in the morning. Ms. [redacted] couldnt remember when the throwing up began. Ms. [redacted] stated Mr. [redacted] was heavy-handed and rough with [redacted] Ms. [redacted] reported [redacted] was scared to be left alone with Mr. [redacted] and would scream when she handed him to Mr. [redacted] Ms. [redacted] stated she saw fingerprint bruises on [redacted] that Ms. [redacted] pointed out. Ms. [redacted] stated she saw marks and bruises on [redacted] ribs. Ms. [redacted] stated Mr. [redacted] may have been too rough. Ms. [redacted] stated she corrected Mr. [redacted] and told him to cut it out.
Mr. [redacted] stated Ms. [redacted] his girlfriends roommate, left around 2:50pm-3:00pm. Mr. [redacted] stated he heard a whine, noticed [redacted] pooped, and asked Ms. [redacted] for gloves and a mask. Mr. [redacted] stated he heard gurgling and [redacted] was blue in the face so he called 911. Mr. [redacted] stated he has no idea what happened. Mr. [redacted] stated he would watch [redacted] Mr. [redacted] stated [redacted] bruises easily but no child abuse bruises. Mr. [redacted] stated he remembers seeing red marks on [redacted] face previously but [redacted] was a clumsy child who bumps, falls, and jumps off bed. Mr. [redacted] stated Ms. [redacted] told him he was too rough so he stopped playing with [redacted] Mr. [redacted] stated [redacted] cries only when Ms. [redacted] or Ms. [redacted] are present. Mr. [redacted] stated he watched [redacted] 10-15 times and began mid-May.
Care Team Doctor [redacted] stated the family reported the past couple weeks, [redacted] has been throwing up. Dr. [redacted] stated the family reported an incident where [redacted] fell and hit his head but there were no changes in his behavior. Dr. [redacted] stated around 4:08pm, [redacted] found [redacted] unresponsive. Dr. [redacted] stated [redacted] has a severe subdural hematoma. Dr. [redacted] stated [redacted] has rib fractures and a collarbone fracture that are in different stages of healing. Dr. [redacted] stated a bruise is developing under [redacted] left arm. Dr. [redacted] stated there is a bruise that is yellow/brown on [redacted] right arm. Dr. [redacted] stated [redacted] is too unstable for a skeletal survey. Dr. [redacted] stated [redacted] does not have brain activity and is not expected to survive. Dr. [redacted] reported the injuries are from non-accidental trauma. Dr. [redacted] explained there is acute blood in the brain which means there was a significant event. Dr. [redacted] stated she believes the significant event occurred between 12:00pm-4:00pm. Dr. [redacted] reported concerns of shaking. Dr. [redacted] stated there was swelling in the brain which is from external impact. Dr. [redacted] stated the right-side clavicle was fractured. Dr. [redacted] stated vomiting can indicate brain trauma. Dr. [redacted] stated [redacted] pupils are not responding.
On October 26, 2024, an autopsy was completed on [redacted] by Assistant Meical Examiner, Dr. [redacted] The autopsy stated This 22-month-old male child, identified as [redacted] was reportedly found unresponsive. Emergency medical services responded and transported him to [redacted] Childrens Hospital at [redacted] where he was diagnosed with multiple non-accidental traumatic injuries. His condition continued to decline and death was pronounced. Autopsy examination had findings of evidence of organ procurement, evidence of extensive medical intervention, and multiple acute and healing traumatic injuries. Toxicology analysis performed on hospital blood was negative for ethanol, screened drugs of abuse and selected therapeutic medications. Based on all currently known and available information, the cause of death is best attributed to blunt force injuries, and the manner of death is homicide.
On February 21, 2025 at 9:00am, Case Manager (CM) [redacted] presented this case to the Child Protective Investigation Team. Members present were CM, DCS Team Leader [redacted] City of [redacted] Sergeant [redacted], [redacted] Child Advocacy Center Forensic Interviewer [redacted], [redacted] Child Advocacy Center Family Advocate [redacted], Assistant District Attorney [redacted], and [redacted] Representative. The team was in agreement that there is a preponderance of evidence that supports the substantiation of the Abuse Death.
Per DCS Policy 14, Work Aid 1, Section G:
Child Death is defined as:
a) Any child death caused by abuse or neglect. b) Any unexplained death of a child when the cause of death is unknown or pending an autopsy report. c) Any child death caused by abuse or neglect resulting from the parent or legal custodian/caretaker failure to stop another persons direct action that resulted in the death of the child. Child deaths are always treated as severe abuse.
There is a preponderance of evidence that supports the substantiation for all allegations against [redacted] and [redacted] This case will be closed and classified as Allegation Substantiated, Perpetrator Substantiated for Abuse Death, Medical Maltreatment, Physical Abuse against [redacted] for [redacted] This case is also being classified as Allegation Substantiated, Perpetrator Substantiated for Abuse Death and Physical Abuse against [redacted] for [redacted]
There is not a preponderance of evidence to support the allegation against [redacted] This case will be closed and

The preliminary near death (PND) investigation regarding Alleged Child Victim (ACV) [redacted] was debriefed with the following staff: Case Manager (CM) [redacted] Team Leader (TL) [redacted] TL [redacted] Team Coordinator (TC) [redacted], CPS Director (CPSD) [redacted], and Director of Critical Incident Support (DCIS) [redacted]

The CPS investigation was assigned in TFACTS on 10/21/24 concerning allegations of Physical Abuse for ACV [redacted] (1yo). It was reported [redacted] resided with his birth mother [redacted] the mothers boyfriend [redacted] and their adult roommate [redacted] in [redacted] County. The birth father [redacted] was reportedly not actively involved prior to the incident but has been present at the hospital.

On 10/18/24 [redacted] was at the family home and in the care of the roommate after the mother had left for work at approximately 6am. The roommate reported no concerns during that time. Between 3-3:15pm the roommate left the home leaving [redacted] in the care of the mothers boyfriend. Soon after the boyfriend called the mother for help locating gloves after [redacted] had soiled his diaper. At approximately 4pm the boyfriend called 911 reporting [redacted] was unresponsive. [redacted] was med-flighted to [redacted] Childrens Hospital in critical condition. Initial examinations revealed clavicle fracture, rib fracture, and brain bleeds. A full skeletal survey has not been complete due to [redacted] critical condition, but a chest x-ray has revealed multiple fractures in different stages of healing. Bruising on and around the arms has also been observed. [redacted] pupils are unresponsive, and he is showing no brain activity. Injuries are indicative of non-accidental trauma. The first brain death exam was completed today, 10/21/24, with a second scheduled for tomorrow. The mother has remained bedside and is monitored. She is reported to be in denial regarding the severity of [redacted] condition.

The roommate has provided CM with pictures and video from 7/24/24 and 10/2/24 showing [redacted] with multiple injuries, including bruises on the rib cage and stomach and markings on the face and over the body. The roommate reporting sending these to the mother with concerns and the mother acknowledging her boyfriend was too rough with the baby and that she would talk to him. The mother confirmed this occurred and that she talked to the boyfriend, and she felt the situation had been resolved. The mother reported that [redacted] had been throwing up the past two weeks daily early in the

morning, but she did not seek medical attention. She believed it was possible due to the OTC oral drops [zeolite] she was giving [redacted] to help with his speech delay. The mother also reported an incident in which she was with [redacted] and he hit his head on the side table but didnt cry and appeared fine afterward. The boyfriend reported when he found [redacted] unresponsive he was blue in the face and making a gurgling noise. The boyfriend stated he has babysat 10-15 times in the past and the mother had talked to him about playing rough with the baby. The roommate and mother both described the boyfriend as heavy-handed. No health concerns were otherwise reported for [redacted] He was reported to have an 18-month PCP checkup in May or June.

The boyfriend has been arrested on probable cause and charges are likely pending for the mother for failure to report.

Next Steps:
-- CM will request ACVs birth, PCP and current incident medical records. Records will be reviewed and uploaded to TFACTS.
-- CM will request all interviews and information/evidence collected by LE within their investigation and review, summarize, and upload what is shared to TFACTS.
-- CM will request home visit and photograph scene if LE has not done so.
-- CM will follow-up with hospital regarding drugs screen for ACV.
-- CM will request drug screen from mother.
-- CM will complete Closing FAST prior to case closure.
-- CM will present findings to the Child Protective Investigative Team (CPIT) for classification review.

Employee Assistance Program (EAP) information and supervisory support was discussed with involved staff.

Child Protective Service Investigation Summary and Classification Decision of Child Abuse/Neglect Referral

Case Name : [redacted] **Investigation ID:** [redacted]

Instruction: Condense the finding rationale for each allegation relative to the child victim(s). Be sure to identify the facts that provided for the classification decision.

Summarize the key points and dates of the child or children's statements and/or the observation of the child or children's physical state or home environment:

ACV was injured by AP [redacted] As a result of these injuries, the ACV received medical treatment but did not survive. The cause of death was homicide. There are no other children in the home.

Summarize professional, medical or psychological findings or opinions: What is the collateral's oral or written finding/opinion of the incident(s)/allegation(s)?

Investigation was presented to CPIT. Allegation of Physical Abuse against Ms. [redacted] was classified as AUPU. Allegations of Physical Abuse, Medical Maltreatment, and Abuse Death against AP Mr. [redacted] and AP Ms. [redacted] were classified as ASPS. Both Mr. [redacted] and Ms. [redacted] were criminally charged.

Summarize alleged perpetrator's statement or admission: What is the perpetrator's explanation of the incident(s)/allegation(s)?

AP Birth Mother Ms. [redacted] was aware of concerns of physical abuse by Mr. [redacted] and did not implement any plans for safety. AP Ms. [redacted] reported concerns of the physical abuse to Ms. [redacted] with photographs and videos of injuries.

Summarize witnesses' descriptions of what they saw and what they believe indicates child abuse/neglect:

A CPS referral was received with allegations of Physical Abuse, Medical Maltreatment, and Abuse Death due to ACV having severe unexplained injuries.

Summarize any other evidence or factors that support the investigative finding(s) for the allegation(s) of abuse/neglect:
