Safety nurse voiced concern with [redacted] safety if she were to return home with her current caregivers. Safety nurse recommended if other children reside in the home, they should be evaluated by the CARES team at [redacted] as soon as possible. Ms. [redacted] informed Safety nurse there were no other children in the home and that [redacted] had progressed to brain death with her brain herniating into her spinal column. Safety nurse advised she was available for additional questions or assistance as needed.

Date: 05/14/2024
Time: 12:20 pm
Content: Conference Call

A conference call was held with CM [redacted] TL [redacted] Dr. [redacted] RN [redacted] and Social Worker [redacted] According to Ms. [redacted] the ACV arrived at [redacted] Childrens Hospital on Saturday 05/04/2024 at 2:00 pm. At the time, 32 % of her skull was burned. The child was awake upon arrival and told Dr. [redacted] that she got in the tub and fell asleep. The ACV stated that her mother had to wake her up and get her out of the tub. Medical personnel also spoke with the mother who reported she ran the childs bath water and did not check the temperature before the child got in the tub. The mother saw the child with blisters, so she contacted her sister who told the mother to take the child to the hospital. The mother says the incident happened at 5:00 pm and the mother did not arrive at the hospital until 11:00 pm. The initial wound care noticed bruises shaped in a U pattern on the childs right and left thigh. The burns were intense, but the child is expected to live. The child was having raspatory symptoms Wednesday night. Doctors said they did not get the impression that the mother held the child down in the tub. Upon arrival, the ACV was talkative and engaging with staff. There were times when the mother was very aggressive and made statements towards the child saying the child kept her up all night. Ms. [redacted] says the mother told her she does not get any joy from being a mother. The mother reportedly stated she planned to give the child up for adoption when she was pregnant. The mother is currently pregnant. She has no unrestricted access to the child. The mother seems to be very concerned and is acting appropriately when discussing the childs condition.

Plan: CM has requested medical records

CM [redacted] spoke with social worker [redacted] via phone. Ms. [redacted] informed CM that the ACV is not in good condition. A head CT was performed and showed frontal bleeding on yesterday. The child also had an increase in heart rate. The mother became ill and had to be transported to an adult hospital, [redacted] once learning of the childs condition. The mother was discharged and is not back at the hospital with the ACV. Doctors report that the skull injuries are due to the hot water. There was a scar observed on the childs back and the mother stated to medical personnel that the child got the bruise from when she was jumping rope. The mother also reported that the boyfriend lives in the home and was with the child alone in the home while the mother went to the store to get treatment for the childs bruises.

Plan: CM will obtain medical records

distracted because the dog has to be watched outside or he will run away. Ms. [redacted] states that she told [redacted] to be in the tub when she came back in. She states that when she got back in the bathroom she saw [redacted] just rocking back and forth and she then saw the steam from the water and she yelled and told [redacted] to get out. Ms. [redacted] states that [redacted] was very red and she called her sister ([redacted] because she is a nurse and [redacted] told her to go to Walgreens and get Neosporin and some gauges and wrap [redacted] legs. She states that she had but a bandaid on one spot on the back of her thigh. She states that [redacted] stated that she didnt want to eat but just go to bed. Ms. [redacted] states that she checked on [redacted] bout 9PM before she was to go to work (Fedex) her paramour [redacted] [redacted]) got home cause she works nights [redacted] stated that she was hurting. Ms. [redacted] states that she looked at [redacted] legs and boils blisters were beginning to form and where the band aid was on [redacted] leg came off and skin came with it. She knew then she needed to bring [redacted] to the hospital.

Ms. [redacted] reports that [redacted] knows how to tell her if more cold or hot water is needed in the bathe. Ms. [redacted] states that she runs the bathes. She states that she loves her child and would never do anything to hurt her. CM thanked Ms. [redacted] for speaking with her.

Observation: CM [redacted] observed the child to be in the hospital bed slightly awake. [redacted] stated that her legs and butt was hurting, every time she moved. She stated that she took a bath. CM encouraged the child to get some rest and that she would let the nurse know as well.

Collateral:

CM [redacted] spoke with hospital assigned nurse: The nurse informed CM that the child is burned badly but they were not suspecting it to be abuse. The nurse staff stated that [redacted] labia was burned badly as well. The nurse staff states that mom was very defensive with them when first questioned. CM thanked nurse staff for speaking with her.

Action Steps: Staff with on call TL;

Case Worker: [redacted] Date: 06/13/2024

Team Leader: [redacted] Date: 09/23/2025

E. Investigation Summary

Instruction: Condense the finding rationale for each allegation relative to the child victim(s). Be sure to identify the facts that provided for the classification decision.

Summarize the key points and dates of the child or children's statements and/or the observation of the child or children's physical state or home environment:

During an interview with CM [redacted] at [redacted] disclosed that she was experiencing discomfort in her legs and butt when she moved. [redacted] only stated that she took a bath. At this time, no further information was collected. Doctors report that 32% of [redacted] skull was burned. During the initial wound care at [redacted] Hospital [redacted] 's right and left thighs were noticed to have markings in the shape of a "U."

Summarize professional, medical or psychological findings or opinions: What is the collateral's oral or written finding/opinion of the incident(s)/allegation(s)?

Nurses report the ACV stated she was burned when her "mom put hot water in the bathtub and made me get in". And "When the ACV's mom was not present, the ACV made multiple statements such as "my mom did this", "it's mom's fault

Department of Children's Services

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

Case Name : [redacted] **Investigation ID:** [redacted]

she didn't check the water", "my mom made me get in the hot water". The ACV also shared that her mom was there when she got in the bathtub, but then shared "my mom found me asleep and kept trying to wake me up." [redacted] RN noted on May 06, 2024, "While repositioning patient with [redacted] RN, patient/ACV stated "my mom broke my legs."

Summarize alleged perpetrator's statement or admission: What is the perpetrator's explanation of the incident(s)/allegation(s)?

According to the mother, she placed the child in the tub and went to take the dog outside. She returned and got the child out the tub and noticed several blisters from her waist down. The incident occurred at 5:00 p.m., and records shows she did not arrive at the hospital until 11:00 p.m.

Summarize witnesses' descriptions of what they saw and what they believe indicates child abuse/neglect:

The referral states [redacted] was brought to the hospital due to a burn at 10:32 PM. [redacted] said she ran a bath around 5:00 pm on 5/3/2024, and she did not check how hot it was. She stated [redacted] got in the tub and got out. [redacted] said she tried to dress the burns at home herself and put Neosporin on it, but when she started to notice blisters so she brought [redacted] in. [redacted] has a burn to the lower body extremity, buttocks and labia and the doctor said she has a partial thickness burn from the waist down that is 36%. [redacted] will likely be admitted to the hospital. [redacted] does not have a history of visits at [redacted] Children's Hospital.

Summarize any other evidence or factors that support the investigative finding(s) for the allegation(s) of abuse/neglect:

As of September 27, 2024, records shows that Ms. [redacted] was arrested and charged with Aggravated Child Abuse-Child U/6 and First-Degree Murder. Days prior to her arrest, Ms. [redacted] gave birth to newborn [redacted] on [redacted] Mr. [redacted] is the father to [redacted] who is currently in his care. No court orders are in place for him to obtain full custody.
