Child Fatality Report Release of Information to the Public

Person ID: 105277554

County of Child's Residence: TRAVIS

Gender: Female

Age: 3 Year(s) 11 Month(s)

Date of Death: 08/16/2025

On the date of the fatality, the child was not in DFPS conservatorship and was living with the child's parent, a managing conservator, a legal guardian or other person entititled to the child's possession.

Child's Name: Timpson-Aldrid,Remi

Current Report(s) of Abuse/Neglect:

Intake Date(s): 08/10/2025, 08/10/2025, 08/14/2025 - three reports merged into single investigation

Summary of Allegation(s)/Investigation:

The Department received three reports concerning the deceased child. One indicated that the child was not acting like normal when the child's mother picked her up for the weekend and that the child had lost weight, her hair was severely matted, and the child's father did not have any food for the child. Specifically, this report stated the child weighed 14 lbs. but was 20 lbs. at her last appointment. This report also stated the child became unresponsive the night before, so the mother brought her to the hospital. A second report stated that the child went to visit the mother on 08/08/2025 for her fourth weekend visit. The father dropped the child off at 5:00PM. He tried to message the mother to check on the child but did not get a response until the mother's paramour replied to the father on 08/09/2025 at 6:00PM stating the child was fine. The child was then left with the paramour while the mother went to the store. Upon her return, the child was observed to be unresponsive. The mother took the child to the hospital, and it was found the child had non-accidental head trauma. The third report had additional information that the mother did not want to take the child to the hospital, but the father insisted they do. It also stated the child did not have any brain activity and testing was being done to confirm death.

The Department's investigation determined that the child died as a result of her injuries on 08/16/2025 after she was declared brain dead and taken off life support. The mother left the residence on 08/09/2025 at 10PM to go to the grocery store and left the deceased child and her half-siblings (ages 1 and 2 months) in the care of her paramour (biological father of the half-siblings). Upon her return from the store, she went to feed the 2-month-old when the paramour called her into the room stating something wasn't right with the child. The mother stated the child was unresponsive and then began throwing up out of her nose twice. The mother stated she changed the child's clothes

and then brought her to the hospital. Law enforcement reviewed video footage which confirmed the mother was in the grocery store until 10:30PM. The paramour had family visiting the night of the incident as well. Some of the children who were present confirmed that the mother went to the store and the child was fine prior to the mother leaving. The paramour reported that while the mother was at the store, the child came over to him and laid down on his chest. When the mother got home around 10:45 PM he put the child into the playpen and that's when they noticed she was going limp and not moving. Their first thought was she was having a seizure, and he said they administered seizure medication but made the decision to take her to the hospital soon after. Medical staff indicated the child suffered abusive head trauma and would have been symptomatic almost immediately after receiving the injuries. The only person who had immediate access and was caring for the child in that time frame was the paramour. It was also determined that the mother delayed medical care for the child after she was showing symptoms. It was also found the child did not appear malnourished given her diagnosis and per her father, weighed 31 lbs. at a Dr. visit on 08/07/2025.

The medical examiner conducted an autopsy that was still pending at the time the Department's investigation was closed.

Law enforcement conducted an investigation however no charges had been made at the time the Department's investigation closed.

Investigation Findings:

The Department confirmed the mother's paramour committed physical abuse of the deceased child, which led to her death.

The Department confirmed the mother committed medical neglect of the deceased child.

The Department was unable to determine if the mother committed physical abuse of the deceased child.

The Department did not confirm the father committed physical abuse or physical neglect of the deceased child.

Safety and Risk Assessment Factors Identified:

Structured Decision Making Safety Assessments:
1.) 08/10/2025: Safety Assessment - Initial: Safe

Risk Assessment Final Risk Level: Very High

Case Action:

Close

Services and Referrals Provided to the Family:

Other Services:

No services or referrals were provided.

Other Actions Taken to Mitigate Risk:

The Department conducted an investigation regarding the deceased child's half-siblings to ensure their safety. Any services needed would be provided as part of that investigation.

If one or more children were previously removed from the home, for each conservatorship episode, summarize dates of conservatorship and type of placement at the end of conservatorship:

The deceased child was in care from 11/19/2021 until 11/22/2023. At the close of the Conservatorship episode, the child was residing with her father who was granted sole managing conservatorship.

Previous Report of Abuse/Neglect:

Intake Date(s): 05/11/2013

Summary of Previous Allegation(s)/Investigation:

The Department received a report involving the deceased child's mother's paramour when he was 15 years old. The report stated that the paramour was involved in a physical altercation with his older sibling. The older sibling had a 1-year-old child (the paramour's niece) that was also present in the home and was injured as a result of the altercation.

The Department's investigation determined that the paramour and his sibling got into an altercation that escalated with the paramour punching his sibling and also grabbing a knife a threatening to kill her. At one point, the sibling pushed the paramour away and he fell backwards onto his niece, who fell and hit her head, resulting in a bump. The niece was treated by emergency medical services on scene. The paramour was arrested for the assault.

Investigation Findings:

The Department confirmed the paramour and his sibling committed neglectful supervision of the 1-year-old.

The Department confirmed the paramour committed physical abuse of the 1-year-old

Safety and Risk Assessments:
Safety Assessment: Conditionally Safe/Safety Plan Completed
Risk Assessment Risk Finding: Factors Controlled

Safety and Risk Assessment Factors Identified:

Case Action:

Services and Referrals Provided to the Family:

Other Services:

The paramour's sibling accepted referrals provided for her to seek parent training and counseling.

Other Actions Taken to Mitigate Risk:

A safety plan was initiated in which the paramour and sibling's mother would not be alone together and that the paramour would be supervised around his niece.

The Department's investigation was closed.

Previous Report of Abuse/Neglect:

Intake Date(s): 09/01/2021

Summary of Previous Allegation(s)/Investigation:

The Department received a report stating the deceased child was born at 26 weeks gestation and there was no prenatal care for the child. The deceased child's mother was picked up by emergency medical services from a motel that reeked of marijuana. At delivery, the mother tested positive for amphetamines, opiates, and marijuana. The child's drug tests were pending.

The Department's investigation determined that the child's meconium drug test results showed she was positive for amphetamines, opiates, and marijuana. The child stayed in the neonatal intensive care unit due to her prematurity throughout the investigation. The mother did not cooperate fully with the Department except some phone calls and texts. She was also arrested during the investigation for possession of controlled substance.

Investigation Findings:

The Department confirmed the mother committed neglectful supervision of the deceased child.

Safety and Risk Assessment Factors Identified:

Structured Decision Making Safety Assessments:
1.) 09/02/2021: Safety Assessment - Initial: Safe with plan
2.) 11/29/2021: Safety Assessment - Case Closure: Unsafe

Risk Assessment Final Risk Level: Very High

Case Action:

Services and Referrals Provided to the Family:

Other Services:

No services or referrals were provided during the investigation but were offered as part of the Conservatorship case.

Other Actions Taken to Mitigate Risk:

The Department provided a notice of status to the hospital to ensure the child was not discharged without notifying the Department. Prior to the discharge, the Department sought and was granted Temporary Managing Conservatorship of the child. She remained in the hospital until 12/24/2021. During the Conservatorship case, the mother did not fully engage in services, drug test, or attend all of the child's medical appointments to learn how to properly care for the child who had a G-tube and level 1 hypoxic ischemic encephalopathy due to lack of oxygen to her brain at or near birth. The child's father and the father's paramour learned how to properly care for the child and the child was placed in the home of her biological father on 06/05/2023. The Department monitored until legally dismissed on 11/22/2023. The father was given sole managing conservatorship, and the mother had a detailed visitation plan that required she meet certain steps before unsupervised visits or overnights.

Previous Report of Abuse/Neglect:

Intake Date(s): 02/06/2024

Summary of Previous Allegation(s)/Investigation:

The Department received a report with concerns for the deceased child's living conditions at the deceased child's father's home. It was reported the father would leave the child unattended and had missed several medical appointments for the child.

The Department's investigation determined that the father was ensuring that the child's medical needs were met by following up with doctor appointments and having all the necessary supplies. Both the paternal grandmother, who is a nurse, and great grandmother had no concerns about the father's ability to care for the child. The father did acknowledge using legal marijuana products (Delta 8 CBD) and tested negative on a drug test. The father has family support and medical support from various sources including Bluebonnet Trails, Lone Star Circle of Care, Dell Children's hospital, an Audiologist, a Case Manager from Bluebonnet Trails, Early Childhood Intervention, and a Coordinator for Regional Day School. The child's medical supplies are delivered to their home. The child received various therapies and services, and medical professionals expressed no concerns about her well-being under the father's supervision and there was consistent attendance at scheduled appointments and minimal rescheduling or cancellations.

Investigation Findings:

The Department did not confirm the father committed neglectful supervision or medical neglect of the deceased child.

Safety and Risk Assessment Factors Identified:

Structured Decision Making Safety Assessments:
1.) 02/09/2024: Safety Assessment - Initial: Safe
2.) 03/13/2024: Safety Assessment - Reassessment: Safe

Risk Assessment Final Risk Level: High

Case Action:

Services and Referrals Provided to the Family:

Other Services:

No services or referrals were provided as the father and child were already connected to needed services in the community.

Other Actions Taken to Mitigate Risk:

Not applicable.

The Department's investigation was closed.
