Child Fatality Report Release of Information to the Public

Person ID: 109552714

County of Child's Residence: TRAVIS

Gender: Male

Age: 4 Year(s) 4 Month(s)

Date of Death: 06/08/2025

On the date of the fatality, the child was not in DFPS conservatorship and was living with the child's parent, a managing conservator, a legal guardian or other person entititled to the child's possession.

Child's Name: Dominguez,Johan

Current Report(s) of Abuse/Neglect:

Intake Date(s): 06/08/2025

Summary of Allegation(s)/Investigation:

The Department received a report stating the family was involved in a roll over collision and the vehicle was on its roof. The deceased child's father was driving with the deceased child's mother and his three siblings, ages 3, 7, and 8 also in the vehicle. The deceased child was the only child unrestrained. The deceased child's mother and father were both extremely intoxicated, with the father's blood alcohol level at .15 two hours after the accident.

The Department's investigation determined the deceased child's mother and father had been to a family gathering while the children were with a family friend and reported to only having one drink each. After the gathering, the parents picked the children up and went to another relative's home where the children played with their cousins and the mother and father reported to have additional drinks before they switched to water. The family left around 10:00 pm to get McDonald's, and the mother reported she buckled all the children in. While driving, the mother stated a car that was swerving everywhere eventually drove in front of their vehicle causing the father to swerve away from the oncoming vehicle, and they rolled over. The mother stated that one of the siblings told her that the deceased child had unbuckled himself to get money off the floor. This was also stated in that sibling's forensic interview. Two of the sibling's forensically interviews also stated that a white car cut in front of the father and caused the accident.

The medical examiner conducted an autopsy however the final results were pending at the time the Department's investigation was closed.

Law enforcement conducted an investigation and the deceased child's father was charged and arrested for

intoxication manslaughter and driving while intoxicated with a child under fifteen.

Investigation Findings:

The Department confirmed the deceased child's father committed physical abuse of the deceased child, which led to his death.

The Department did not confirm the deceased child's father committed neglectful supervision of the deceased child, as the death was better addressed under physical.

The Department confirmed the deceased child's father committed neglectful supervision of the deceased child's three surviving siblings.

The Department was unable to determine if the deceased child's mother committed neglectful supervision of the deceased child and his three surviving sibling's.

Safety and Risk Assessment Factors Identified:

Structured Decision Making Safety Assessments:
1.) 06/08/2025: Safety Assessment - Initial: Safe
2.) 06/16/2025: Safety Assessment - Reassessment: Safe with plan
3.) 07/18/2025: Safety Assessment - Case Closure: Safe with plan

Risk Assessment Final Risk Level: Very High

Case Action:

Family Preservation

Services and Referrals Provided to the Family:

Counseling and Evaluation

Other Services:

The family agreed to accept services and referrals offered by the Department as part of a Family-Based Safety Services cse.

Other Actions Taken to Mitigate Risk:

A safety plan was initiated in which the mother agreed to be supervised around the surviving siblings. The children's maternal grandmother was the approved supervisor. Upon his release from jail, the safety plan was updated in which the father would have two hours of supervised contact with the children. Legal intervention was sought but was denied.

If one or more children were previously removed from the home, for each conservatorship episode, summarize dates of conservatorship and type of placement at the end of conservatorship:

Not applicable.

Previous Report of Abuse/Neglect:

Intake Date(s): 09/10/2010

Summary of Previous Allegation(s)/Investigation:

The Department received a report with concerns the deceased child's father, age 12 at the time, may be inappropriately touching his siblings.

The Department determined that the family was currently involved with the Department and that the incident had occurred over two years ago. There were no current concerns in the home, and the family was participating in services, so no investigation was needed.

Investigation Findings:

The Department Administratively Closed concerns the deceased child's father committed sexual abuse of his four siblings.

Safety and Risk Assessments not required per policy.

Safety and Risk Assessment Factors Identified:

Case Action:

Not applicable.

The investigation was closed.

Previous Report of Abuse/Neglect:

Intake Date(s): 12/08/2022

Summary of Previous Allegation(s)/Investigation:

The Department received a report concerning the deceased child's sibling, age 8 months, had a genetic disorder and other medical needs requiring specialty care. The child was found to have lost weight, and the family had failed to attend two appointments with the gastroenterologist.

Th Department's investigation determined that all the children were observed with no noted concerns. The mother reported two appointments had been missed but rescheduled due to only having one vehicle. Follow-up contacts with the sibling's medical providers did not indicate any concerns.

Investigation Findings:

The Department administratively closed, per policy, concerns for medical neglect of the sibling by the deceased child's mother and father as there had been no additional reports of abuse or neglect in the last sixty days, the children were determined to be safe, and no abuse or neglect ad been found.

Safety and Risk Assessment Factors Identified:

Structured Decision Making Safety Assessments:
1.) 12/11/2022: Safety Assessment - Initial: Safe

Risk Assessment Final Risk Level: Moderate

Case Action:

Services and Referrals Provided to the Family:

Other Services:

No services or referrals provided.

Other Actions Taken to Mitigate Risk:

Not applicable.

The investigation was closed.

Previous Report of Abuse/Neglect:

Intake Date(s): 03/15/2024

Summary of Previous Allegation(s)/Investigation:

The Department received a report stating the deceased child's mother and father were drinking, smoking marijuana, and shooting guns while the deceased child and his three siblings were present. There were also concerns the father was abusing the children and could be heard hitting them and they were screaming.

The Department's investigation determined that the father was positive for marijuana on a drug test however the mother was negative. The two older siblings did not make any outcries of abuse or neglect and were not aware of drugs, even after being given an example of what drugs were. During the home assessment empty bottles of alcohol were observed and two wine coolers were in the refrigerator, however the mother denied drinking and the father reported occasional drinking. There was no drug paraphernalia found in the home and the family had a gun safe that required a code and key to open that secured the father's gun. The children were observed to be well cared for with no injuries noted and family members had no concerns for the home.

Investigation Findings:

The Department did not confirm the deceased child's father committed neglectful supervision or physical abuse of the deceased child or his three siblings.

Safety and Risk Assessment Factors Identified:

Structured Decision Making Safety Assessments:
1.) 03/20/2024: Safety Assessment - Initial: Safe

Risk Assessment Final Risk Level: Moderate
